Matter, Mind, and Medicine Jacques Kriel, 2021-12-06 This book critically assesses the implications of modern medicine's claim to be a natural science Medicine models its scientific and clinical self understanding on an obsolete positivist conception of science reality and consciousness In this view the body is modeled as a biological machine disease as breakdown of the machine and therapy as physical measures to fix the machine The problems besetting medical science and practice are rooted in the inadequacy of the positivist philosophical assumptions regarding the nature of science reality and consciousness To base the diagnostic practices and therapeutic regimes purely on knowledge of physical processes in the human body is in view of this analysis at best grossly inadequate at worst thoroughly dehumanizing Anton van Niekerk Editorial Foreword This means that medicine's clinical method cannot be transformed without transforming the underlying view of science of reality and of the human person The book proposes a broader model of science which

overcomes the outdated dichotomy between human and natural sciences Science is viewed as an interdisciplinary exercise generating multiple perspectives The insights of the human sciences are essential for scientific clinical medicine Utilizing evolutionary biology and complexity theory the author proposes an alternative understanding of reality and human consciousness as a basis for a transformed clinical method Reality is a hierarchy of systems of increasing complexity Different levels can be distinguished namely material systems living material systems conscious living material systems and self conscious living material systems Each level represents a new manner of being which requires a different scientific discourse of understanding Using this model of reality the author argues against understanding human consciousness as a byproduct of physical processes in the brain The human person is a self conscious complex psycho somatic system whose well being is conditioned by much more than physical processes

Memoirs of the Twentieth Century Ugo Spirito,2021-10-25 Ugo Spirito s Memoirs of the Twentieth Century is the

intellectual autobiography of one of the most original and anticonformist contemporary Italian philosophers. In it Spirito makes an evaluation of his long career spanning from the decade of the 20 s to that of the 70 s of the twentieth century as a thinker who was never satisfied with any theoretical or philosophical system while constantly aiming at finding a definitive truth the incontrovertible or absolute. The various stages of his search deal with different philosophical and scientific systems from positivism to actual idealism from problematicism to omnicentrism from scientism to neoproblematicism revealing at the same time an inherent antinomic procedure that does not permit him to take any truth for granted. At the end of his life Spirito realized that he could only be sure of his present state of unawareness thus challenging the validity of his lifelong investigative activity. Man cannot know himself. Spirito wrote. Confronted with the manifestations of life and universe he could not help but feel a sense of surprise and astonishment. Throughout his life he was only a spectator of his destiny not the conscious creator of it as he believed in the early stage of his career. Consequently he reached a position of negating any value system bordering on skepticism and nihilism. Within this context he offered a post modern interpretation of life. This interpretation was also Spirito's conclusion and as such implied a rethinking about other faiths both political and ideological that for more than fifty years would develop parallel to philosophical faith. Consequently he revisited some of the most important philosophical and political personalities who interpreted or materialized those faiths from Benedetto Croce to Gentile from Benito Mussolini to Giovanni Bottai from Togliatti to Pope Paul VI. Spirito was not a thinker who remained secluded within the ivory tower of pure investigation but in an effort to modify society according to principle of the identification of philosophy with life he tried to act upon it by following thoughts with action. *Memoirs of the Twentieth Century* is divided in two parts one purely autobiographical and theoretical and the other more historical where Spirito narrates his relationship with the above mentioned personalities as a way of testing the validity of his beliefs. Indeed one can perceive his moment of adherence to each of the different approaches expounded only to subsequently detach himself from them. For the English speaking reader the second part will appear more interesting and poignant since Spirito's involvement with history foretells the intellectual fate of a nation. *Memoirs of the Twentieth Century* is a reflection on life in which personal history serves as a vehicle for judgment upon an entire century. **What Caused the Big Bang?** Rem B.

Edwards, 2021-07-26 This book critically explores answers to the big question What produced our universe around fifteen billion years ago in a Big Bang. It critiques contemporary atheistic cosmologies including Steady State Oscillationism Big Fizz Big Divide and Big Accident that affirm the eternity and self sufficiency of the universe without God. This study defends and revises Process Theology and arguments for God's existence from the universe's life supporting order and contingent existence.
