Latelier Brancusi:

Atelier Brancusi Constantin Brancusi, 2004 Le portrait? Les carnet de l'Atelier Brancusi Ann Temkin, Marielle Tabart, 2002-09 '*L'atelier Brancusi*' Jon Wood, 1994 **Brancusi** , 2024-03-20 **The Architecture of Paris** Andrew Ayers, 2004 The author here presents an architectural history of Paris stretching from the 3rd century BC up until the end of the 20th century The Studio Reader Mary Jane Jacob, Michelle Grabner, 2010-06-15 The image of a tortured genius working in near isolation has long dominated our conceptions of the artist's studio. Examples abound: think Jackson Pollock dripping resin on a cicada carcass in his shed in the Hamptons. But times have changed ever since Andy Warhol declared his art space a factory: artists have begun to envision themselves as the leaders of production teams and their sense of what it means to be in the studio has altered just as dramatically as their practices. *The Studio Reader* pulls back the curtain from the art world to reveal the real activities behind artistic production. What does it mean to be in the studio? What is the space of the studio in the artist's practice? How do studios help artists envision their agency and beyond that their own lives? This forward-thinking anthology features an all-star array of contributors ranging from Svetlana Alpers, Bruce Nauman and Robert Storr to Daniel Buren, Carolee Schneemann and Buzz Spector, each of whom locates the studio both spatially and conceptually at the center of an art world that careens across institutions, markets and disciplines. A companion for anyone engaged with the spectacular sites of art at its making, *The Studio Reader* reconsiders this crucial space as an actual way of being that illuminates our understanding of both artists and the world they inhabit. *Reshaping Museum Space* Suzanne Macleod, 2005 *Reshaping Museum Space* pulls together the views of an international group of museum professionals: architects, designers and academics. It highlights the complexity, significance and malleability of museum space and provides reflections upon recent developments in museum architecture and exhibition design. Various chapters concentrate on the process of architectural and spatial reshaping and the problems of navigating the often contradictory agendas and aspirations of the broad range of professionals and stakeholders involved in any new project. Contributors review recent new build expansion and exhibition projects, questioning the types of museum space required at the beginning of the twenty-first century and highlighting a range of possibilities for creative museum design. Essential reading for anyone involved in creating, designing and project managing the development of museum exhibits and vital reading for students of the discipline.

Posthumous Art, Law and the Art Market Sharon Hecker, Peter J. Karol, 2022-04-28 This book takes an interdisciplinary, transnational and cross-cultural approach to reflect on, critically examine and challenge the surprisingly robust practice of making art after death in an artist's name through the lenses of scholars from the fields of art history, economics and law, as well as practicing artists. Works of art conceived as multiples such as sculptures, etchings, prints, photographs and conceptual art can be and often are remade from original models and plans long after the artist has passed. Recent sales have suggested a growing market embrace of posthumous works contemporaneous with questioning on the part

of art history Legal norms seem unready for this surge in posthumous production and are beset by conflict across jurisdictions Non Western approaches to posthumous art from Chinese emulations of non living artists to Native American performances take into account rituals of generational passage at odds with contemporary market driven approaches The book will be of interest to scholars working in art history the art market art law art management museum studies and economics

Is It Ours? Martha Buskirk, 2021-04-13 If you have tattoos who owns the rights to the imagery inked on your body What about the photos you just shared on Instagram And what if you are an artist responding to the surrounding landscape of preexisting cultural forms Most people go about their days without thinking much about intellectual property but it shapes all aspects of contemporary life It is a constantly moving target articulated through a web of laws that are different from country to country sometimes contradictory often contested Some protections are necessary not only to benefit creators and inventors but also to support activities that contribute to the culture at large yet overly broad ownership rights stifle innovation *Is It Ours* takes a fresh look at issues of artistic expression and creative protection as they relate to contemporary law Exploring intellectual property particularly copyrights Martha Buskirk draws connections between current challenges and early debates about how something intangible could be defined as property She examines bonds between artist and artwork including the ways that artists or their heirs retain control over time The text engages with fundamental questions about the interplay between authorship and ownership and the degree to which all expressions and inventions develop in response to innovations by others Most importantly this book argues for the necessity of sustaining a vital cultural commons

Sculpture and Touch Peter Dent, 2017-07-05 Since the Renaissance at least the medium of sculpture has been associated explicitly with the sense of touch Sculptors philosophers and art historians have all linked the two often in strikingly different ways In spite of this long running interest in touch and tactility it is vision and visuality which have tended to dominate art historical research in recent decades This book introduces a new impetus to the discussion of the relationship between touch and sculpture by setting up a dialogue between art historians and individuals with fresh insights who are working in disciplines beyond art history The collection brings together a rich and diverse set of approaches with essays tackling subjects from prehistoric figurines to the work of contemporary artists from pre modern ideas about the physiology of touch to tactile interaction in the museum environment and from the phenomenology of touch in recent philosophy to the experimental findings of scientific study It is the first volume on this subject to take such a broad approach and as such seeks to set the agenda for future research and collaboration in this area
