Klein, 2015-11-25 Controversy rages on about God's choosing people for salvation Are only the few elect Rather than typically beginning with the preconceptions of systematic theologies Dr William Klein takes up this question by

searching for a biblical theology of election He surveys the OT contexts of God's choosing individuals prophets priests kings to serve divine purposes and considers God's election of the nation of Israel as his special people This OT study proposes that God's election is both individual and corporate but not always determinative Individuals entered the people of God by birth but not all the people found salvation Faith in Yahweh was required This book traces these elective understandings through the intertestamental literature identifying continuities and shifts The bulk of the study and the heart of the argument focus on the New Testament Klein identifies concepts of election and relationships between writers in the gospels the Lucan material Paul's writings and the rest The new covenant God choosing the church in Christ emphasizes election as corporate while the individual election of Jesus disciples and of Paul raises the question whether such chosenness is necessarily salvific In closing Klein discusses the most engaging and divisive questions around God's election and offers a real challenge to today's church
