Iverson, 1994-11-24 This volume presents a selection of the best papers from the 21st Annual University of Wisconsin Milwaukee Linguistics Symposium Researchers from linguistics psychology computer science and philosophy using many different methods and focusing on many different facts of language addressed the question of the existence of linguistic rules Are such rules best seen as convenient tools for the description of languages or are rules actually invoked by individual language users Perhaps the most serious challenge to date to the linguistic rule is the development of connectionist architecture Indeed these systems must be viewed as a serious challenge to the foundations of all of contemporary linguistics Four broad themes emerged from the Milwaukee conference
