Inclusion Steven Epstein, 2008-09-15 With Inclusion Steven Epstein argues that strategies to achieve diversity in medical research mask deeper problems ones that might require a different approach and different solutions Formal concern with this issue Epstein shows is a fairly recent phenomenon Until the mid 1980s scientists often studied groups of white middle aged men and assumed that conclusions drawn from studying them would apply to the rest of the population But struggles involving advocacy groups experts and Congress led to reforms that forced researchers to diversify the population from which they drew for clinical research While the prominence of these inclusive practices has offered hope to traditionally underserved groups Epstein argues that it has drawn attention away from the tremendous inequalities in health that are rooted not in biology but in society Epstein's use of theory to demonstrate how public policies in the health profession are shaped makes this book relevant for many academic

disciplines Highly recommended Choice A masterful comprehensive overview of a wide terrain Troy Duster Biosocieties  
Routledge Handbook of Art, Science, and Technology Studies Hannah Rogers, Megan Halpern, Dehlia Hannah, Kathryn de Ridder-Vignone, 2021-12-22 Art and science work is experiencing a dramatic rise coincident with burgeoning Science and Technology Studies STS interest in this area Science has played the role of muse for the arts inspiring imaginative reconfigurations of scientific themes and exploring their cultural resonance Conversely the arts are often deployed in the service of science communication illustration and popularization STS scholars have sought to resist the instrumentalization of the arts by the sciences emphasizing studies of theories and practices across disciplines and the distinctive and complementary contributions of each The manifestation of this commonality of creative and epistemic practices is the emergence of Art Science and Technology Studies ASTS as the interdisciplinary exploration of art science This handbook defines the modes practices crucial literature and research interests of this emerging field It explores the questions methodologies and theoretical implications of scholarship and practice that arise at the intersection of art and STS Further ASTS demonstrates how the arts are intervening in STS Drawing on methods and concepts derived from STS and allied fields including visual studies performance studies design studies science communication and aesthetics and the knowledge of practicing artists and curators ASTS is predicated on the capacity to see both art and science as constructions of human knowledge making Accordingly it posits a new analytical vernacular enabling new ways of seeing understanding and thinking critically about the world This handbook provides scholars and practitioners already familiar with the themes and tensions of art science with a means of connecting across disciplines It proposes organizing principles for thinking about art science across the sciences social sciences humanities and arts Encounters with art and science become meaningful in relation to practices and materials manifest as perceptual habits background knowledge and cultural norms As the chapters in this handbook demonstrate a variety of STS tools can be brought to bear on art science so that systematic research can be conducted on this unique set of knowledge making practices **The Great Adaptation** Guilherme Pratti, 2024-12-09 This

timely book puts forward a novel understanding of the ongoing relationship between the law regulation technology and science with the goal of helping to mitigate and adapt to the severe environmental and societal impacts of climate change

*Making 20th Century Science* Stephen G. Brush, 2015-04-13 Historically the scientific method has been said to require proposing a theory making a prediction of something not already known testing the prediction and giving up the theory or substantially changing it if it fails the test A theory that leads to several successful predictions is more likely to be accepted than one that only explains what is already known but not understood This process is widely treated as the conventional method of achieving scientific progress and was used throughout the twentieth century as the standard route to discovery and experimentation But does science really work this way In *Making 20th Century Science* Stephen G Brush discusses this question as it relates to the development of science throughout the last century Answering this question requires both a

philosophically and historically scientific approach and Brush blends the two in order to take a close look at how scientific methodology has developed Several cases from the history of modern physical and biological science are examined including Mendeleev's Periodic Law Kekule's structure for benzene the light quantum hypothesis quantum mechanics chromosome theory and natural selection In general it is found that theories are accepted for a combination of successful predictions and better explanations of old facts Making 20th Century Science is a large scale historical look at the implementation of the scientific method and how scientific theories come to be accepted

Veblen Charles Camic, 2020-11-30 Thorstein Veblen's analysis of America's parasitic upper class which plunders its wealth from productive workers is widely attributed to his outsider status But Charles Camic shows that Veblen's ideas did not derive from social marginality Veblen was a professional economist whose fierce social critique was the work of an academic insider

*Interdisciplinarity* Andrew Barry, Georgina Born, 2013-06-26 The idea that research should become more interdisciplinary has become commonplace According to influential commentators the unprecedented complexity of problems such as climate change or the social implications of biomedicine demand interdisciplinary efforts integrating both the social and natural sciences In this context the question of whether a given knowledge practice is too disciplinary or interdisciplinary or not disciplinary enough has become an issue for governments research policy makers and funding agencies Interdisciplinarity in short has emerged as a key political preoccupation yet the term tends to obscure as much as illuminate the diverse practices gathered under its rubric This volume offers a new approach to theorising interdisciplinarity showing how the boundaries between the social and natural sciences are being reconfigured It examines the current preoccupation with interdisciplinarity notably the ascendance of a particular discourse in which it is associated with a transformation in the relations between science technology and society Contributors address attempts to promote collaboration between on the one hand the natural sciences and engineering and on the other the social sciences arts and humanities From ethnography in the IT industry to science and technology studies environmental science to medical humanities cybernetics to art science the collection interrogates how interdisciplinarity has come to be seen as a solution not only to enhancing relations between science and society but the pursuit of accountability and the need to foster innovation Interdisciplinarity is essential reading for scholars students and policy makers across the social sciences arts and humanities including anthropology geography sociology science and technology studies and cultural studies as well as all those engaged in interdisciplinary research It will have particular relevance for those concerned with the knowledge economy science policy environmental politics applied anthropology ELSI research medical humanities and art science

**Structure, Agency and Biotechnology** Aristeidis Panagiotou, 2017-07-03 Structure Agency and Biotechnology argues for the significance of sociological theory and highlights the insights it can offer to the study of agricultural biotechnology Cautioning against a simplistic reading of the GM controversy as merely a debate of science versus politics Aristeidis Panagiotou suggests that the discussion should be embedded in the wider social political economic

and cultural contexts Structure Agency and Biotechnology assesses the 2012 Rothamsted GM wheat trials and proposes that the tension underlying GM technology should be resolved through sustained dialogue public involvement and broad scientific consensus

**Science Communication** Annette Leßmöllmann, Marcelo Dascal, Thomas Glöning, 2019-12-16 The volume gives a multi perspective overview of scholarly and science communication exploring its diverse functions modalities interactional structures and dynamics in a rapidly changing world In addition it provides a guide to current research approaches and traditions on communication in many disciplines including the humanities technology social and natural sciences and on forms of communication with a wide range of audiences

**Situational Analysis in Practice** Adele E. Clarke, Adele E Clarke, Carrie Friese, Rachel Washburn, 2016-07 Situational Analysis creates analytic maps of social processes and relationships identified using grounded theory Creator of the method award winning sociologist Adele E Clarke and two co editors show how the method can be and has been used in a variety of critical qualitative studies The book Updates the basic concepts and methods of situational analysis a methodology created by Clarke Provides five important case studies of its use in a variety of health and educational settings Offers reflections from the original researchers on the studies and their impact Includes lists of published articles and available websites focused on situational analysis

**Dimensions of Peace and Security** Gustaaf Geeraerts, Natalie Pauwels, Éric Remacle, 2006 The terrorist attacks of September 11th 2001 on the United States provoked a significant shift in thinking about peace and security and much has since been written about new security threats and challenges This collection of essays revisits some of the more traditional concepts of peace and security that remain valid and pertinent today despite having ceded much of the limelight to the major security preoccupations of the current era international terrorism weapons of mass destruction rogue states and related phenomena The book covers numerous salient topics from arms production monitoring and control to disarmament and conversion through to peacekeeping and conflict prevention The contributions differ in scope form and analysis ranging from historical and philosophical to contemporary and political perspectives and approaches to peace and security

Teaching Economic Inequality and Capitalism in Contemporary America Kristin Haltinner, Leontina Hormel, 2018-01-02 This book discusses pedagogical solutions that enable students to see how capitalist processes and economic inequalities intersect and shape our assumptions and behaviours The contributors provide thoughtful reflections on the struggles and opportunities instructors face in teaching about these topics while competing against the invisibility of capitalist forces and prevalent social myths such as anyone who works hard can achieve This book will not only help instructors empower students to recognize economic injustice and its interaction with capitalist organization but also develops and acts on transformative solutions Through analysis of the classed dimensions of the current political economics and cultural climate as well as presenting novel lesson plans and classroom activities this book is of great value for college and university professors
