Latin America Stefan A. Halper, John R. Sterling, 1972 *Latin America* Stefan A. Halper, 1975-03 **Latin America: the Dynamics of Social Change** Stefan A. Halper, John R. Sterling, Gino Germani, 1972-01-01 The Dynamics of Social Change in Latin America Henry Veltmeyer, J. Petras, 1999-11-10 This study examines fundamental theoretical and conceptual issues of social change in Latin America in the context of detailed empirical analysis It challenges the major assumptions and propositions that underlie globalization theory reworking and fine tuning the concepts of imperialism and social class as relevant to understanding the new world order The study centers on the structural features of Latin America and the state policies reconcentrating power in the capitalist class at the expense of labor The study surveys the contradictory tendencies of concentrated wealth and power and the emergence of new socio political movements and alternative development strategies to the dominant paradigm Latin America: the Dynamics of Social Change Stefan A. Halper, 1972 *The Palgrave Handbook of Social Movements, Revolution, and Social Transformation* Berch Berberoglu, 2018-09-26 This handbook on social movements revolution and social transformation analyzes people s struggles to bring about social change in the age of globalization It examines the origins nature dynamics and challenges of such movements as they aim to change dominant social economic and political institutions and structures across the globe Departing from a theoretical introduction that explores major classical and contemporary theories of social movements and transformation the contributions collected here use a class based approach to examine key cases of social movements rebellions and revolutions worldwide from the turn of the twentieth to the early twenty first centuries Against this wide ranging background the handbook concludes by charting the varied and competing future developments and trajectories of social movements revolutions and social transformations Latin America in the Vortex of Social Change Henry Veltmeyer, James Petras, 2019-04-10 This book explores the dynamics of the recent progressive cycle in Latin American politics associated with a red and pink tide of regime change With this cycle of centre left regimes oriented towards an alternative post neoliberal form of development now coming to an end coinciding with the end of a primary commodities boom the demand for natural resources exported in primary form on the world market the authors seek to explore the dynamics of the transition from a progressive cycle of regimes oriented towards the search for a more inclusive form of development towards what appears to be another swing in the pendulum of electoral politics towards the far right and a return to neoliberal orthodoxy Within the vortex of forces of change pushing towards both the Left and the Right Latin America lies at the centre of ongoing heated theoretical and political debates as to how to bring about a more inclusive and sustainable form of post neoliberal and post capitalist development Latin America in the Vortex of Social Change crucially aims to cut through these debates and explore the dynamics of the forces of change at work in the current conjuncture of capitalist development With reference to a theoretical framework based on the interaction of three different forms of capitalism capitalism as usual extractive capitalism narco

capitalism the authors proceed to an analysis of the development and resistance dynamics of the development process that is unfolding on the Latin American political landscape The book will appeal to scholars of political sociology and political theory with an interest in the political economy of development and Latin American affairs Social Movements and State Power James Petras, Henry Veltmeyer, 2005-07-20 The 2003 electoral victory of Lucio Gutierrez in Ecuador was met with the same sense of optimism that greeted the election of Ignacio Lula da Silva in Brazil and Hugo Chavez in Venezuela Gutierrez's victory was viewed as a major advance for the country in its 500 year long struggle for freedom and democracy In Bolivia Evo Morales similarly came within an electoral whisker of achieving state power in 2002 and in 2003 Nestor Kirchner became President of Argentina Many journalists academics and politicians speak of a left turn in Latin America characterizing these regimes as center left They came to power on the promise of delivering a fundamental change of direction that would steer their countries away from neo liberal economic policies and towards greater social equity Their success awakened major hopes on the Left for a new dawn in Latin American politics This book challenges these assumptions It critically examines their agreements with the IMF their social and economic policies and the economic ties of leading policy makers as well as the beneficiaries and losers under these regimes Latin America is unique in that it has experienced two decades of popular resistance to neo liberal policies each of the four countries examined here has a rich history of diverse indigenous and working class movements coming together to promote radical political change The authors examine the political dynamics between the state and its agenda and the strategy of mass mobilisation taken by the mass movements They explore the intensifying conflicts between the movements and their former allies in the state *Peasants, Capitalism, and Imperialism in an Age of Politico-Ecological Crisis* Mark Tilzey, Fraser Sugden, 2023-09-27 This book utilises a new theoretical approach to understand the dynamics of the peasantry and peasant resistance in relation to capitalism state class and imperialism in the global South In this companion volume to *Peasants Capitalism and the Work* of Eric R Wolf the authors further develop their thinking on agrarian transitions to capitalism the development of imperialism and the place of the peasantry in these dynamics with special reference to the global South in an era of politico ecological crisis Focusing on the political role of the peasantry in contested transitions to capitalism and to modes of production outside of and beyond capitalism the book contends that an understanding of these dynamics requires an analysis of class struggle and of the resources material and discursive that different classes can bring to bear on this struggle The book focuses on the rise of capitalism in the global South within the context of imperial subordination to the global North and the place of the peasantry in shaping and resisting these dynamics The book presents case studies of contested transitions to agrarian capitalism in Bolivia Ecuador Guatemala Mexico Peru and South Asia It also examines the case of transition to a post capitalist mode of production in Cuba The book concludes with an assessment of the nature of capitalism and imperialism within the context of the contemporary politico ecological crisis and the potential role of the peasantry as agent of emancipatory change towards social and environmental

sustainability This book will be of great interest to students and researchers in the areas of peasant studies rural politics agrarian studies development and political ecology Central America's Forgotten History Aviva Chomsky, 2021-04-20 Restores the region's fraught history of repression and resistance to popular consciousness and connects the United States interventions and influence to the influx of refugees seeking asylum today At the center of the current immigration debate are migrants from Central America fleeing poverty corruption and violence in search of refuge in the United States In *Central America's Forgotten History* Aviva Chomsky answers the urgent question How did we get here Centering the centuries long intertwined histories of US expansion and Indigenous and Central American struggles against inequality and oppression Chomsky highlights the pernicious cycle of colonial and neocolonial development policies that promote cultures of violence and forgetting without any accountability or restorative reparations Focusing on the valiant struggles for social and economic justice in Guatemala Nicaragua El Salvador and Honduras Chomsky restores these vivid and gripping events to popular consciousness Tracing the roots of displacement and migration in Central America to the Spanish conquest and bringing us to the present day she concludes that the more immediate roots of migration from El Salvador Guatemala and Honduras lie in the wars and in the US interventions of the 1980s and the peace accords of the 1990s that set the stage for neoliberalism in Central America Chomsky also examines how and why histories and memories are suppressed and the impact of losing historical memory Only by erasing history can we claim that Central American countries created their own poverty and violence while the United States enjoyment and profit from their bananas coffee mining clothing and export of arms are simply unrelated curiosities *The Global Capitalist Crisis and Its Aftermath* Berch Berberoglu, 2016-12-05 Written by a team of experts on the contemporary global capitalist political economy who are able to shed light on the inner workings of global capitalism and the capitalist globalization process that has led to the growth and development of capitalism from the national to the global level this groundbreaking volume provides critical analyses of the causes and consequences of the Great Recession of 2008 2009 Through a careful examination of the origin development and aftermath of the catastrophic economic crisis from which the world is still trying to recover editor Berch Berberoglu and his colleagues demonstrate that those most responsible for the economic collapse are the ones least affected by its devastating impact felt most severely by working people around the world Ultimately this book argues that it is only through the systematic restructuring of the world economy by the working class that society will be able to prevent the boom and bust cycle of global capitalist crises and usher in a more egalitarian socialist economy and society **Post-Stabilization Politics in Latin America** Carol Wise, Riordan Roett, 2003-07-28 Over the last twenty years Latin America has seen a definitive movement toward civilian rule Significant trade fiscal and monetary reforms have accompanied this shift exposing previously state led economies to the forces of the market Despite persistent economic and political hardships the combination of civilian regimes and market based strategies has proved to be remarkably resilient and still dominates the region This book focuses on the effects of

market reforms on domestic politics in Latin America While considering civilian rule as a constant the book examines and compares domestic political responses in six countries that embraced similar packages of reforms in the 1980s Argentina Brazil Chile Mexico Peru and Venezuela The contributors focus on how ambitious measures such as liberalization privatization and deregulation yielded mixed results in these countries and in doing so they identify three main patterns of political economic adjustment In Argentina and Chile the implementation of market reforms has gone hand in hand with increasingly competitive politics In Brazil and Mexico market reforms helped to catalyze transitions from entrenched authoritarian rule Finally in Peru and Venezuela traditional political systems have collapsed and civilian rule has been repeatedly challenged The contributors include Carol Wise University of Southern California Karen L Remmer Duke University Carol Graham Brookings Institution Stefano Pettinato United Nations Development Programme Consuelo Cruz Tufts University Juan E Corradi New York University Delia M Boylan Chicago Public Radio Riordan Roett Johns Hopkins University Mart n Tanaka Institute for Peruvian Studies Lima and Kenneth M Roberts University of New Mexico

The Cuban Revolution as Socialist Human Development Henry Veltmeyer, Mark Rushton, 2011-11-11 The book argues that the Cuban Revolution should be understood as a model of socialist human development Several particular features of this model were critical to the survival of the Cuban Revolution under conditions of neoliberal globalization

Revolution and State in Modern Mexico Adam David Morton, 2013-10-04 Now in an updated edition this groundbreaking study develops a new approach to understanding the formation of the postrevolutionary state in Mexico In a shift away from dominant interpretations Adam David Morton considers the construction of the revolution and the modern Mexican state through a fresh analysis of the Mexican Revolution the era of import substitution industrialization and neoliberalism Throughout the author makes interdisciplinary links among geography political economy postcolonialism and Latin American studies in order to provide a new framework for analyzing the development of state power in Mexico He also explores key processes in the contestation of the modern state specifically

through studies of the role of intellectuals democratization and democratic transition and spaces of resistance As Morton argues all these themes can only be fully understood through the lens of uneven development in Latin America Centrally the book shows how the history of modern state formation and uneven development in Mexico is best understood as a form of passive revolution referring to the ongoing class strategies that have shaped relations between state and civil society As such Morton makes an important interdisciplinary contribution to debates on state formation relevant to Mexican studies postcolonial and development studies historical sociology and international political economy by revitalizing the debate on the uneven and combined character of development in Mexico and throughout Latin America In so doing he convincingly contends that uneven development can once again become a tool for radical political economy analysis in and beyond the region A substantive new epilogue engages the main theoretical debates that have emerged since the book was first published while also exploring the dominant geographies of power and resistance that are shaping state space in Mexico in the twenty first century And now a Spanish edition *Revoluci n y Estado en M xico moderno M xico D F Siglo XXI* 2017 is available as well Click here to see the book trailer [SDG18 Communication for All, Volume 2](#) Jan Servaes,Muhammad Jameel Yusha'u,2023-03-24 The 2030 agenda for development or what is known as the Sustainable Development Goals SDGs is perhaps the most ambitious agenda collectively agreed upon by 193 countries in human history Yet the framers of the 2030 agenda for development forgot to dedicate one goal focused on the role of communication in achieving the SDGs Such oversight has attracted the attention of media and communication scholars alike journalists and policymakers who understand that it is nearly impossible to achieve the SDGs without the articulation and embrace of the role of communication in development Volume 2 provides in depth and specific explorations into regional perspectives concerning communication and the SDGs with research on a rich array of sources including Latin America Africa Australia as well as special cases relating to timely studies such as social media COVID 19 marginalized voices and women s equality *The Oxford Handbook of Industrial Hubs and Economic Development* Arkebe Oqubay,Justin Yifu Lin,2020-07-23 Industrialization supported by industrial hubs has been widely associated with structural transformation and catch up But while the direct economic benefits of industrial hubs are significant their value lies first and foremost in their contribution as incubators of industrialization production and technological capability and innovation The Oxford Handbook of Industrial Hubs and Economic Development adopts an interdisciplinary approach to examine the conceptual underpinnings review empirical evidence of regions and economies and extract pertinent lessons for policy reasearchers and practitioners on the key drivers of success and failure for industrial hubs This Handbook illustrates the diverse and complex nature of industrial hubs and shows how they promote industrialization economic structural transformation and technological catch up It explores the implications of emerging issues and trends such as environmental protection and sustainability technological advancement shifts in the global economy and urbanization
