*Gravity, Gradiometry, and Gravimetry* Reiner Rummel, Roger G. Hipkin, 2012-12-06 A General Meeting of the IAG was held in Edinburgh Scotland to commemorate its 125th Anniversary The Edinburgh meeting which attracted 360 scientific delegates and 80 accompanying persons from 44 countries was hosted jointly by the Royal Society the Royal Society of Edinburgh and the University of Edinburgh The scientific part of the program which was held in the Appleton Tower of the University included the following five symposia Symposium 101 Global and Regional Geodynamics Symposium 102 GPS and Other Radio Tracking Systems Symposium 103 Gravity Gradiometry and Gravimetry Symposium 104 Sea Surface Topography the Geoid and Vertical Datums Symposium 105 Earth Rotation and Coordinate Reference Frames All together there were 90 oral and 160 poster presentations The program was arranged to prevent any overlapping of oral presentations and thus enabled delegates to participate in all the sessions The 125th Anniversary Ceremony took place on August 7 1989 in the noble surroundings of the McEwan Hall where 53 years earlier Vening Meinesz gave one of the two Union Lectures at the 6th General Assembly of the IUGG The Ceremony commenced with welcome speeches by the British hosts An interlude of traditional Scottish singing and dancing was followed by the Presidential Address given by Professor Ivan Mueller on 125 years of international cooperation in geodesy The Ceremony continued with greetings from representatives of sister societies and was concluded by the presentation of the Levallois Medal to Professor Arne Bjerhammar **VI Hotine-Marussi**

Adam, Klaus-Peter Schwarz, 2013-06-29 It was in September 1906 that the predecessor of the IAG the Internationale Erdmessung then organized the 15 General Assembly at the Hungarian Academy of Sciences in Budapest It was 95 years later

in September 2001 that the IAG returned to this beautiful city to hold its Scientific Assembly IAG 2001 in the historical premises of the Academy The meeting took place from September 27 2001 and continued the tradition of Scientific Assemblies started in Tokyo 1982 and continued in Edinburgh 1989 Beijing 1993 and Rio de Janeiro 1997 Held every four years at the midpoint between General Assemblies of the IAG they focus on giving an integrated view of geodesy to a broad spectrum of researchers and practitioners in geodesy and geophysics The convenient location of the main building of the Hungarian Academy in downtown Budapest and the superb efforts of the Local Organizing Committee contributed in a major way to the excellent atmosphere of the meeting As at previous meetings the scientific part of the program was organized as a series of symposia which as a whole gave a broad overview of actual geodetic research activities To emphasize an integrated view of geodesy the symposia did not follow the pattern of the IAG Sections but focussed on current research topics to which several IAG Sections could contribute Each symposium had 5 sessions with presented papers and poster sessions on two consecutive days

*Gravity, Geoid and Space Missions* Christopher Jekeli, Luisa M.C. Bastos, Joana Fernandes, 2005-12-28

A Window on the Future of Geodesy Fernando Sansò, 2006-06-09 Every four years the International Association of Geodesy meets at the IUGG General Assembly and this has always been an important event for IAG to make the point on where are we going as geodesists both in terms of scientific production as well as in terms of organization The proceedings of IAG at the Sapporo 2003 General Assembly are the mirror of our scientific achievements and as Geodesy is a living entity like any other science we could say it is a way to see the picture of what we consider our field of applications as well as of theoretical speculations Let us examine this aspect in terms of what are the object of our research the methods we use the general scientific results we can produce Our object here I would like to use a pseudo Helmert definition the object of Geodesy is knowing the surfaces of the earth the geometric surface by positioning and e m surveying and the physical surface i e the gravity field by land marine or satellite gravimetry and their time variations This object is naturally interlaced with other physical properties of the earth both through deep processes affecting its surface and through the gravity field at all different scales from the global to the regional and local where most engineering applications take place

**Reference Frames for Applications in Geosciences** Zuheir Altamimi, Xavier Collilieux, 2013-03-13 Reference systems and frames are of primary importance for many Earth science applications satellite navigation as well as for practical applications in geo information A precisely defined reference frame is needed for the quantification of e g Earth rotation and its gravity field global and regional sea level variation tectonic motion and

deformation post glacial rebound geocenter motion large scale deformation due to Earthquakes local subsidence and other ruptures and crustal dislocations All of these important scientific applications fundamentally depend on a truly global reference system that only space geodesy can realize This volume details the proceedings of the IAG Symposium REFAG2010 Marne la Vall e France October 4 8 2010 The primary scope of REFAG2010 was to address today s achievements on theoretical concepts of reference systems and their practical implementations by individual space geodetic techniques and their combinations underlying limiting factors systematic errors and novel approaches for future improvements
