[Viking Identities](#) Jane F. Kershaw, 2013-02-14 Viking Identities is the first detailed archaeological study of Viking Age Scandinavian style female dress items from England Based on primary archival and archaeological research including the analysis of hundreds of recent metal detector finds it presents evidence for over 500 brooches and pendants worn by women in the late ninth and tenth centuries Jane F Kershaw argues that these finds add an entirely new dimension to the limited existing archaeological evidence for Scandinavian activity in the British Isles and make possible a substantial reassessment of the Viking settlements Kershaw offers an interpretation of the significance of the jewellery in a broader historical context The jewellery highlights locations of settlement not commonly associated with the Vikings In contrast to claims of high levels of cultural assimilation the jewellery suggests that incoming groups maintained a distinct Scandinavian identity which was sometimes appropriated by the indigenous population Kershaw also addresses one of the great unanswered questions in the study of Viking Age

settlements what about the women The interpretation of the jewellery challenges traditional perceptions of Viking conquest as an all male affair and brings into focus a population group which has until now been almost invisible Kershaw describes the objects and explores a number of themes related to their contemporary use including their date distribution and function in costume This body of material unknown 30 years ago is introduced to a public audience for the first time Including many object images and maps the study provides a practical guide to the identification of Scandinavian metalwork

period to the early fifteenth century is the primary concern of this book Hilmo argues that the illustrations have not been sufficiently understood because modern judgments about their artistic merit and fidelity to the literary texts have got in the way of a historical understanding of their function The author here proves that artists took their work seriously because images represented an invisible order of reality that they were familiar with the vernacular poems and that they were innovative in adapting existing iconographies to guide the ethical reading process of their audience To provide a theoretical basis for the understanding of early monuments artefacts and texts she examines patristic opinions on image making supported by the most authoritative modern sources Fresh emphasis is given to the iconic nature of medieval images from the time of the iconoclastic debates of the 8th and 9th centuries to the renewed anxiety of image making at the time of the Lollard attacks on images She offers an important revision of the reading of the Ruthwell Cross which changes radically the interpretation of the Cross as a whole Among the manuscripts examined here are the Caedmon Auchinleck Vernon and Pearl manuscripts Hilmo s thesis is not confined to overtly religious texts and images but deals also with historical writing such as Layamon s Brut and with poetry designed ostensibly for entertainment such as the Canterbury Tales This study convincingly demonstrates how the visual and the verbal interactively manifest the real text of each illustrated literary work The artistic elements place vernacular works within a larger iconographic framework in which human composition is seen to relate to the activities of the divine Author and Artificer Whether iconic or anti iconic in stance images by their nature were a potent means of influencing the way an English author s words accessible in the vernacular were thought about and understood within the context of the theology of the Incarnation that informed them and governed their aesthetic of spiritual function This is the first study to cover the range of illustrated English poems from the Anglo Saxon period to the early 15th century

Archaeological Encounters Margarita Díaz-Andreu, 2012-11-13 This book examines the relationship between British and Spanish archaeology in the light of international geographies of knowledge It looks at the practical aspects of the personal relationships established between British and Spanish prehistoric archaeologists from the 1920s to the 1970s Part I of the book sets the scene It provides some contextual information on the main events in the archaeology of both countries in the period under study It also introduces Professor Luis Pericot the archaeologist whose archive serves as the basis for much of what is discussed throughout the following chapters In Part II of the book an analysis of the correspondence held in the Pericot Archive the Fons Pericot in the Biblioteca de Catalunya is undertaken The examination of the letters exchanged between Spanish and British prehistorians in general and in particular between Luis Pericot and about a dozen major British scholars of his time allows the reconstruction of the nature of the relationships formed between them The analysis has been divided into three chapters corresponding to the three main towns where his correspondents lived for most of their academic careers London Cambridge and Oxford In Part III of the book the information obtained from the correspondence is then complemented and re examined considering three main aspects the production transmission and reception of knowledge This

analysis puts together aspects discussed in Part I of the book with the data gathered from the letters in Part II as well as other information provided by publications including translations and reviews First of all an assessment is made as to whether the geographical context affected the way knowledge of prehistoric archaeology was produced Secondly the mechanisms and networks that allowed the international transmission of both ideas and practices linked to prehistoric archaeology are assessed A third aspect looked into is the reception of knowledge linking this with issues such as academic prestige and authority
