French Rural History An Essay On Its Basic Characteristics:

French Rural History Marc Bloch, 1966 From the Preface by Lucien Febvre MARC BLOCH S Caracteres originaux de l histoire ruralefranfaise which was originally published at Oslo in 1931 and appeared simultaneously at Paris under the imprint Belles Lettres has long been out of print As he told me on more than one occasion he had every intention of bringing out another edition In Marc Bloch s own mind this was not simply a matter of reissuing the original text He knew none better that time stops for no historian that every good piece of historical writing needs to be rewritten after twenty years otherwise the writer has failed in his objective failed to goad others into testing his foundations and improving on his rasher hypotheses by subjecting them to greater precision Marc Bloch was not given time to refashion his great book as he would have wished One wonders whether he would in fact ever have brought himself to do it I have the impression that the prospect of this somewhat dreary and certainly difficult task however one may try to avoid it revision of an earlier work is always hampered by the original design which offers few easy loopholes for escape held less appeal than the excitement of conceiving and executing an entirely new book However this may be our friend has carried this secret with so many others to his grave The fact remains that one of our historical classics now more than twenty years old is due for republication and is here presented to the reader

The Making of Capitalism in France Xavier Lafrance, 2019-02-25 Very few authors have addressed the origins of capitalism in France as the emergence of a distinct form of historical society premised on a new configuration of social power rather than as an extension of commercial activities liberated from feudal obstacles Xavier Lafrance offers the first thorough historical analysis of the origins of capitalist social property relations in France from a political Marxist or Capital centric Marxist perspective Putting emphasis on the role of the state *The Making of Capitalism in France* shows how the capitalist system was first imported into this country in an industrial form and considerably later than is usually assumed This work demonstrates that the French Revolution was not capitalist and in fact consolidated customary regulations that formed the bedrock of the formation of the working class *Civilization in French and Francophone Literature*, 2016-08-29 Preliminary

Chandra Mukerji, 2016-12-19 Winner of the American Sociological Association's Distinguished Book Award in 2012 Chandra Mukerji offers with this remarkable new book an explanation of the birth and subsequent proliferation of the many strands in the braid of modernity The journey she takes us on is dedicated to teasing those strands apart using forms of cultural analysis from the social sciences to approach history with fresh eyes Faced with the problem of trying to understand what is hardest to see the familiar she gains analytic distance and clarity by juxtaposing cultural analysis with history asking how modernity began and how people conjured into existence the world we now recognize as modern Part I describes the genesis

of key modern social forms the modern self communities of strangers the modern state and the industrial world economy Part II focuses on modern social types races genders and childhood Part III focuses on some of the cultural artifacts and activities of the contemporary world that people have invented and used to cope with the burdens of self making and to react against the broken promises of modern discourse and the silent injuries of material modernism Beautifully illustrated with over 100 color photographs in its 10 chapters MODERNITY REIMAGINED is not just an explanation an analysis of how modern life came to be it is also a model for how to do cultural thinking about today's world

Islamic History R. Stephen Humphreys, 1991-09 Humphreys gives a cross section of Islamic historical studies ranging from the struggles for power within the early Islamic community to the life of the peasantry Each chapter explores a broad topic in the social and political history of the Middle East and North Africa between A D 600 and 1500

Revolution and Rebellion in the Early Modern World Jack A. Goldstone, 2016-12-19 What can the great crises of the past teach us about contemporary revolutions Jack Goldstone shows the important role of population changes youth bulges urbanization elite divisions and fiscal crises in creating major political crises Goldstone shows how state breakdowns in both western monarchies and Asian empires followed the same patterns triggered when inflexible political economic and social institutions were overwhelmed by cumulative changes in population structure that collided with popular aspirations and state elite relations Examining the great revolutions of Europe the English and French Revolutions and the great rebellions of Asia which shattered dynasties in Ottoman Turkey China and Japan he shows how long cycles of revolutionary crises and stability similarly shaped politics in Europe and Asia but led to different outcomes In this 25th anniversary edition Goldstone reflects on the history of revolutions in the last twenty five years from the Philippines and other color revolutions to the Arab Uprisings and the rise of the Islamic State In a new introduction he re examines his pioneering look at the role of population changes such as rising youth cohorts urbanization shifting elite mobility as continuing causal factors of revolutions and rebellions The new concluding chapter updates his major theory and looks to the future of revolutions in the Middle East Asia and Africa

The View from Above Jeanne Haffner, 2013 The role of aerial photography in the evolution of the concept of social space and its impact on French urban planning in the mid twentieth century In mid twentieth century France the term social space l'espace social the idea that spatial form and social life are inextricably linked emerged in a variety of social science disciplines Taken up by the French New Left it also came to inform the practice of urban planning In *The View from Above* Jeanne Haffner traces the evolution of the science of social space from the interwar period to the 1970s illuminating in particular the role of aerial photography in this new way of conceptualizing socio spatial relations As early as the 1930s the view from above served for

Marcel Griaule and other anthropologists as a means of connecting the social and the spatial Just a few decades later the Marxist urban sociologist Henri Lefebvre called the perspective enabled by aerial photography a technique closely associated with the French colonial state and military the space of state control Lefebvre and others nevertheless used the notion of social space to recast the problem of massive modernist housing projects grands ensembles to encompass the modern suburb banlieue itself a critique that has contemporary resonance in light of the banlieue riots of 2005 and 2007 Haffner shows how such views permitted new ways of conceptualizing the old problem of housing to emerge She also points to broader issues including the influence of the colonies on the metropole the application of sociological expertise to the study of the built environment and the development of a spatially oriented critique of capitalism

Political Economy and the Rise of Capitalism David McNally, 2024-06-21 From the Introduction This book challenges the conventional wisdom about classical political economy and the rise of capitalism It is written in the conviction that modern interpretations of political economy have suffered terribly from acceptance of the prevailing liberal view of the origins and development of capitalist society By the liberal account capitalism emerged out of the centuries old competitive activities of merchants and manufacturers in rational pursuit of their individual economic self interest Over time this account claims the persistent activity of these classes developed new forms of wealth and productive resources and new intellectual and cultural habits which eroded the existing structure of society The rise of capitalism is thus explained in terms of the rise to prominence of the most productive rational and progressive social groups merchants and manufacturers Not surprisingly classical political economy came to be seen as an intellectual reflection of the ascendance of merchants and manufacturers and as a theoretical justification of their interests and activities This book argues that capitalism was the product of an immense transformation in the social relationships of landed society and that this fact is crucial to understanding the development of classical political economy Without a radical transformation of the agrarian economy the activities of merchants and manufacturers would have remained strictly confined By no inexorable logic of their own were mercantile and industrial activities capable of fundamentally transforming the essential relations of precapitalist society Rather the changes in agrarian economy which drove rural producers from their land forced them onto the labour market as wage labourers for their means of subsistence and refashioned farming as an economic activity based upon the production of agricultural commodities for profit on the market established the essential relations of modern capitalism In what follows these processes are described in terms of the emergence of agrarian capitalism This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1988

[Origins of Liberal Dominance](#) Andrew C. Gould, 2010-06-02 How did liberal movements reshape the modern world Origins of Liberal Dominance offers a revealing account of how states

churches and parties joined together in France Belgium Switzerland and Germany to produce fundamentally new forms of organization that have shaped contemporary politics Modern political life emerged when liberal movements sought to establish elections constitutions free markets and religious liberty Yet liberalism even at its height faced strong and often successful opposition from conservatives What explains why liberals overcame their opponents in some countries but not in others This book compares successful and unsuccessful attempts to build liberal political parties and establish liberal regimes in France Belgium Switzerland and Germany from 1815 to World War I Andrew Gould argues that relations between states and churches set powerful conditions on any attempt at liberalization Liberal movements that enhanced religious authority while reforming the state won clerical support and successfully built liberal institutions of government Furthermore liberal movements that organized peasant backing around religious issues founded or sustained mass movements to support liberal regimes *Origins of Liberal Dominance* offers striking new insights into the emergence of modern states and regimes It will be of interest to political scientists sociologists comparative historians and those interested in comparative politics regime change and state building democratization religion and politics and European politics Andrew C Gould is Assistant Professor of Government and Kellogg Institute Fellow University of Notre Dame
