The sixth edition has been revised to cover recent changes to UK practice and standards in health safety employment and environmental legislation. It also incorporates EU directives and references to harmonised and international standards. Reflecting the importance of the roles of directors and managers in health and safety, new chapters cover the management of risk, emphasising the need for a sound organisational structure to achieve effective risk management. Developments in the behavioural approach to risk management and current thinking on the development of an international standard on safety management are also covered. Quality of the environment is rapidly becoming part of the safety manager's responsibilities both in the workplace and in the context of global pollution. A completely new part consisting of five chapters has been added dealing solely with environmental issues including ISO 14001. The increasingly important role of ergonomics in health and safety is reflected in a new chapter on Applied Ergonomics dealing with the subject pragmatically that will allow the manager and practitioner to design process and operations that are within the limits of the human body. The effects of stress, an emerging concern in health and safety, are covered in various chapters.

Fluorinated Coatings and Finishes Handbook Laurence W. McKeen, 2015-10-11 *Fluorinated Coatings and Finishes Handbook* The Definitive User's Guide. Second Edition addresses important frequently posed questions by end user, design engineers, coaters and coatings suppliers on fluorinated coatings and finishes, thus enabling them to achieve superior product qualities and shorter product and process development times. The book provides broad coverage of these fluorinated polymer coatings, including the best known PTFE (polytetrafluoroethylene), first trademarked as Teflon and ePTFE (GoreTex). Their inherent qualities of low surface tension, non-stick, low friction, high melting point and chemical inertness make fluoropolymer coatings

widely desirable across thousands of industrial and consumer applications but these properties also make it difficult to convert fluoropolymers to coatings that have sufficient adhesion to the substrate to be protected In this book readers learn how fluoropolymer coatings are used and made about their pigments and fillers binders dispersion processes additives and solvents The book includes substrate preparation coating properties baking and curing processes performance tests applications and health and safety Provides a practical handbook that covers the theory and practice of fluorinated coatings including the structure and properties of binders and how to get a non stick coating to stick to the substrate Covers liquid and power fluorocoatings their applications methods curing and baking processes and their commercial end uses Presents detailed discussions of testing methods related to fluorocoatings common coating defects how they form how to eliminate them and the health and safety aspects of using and applying fluorocoatings Includes substrate preparation coating properties baking and curing processes performance tests applications and health and safety
