Biopolitics and Structure in Legal Education Luca Siliquini-Cinelli, Thomas Giddens, 2023-06-30 Taking up the

study of legal education in distinctly biopolitical terms this book provides a critical and political analysis of structure in the law school Legal education concerns the complex pathways by which an individual becomes a lawyer making the journey from lay person to expert from student to practitioner To pose the idea of a biopolitics of legal education is not only to recognise the tensions surrounding this journey but also to recognise that legal education is a key site in which the subject engages and is engaged by a particular structure and here the particular structure of the law school This book explores that structure by addressing the characteristics of the biopolitical orders engaged in legal education including understanding the lawyer as a commodity unpicking the force relations in legal education examining the ways codes of conduct in higher education impact academic freedom as well as putting the distinctly Western structures of legal learning within a wider context Assembling original field defining essays by both leading international scholars and emerging researchers it constitutes an indispensable resource in legal education research and scholarship that will appeal to legal academics everywhere

Critical Legal Education as a Subversive Activity Helen Gibbon, Ben Golder, Lucas Lixinski, Marina Nehme, Prue Vines, 2015-10-16 In an age when everyone aspires to teach critical thinking skills in the classroom what does it mean to be a subversive law teacher Who or what might a subversive law teacher seek to subvert the authority of the law the university their own authority as teachers perhaps Are law students ripe for subversion agents of or impediments to subversion Do they learn to ask critical questions Responding to the provocation in the classic book *Teaching as a Subversive Activity* by Postman and Weingartner the idea that teaching could or even should be subversive still holds true today and its premise is particularly relevant in the context of legal education We therefore draw on this classic book to discuss in the present volume the consideration of research into legal education as lifetime learning as creating meaning as transformative and as developing world changing thinking within the legal context The volume offers research into classroom experiences and theoretical and historical interrogations of what it means to teach law subversively Primarily aimed at legal educators and doctoral students in law planning careers as academics its insights speak directly to tensions in higher education more broadly

American Legal Education Abroad Susan Bartie, David Sandomierski, 2021-07-06 A critical history of the Americanization of legal education in fourteen countries. The second half of the twentieth century witnessed the export of American power both hard and soft throughout the world. What role did US cultural and economic imperialism play in legal education? *American Legal Education Abroad* offers an unprecedented and surprising picture of the history of legal education in fourteen countries beyond the United States. Each study in this book represents a critical history of the Americanization of legal education, reexamining prevailing narratives of exportation, transplantation and imperialism. Collectively these studies challenge the conventional wisdom that American ideas and practices have dominated globally. Editors Susan Bartie and David Sandomierski and their contributors suggest that to understand legal education and to respond thoughtfully to the mounting present day challenges it is essential to look beyond a particular region and consider not only the ideas behind legal education but also the broader historical, political and cultural factors that have shaped them. *American Legal Education Abroad* begins with an important foundational history by leading Harvard Law School historian Bruce Kimball who explains the factors that created a transportable American legal model and the book concludes with reflections from two prominent American law professors Susan Carle and Bob Gordon whose observations on recent disruptions within US law schools suggest that their influence within the global order of legal education may soon fall into further decline. This book should be considered an invaluable resource for anyone in the field of law.

The Ethics Project in Legal Education Michael Robertson, Lillian Corbin, Kieran Tranter, Francesca Bartlett, 2010-10-06 This book discusses the teaching of legal ethics, arguing that the current formal rules governing lawyers are inadequate as true engagement with ethical issues requires lawyers to exercise judgment and therefore there is a need to rethink the aims, scope and methodology of legal ethics education. The volume presents the views of a number of internationally renowned legal ethicists including Brent Cotter and David Chavkin exploring and questioning the teaching of legal ethics. The contributions examine legal ethics teaching in a range of jurisdictions including the USA, Canada, Australia, South Africa and Hong Kong. A number of contributors discuss design issues that cover a broad field of methods including simulations, the pervasive use of problem solving exercises and real world experiences with some of the essays revealing their empirical findings on the effectiveness of these methods and particularly as they affect the students.

Legal Education in Asia Andrew J. Harding, Jiayang Hu, Maartje de Visser, 2017-11-20 Legal education systems like legal systems themselves were framed across Asia without exception according to foreign models. These reflect the vestiges of colonialism and can be said to amount to imitating the style and purposes of legal education typical in Western and relatively pure common law and

civilian systems Today however we see Asian legal education coming into its own and beginning to accept responsibility for designing curricula and approaches that fit the region's particular needs This book explores how conventional transplanted approaches as regards program design as well as modes of teaching are or are on the cusp of being reimagined and discerns emerging home grown traces of innovation replacing imitation in countries and universities across East Asia

Power, Legal

Education, and Law School Cultures Meera Deo,Mindie Lazarus-Black,Elizabeth Mertz,2019-10-10 There is a myth that lingers around legal education in many democracies That myth would have us believe that law students are admitted and then succeed based on raw merit and that law schools are neutral settings in which professors also selected and promoted based on merit use their expertise to train those students to become lawyers Based on original empirical research this book investigates this myth from myriad perspectives diverse settings and in different nations revealing that hierarchies of power and cultural norms shape and maintain inequities in legal education Embedded within law school cultures are assumptions that also stymie efforts at reform The book examines hidden pedagogical messages showing how presumptions about theory s relation to practice are refracted through the obfuscating lens of curricula The contributors also tackle questions of class and market as they affect law training Finally this collection examines how structural barriers replicate injustice even within institutions representing themselves as democratic and open revealing common dynamics across cultural and institutional forms The chapters speak to similar issues and to one another about the influence of context images of law and lawyers the political economy of legal education and the agency of students and faculty
