Environmentalisms David J. Vázquez,2025 In Decolonial Environmentalisms David V zquez provides material strategies for understanding how Latinx environmental thinking over the past three decades interrogates environmental harm and the

ways racial capitalism the idea that racism is a structuring logic of capitalism and colonialism are embedded in some forms of mainstream environmentalism V zquez critiques the ways that dialogues on environmental degradation have frequently ignored or minimally engaged with Latinx thought and cultural works on these issues As he points out and we frequently see now with climate change environmental damage does not affect everyone equally He argues that most ecocriticism when it does engage with Latinx work tends to draw from the same few sources again and again and often misreads their intentions Decolonial Environmentalisms considers multiple genres and forms novels films visual art and short stories created by authors from multiple ethnic communities Chicanx Puerto Rican Dominican Cuban American Peruvian and Central American into this conversation This approach makes it possible to shape a more nuanced account of how Latinxs from multiple racial class gender sexual and other identity positions think about and represent environmental ideas By doing so he asks what do Latinx environmental representations do How do they convey their imaginaries And especially how do Latinx authors and artists imagine a more just and equitable material outcome for the characters and situations they depict

Resurrection Machines Kyle Weyburne, 2023-07-13 Pyramids had a specific function and this book endeavours to detail exactly how and when they operated Pharaoh Khufu built what probably stands as the greatest ever construction that humans have produced given the tech constraints of the time the Great pyramid Its accuracy and size are just awe inspiring it was the tallest building in the World until the Cathedrals of Europe arrived on the scene According to ancient historians though Khufu was never buried there and when the Arabs first broke in to the upper chambers in 820AD they found the sarcophagus empty It had been ceremonially sealed without the king inside Are we expected to believe that they built the World s greatest ever construction as a tomb then sealed it forever but without the body of the king Isn t that a little odd The reality is it was meant for something much greater than his tomb What purpose does such a grand resting place for your body really fulfil It appeases the ego of the living king but thereafter it achieves nothing A hole in the ground can preserve the body just as well and in fact it probably has for that s where most believe Khufu was buried in an as yet undiscovered shaft tomb Very unceremonious for someone who had such a magnificent structure built Khufu s father was King Snefru he built the World s two tallest buildings at the time We could reason that one was to be his tomb but then what was the other one for The forgotten story of the pyramids is that they were principally built for the king s Heb Sed festival the most important event in his lifetime should he live long enough to perform it He had to wait 30 years before he could participate in this magical ceremony so he spent 20 odd years building a structure that was vital for its success After 30 years at the helm the king was supposed to be ritually killed Heb Sed enabled him to avoid this dire fate His reign would be extended if he passed the rigorous tests involved in the ceremonies but not only that he would also become a living incarnation of the Sun god This ensured that he would live on for all eternity Pyramids weren t built for vanity instead they were vital mechanisms for achieving these ends and so every king in the Old Kingdom constructed a pyramid to facilitate his immortality This is the
