Grapes Of Conflict:

Grapes of Conflict Sydney D. Smith, 1987 *Farm Workers and the Churches* Alan J. Watt, 2010-02-23 In the mid 1960s the charismatic Cesar Chavez led members of California's La Causa movement in boycotting the grape harvest and melon pickers in South Texas called a strike against growers contesting unfair labor and wage practices in both states In *Farm Workers and the Churches* Alan J Watt shows how the religious and social contexts of the farm workers their leaders and the larger society helped or hindered these two pivotal actions Watt explores the ways in which liberal expressions of Northern Protestantism transplanted to California and combined with the pro labor wing of the Catholic Church and the heritage of Mexican popular piety provided a fertile field for the growth of broad support for Chavez and his organizing efforts Eventually La Causa was able to achieve collective bargaining victories including a historic labor contract between California agribusiness and farm workers The movement did not fare as well in Texas where the combination of a locally weak union leadership a more conservative Southern Protestant ethos and the strikebreaking measures of the Texas Rangers all boded ill However a general Chicano movement ultimately took permanent root in the state because of the workers struggle Watt offers a careful examination of the complex interactions among religious traditions social heritage and ethnicity as these factors affected the course and outcomes of these two pioneering campaigns undertaken by La Causa Facilitating Deep Learning Julian Hermida, 2014-07-01 Deep learning is a committed approach to learning It is a process of constructing and interpreting new knowledge in light of prior cognitive structures and experiences which can be applied in new unfamiliar contexts Deep learning produces learning that lasts a lifetime and it results in better quality learning and profound understanding In contrast surface learning involves a dispassionate approach to learning The surface learner is not concerned with understanding Information acquired is usually lost after examinations and there is no profound understanding or knowledge construction Research studies show that most university and college students today take a surface approach to learning The purpose of this book is to show readers how to create a learning environment that promotes deep learning in their classes The book will do so by providing readers with the theoretical and pedagogical tools needed to Understand the notion of deep learning Design and implement courses that encourage students to take a deep approach to learning Design engaging and innovative teaching and learning activities that encourage students to use higher order cognitive skills to construct knowledge and negotiate meaning Implement assessment tools aimed at facilitating the deep learning process Support international and other nontraditional students to construct learning deeply The book begins with an examination of the big picture the institutional constraints that hinder a culture of deep learning From there it deconstructs the concept of deep learning and it examines every element of the deep learning process It also discusses the factors that contribute to produce a deep learning environment The rest of the chapters are about how to facilitate deep learning The book examines every component of the teaching and learning system goals performances and evaluation It

discusses strategies and methods that teachers can adopt to help students learn how to read and write in their disciplines in a deep way The book also discusses the notion of inclusive deep learning environments which focus on engaging nontraditional students Theories of Human Learning Guy R. Sander, 2013-04-23 Analogy is the core of all thinking This is the simple but unorthodox premise that Pulitzer Prize winning author Douglas Hofstadter and French psychologist Emmanuel Sander defend in their new work Hofstadter has been grappling with the mysteries of human thought for over thirty years Now with his trademark wit and special talent for making complex ideas vivid he has partnered with Sander to put forth a highly novel perspective on cognition We are constantly faced with a swirling and intermingling multitude of ill defined situations Our brain's job is to try to make sense of this unpredictable swarming chaos of stimuli How does it do so The ceaseless hail of input triggers analogies galore helping us to pinpoint the essence of what is going on Often this means the spontaneous evocation of words sometimes idioms sometimes the triggering of nameless long buried memories Why did two year old Camille proudly exclaim I undressed the banana Why do people who hear a story often blurt out Exactly the same thing happened to me when it was a completely different event How do we recognize an aggressive driver from a split second glance in our rearview mirror What in a friend's remark triggers the offhand reply That's just sour grapes What did Albert Einstein see that made him suspect that light consists of particles when a century of research had driven the final nail in the coffin of that long dead idea The answer to all these questions of course is analogy making the meat and potatoes the heart and soul the fuel and fire the gist and the crux the lifeblood and the wellsprings of thought Analogy making far from happening at rare intervals occurs at all moments defining thinking from top to toe from the tiniest and most fleeting thoughts to the most creative scientific insights Like G Escher Bach before it Surfaces and Essences will profoundly enrich our understanding of our own minds By plunging the reader into an extraordinary variety of colorful situations involving language thought and memory by revealing bit by bit the constantly churning cognitive mechanisms normally completely hidden from view and by discovering in them one central invariant core the incessant unconscious quest for strong analogical links to past experiences this book puts forth a radical and deeply surprising new vision of the act of thinking Reimagining the Immigrant B.
