**Formal Methods for Open Object-Based Distributed Systems** Gilles Barthe, Frank S. de Boer, 2008-05-29 This book constitutes the refereed proceedings of the 10th IFIP WG 6.1 International Conference on Formal Methods for Open Object Based Distributed Systems FMOODS 2008 held in Oslo Norway in June 2008. The 14 revised full papers presented together with 1 invited lecture were carefully reviewed and selected from 35 submissions. The papers cover topics such as semantics of object oriented programming, formal techniques for specification analysis and refinement, model checking, theorem proving and deductive verification, type systems and behavioral typing, formal methods for service oriented computing, integration of quality of service requirements into formal models, formal approaches to component based design and applications of formal methods.

**The Metaphysics and Mathematics of Arbitrary Objects** Leon Horsten, 2019-06-13 Develops and defends a new metaphysical and logical theory of arbitrary objects that will reinvigorate the philosophy of mathematics.

*Complex Networks* Vito Latora, Vincenzo Nicosia, Giovanni Russo, 2017-09-28 Networks constitute the backbone of complex systems from the human brain to computer communications, transport infrastructures to online social systems and metabolic reactions to financial markets. Characterising their structure improves our understanding of the physical, biological, economic and social phenomena that shape our world. Rigorous and thorough, this textbook presents a detailed overview of the new theory and methods of network science. Covering algorithms for graph exploration, node ranking and network generation among others, the book allows students to experiment with network models and real world data sets, providing them with a deep understanding of the basics of network theory and its practical applications. Systems of growing complexity are examined in detail, challenging students to increase their level of skill. An engaging presentation of the important principles of network science makes this the perfect reference for researchers and undergraduate and graduate students in physics, mathematics, engineering, biology, neuroscience and the social sciences.

Neural-Symbolic Cognitive Reasoning Artur S. D'Avila Garcez, Luís C. Lamb, Dov M. Gabbay, 2009 This book explores why, regarding practical reasoning, humans are sometimes still faster than artificial intelligence systems. It is the first to offer a self-contained presentation of neural network models for many computer science logics.

**Data Structures and Algorithms in Java, International Student Version** Michael T. Goodrich, Roberto Tamassia, Michael H. Goldwasser, 2014-06-16 The design and analysis of efficient data structures has long been recognized as a key component of the Computer Science curriculum. Goodrich and Tamassia's approach to this classic topic is based on the object-oriented paradigm as the framework of choice for the design of data structures. For each ADT presented in the text, the authors provide an associated Java interface. Concrete data structures

realizing the ADTs are provided as Java classes implementing the interfaces The Java code implementing fundamental data structures in this book is organized in a single Java package net datastructures This package forms a coherent library of data structures and algorithms in Java specifically designed for educational purposes in a way that is complimentary with the Java Collections Framework
