Grays Thurrock Revisited:

Grays Thurrock Revisited Barry Barnes,1991 *This Luminous Coast* Jules Pretty,2015-06-04 Over the course of a year Jules Pretty walked along the shoreline of East Anglia in southeastern England eventually exploring four hundred miles on foot and another hundred miles by boat It is a coast and a culture that is about to be lost not yet perhaps but soon to rising tides and industrial sprawl This Luminous Coast takes the reader with him on his journey over land and water over sea walls of dried grass beside stretched fields of golden crops alongside white sails gliding across the intricate lacework of invisible creeks and estuaries under vast skies that are home to curlews and redshanks and the outpourings of skylarks East Anglia s coastline is as much a human landscape as it is a natural one and Pretty is equally perceptive about the region s cultural heritage and its industrial wild fishing villages and the modern seaside resorts family farms and oil refineries pleasure piers and concrete seawalls cozy pubs and military installations Through words and photographs Pretty interweaves stories of the land and sea with people past and present He is a passionate and sensitive guide to a region in transition under stress and perhaps even doomed as finely attuned to its history as he is to its unique sensory world **Essex Journal** ,1992 The Cumulative Book Index ,1992 A world list of books in the English language Pleistocene Environments in the British Isles R.L. Jones,D.H. Keen,2012-12-06 Recent developments in Pleistocene research have prompted the authors to produce this up to date concise account of environmental changes during the past two million years Well illustrated and referenced it possesses a unique position in the literature on Pleistocene events in the British Isles Dracula - the Essex Connection! Ian Yearsley,2018-03-20 The story of Count Dracula the blood sucking vampire of Bram Stoker s classic gothic horror novel and the subsequent star of a multitude of stage and film presentations is well known a creature which comes alive at night when everyone else is asleep to feast on the warm blood of young maidens before returning to its coffin home at dawn one which can be repelled by garlic and crosses but killed only by a stake through the heart What is not so well known is that much of Stoker s original 1897 novel is set in Essex in the Thameside village as it was then of Purfleet near Grays Why should Bram Stoker have chosen such a seemingly insignificant settlement as the place where the Transylvanian vampire makes his English home Could it be that the fiction of Dracula is based on some horrifying fact Does Purfleet perhaps have a history of vampire associations Are the characters and the locations in the novel drawn from actual people and places in the village Or is there a more mundane reason for this Essex location being Stoker s choice This book sets out to answer all these questions and more to provide once and for all an answer to the mystery of why Bram Stoker should wish to set such a horrific blood curdling story in a quiet Essex Thameside village **The Encyclopedia Britannica** James Louis Garvin, Franklin Henry Hooper, Warren E. Cox,1929 The British Lower Palaeolithic John McNabb,2011-03-17 Taking as its central theme the issue of whether early Hominins organized themselves into societies as we understand them John McNabb looks at how modern researchers recognize such archaeological cultures He examines the existence of a stone tool culture called the

Clactonian to introduce the multidisciplinary nature of the subject In analyzing the various kinds of data archaeologists would use to investigate the existence of a Palaeolithic culture this book represents the latest research in archaeology population dispersals geology climatology human palaeontology evolutionary psychology environmental and biological disciplines and dating techniques along with many other research methods *Municipal Journal* ,1988-04 The Sanitary Record and Municipal Engineering ,1915 *Quaternary of the Thames* D.R. Bridgland,2012-12-06 The principal aim of this volume is to provide descriptions of Sites of Special Scientific Interest selected as part of the Geological Conservation Review that yield evidence for the Pleistocene history of the River Thames and its tributaries Although defined thematically the volume covers all Pleistocene GCR sites in the Thames valley A number of sites in southern East Anglia are also included because they provide important evidence bearing on the history of the Thames system The justification for a GCR volume devoted to the Thames lies in the special importance of the river in the British Quaternary The volume is concerned with the history of Britain over approximately the last two million years of geological time during the repeated glacial phases of the Quaternary Ice Age and the warmer intervals between them Many such climatic fluctuations are recorded in the deposits of the Thames which can be shown to have existed as the predominant west to east drainage line in south eastern England throughout the Pleistocene The Thames has left a detailed record of its earlier presence in the form of deposits which comprise fluviially aggraded floodplain sediments predominantly gravels preserved on the valley sides where they form geomorphological terrace features The oldest deposits are at the highest levels forming a terrace staircase that records successive stages in the evolution of the valley The Law Times ,1904 **Governing Sustainable Urban Renewal** Rory Shand,2013-09-02 Environmental and sustainability issues are currently stretched by economic concerns and policy areas such as housing and education are therefore needed more than ever to help regenerate the social and urban environment Governing Sustainable Urban Renewal Partnerships in Action uses detailed case studies from the UK Germany and USA to explore the effect of institutional design and modes of governance and evaluates policy outputs outcomes and best practice In doing so it illustrates where power and decision making lies in the delivery of urban renewal initiatives and examines the roles for communities in the governance process The analysis offers insight into the formation of partnerships and networks that can help to overcome many of the obstacles faced in urban renewal and in the promotion of sustainable development in core urban areas Given the increasing commitment of governments throughout the world to renewal as a means for resolving entrenched environmental social and governance problems this timely new study should be of interest to students and researchers across a range of disciplines including environment studies geography public policy governance and politics sustainable development planning and urban studies **Surveyor and Municipal and County Engineer** ,1899 **The Correspondence of Charles Darwin: Volume 6, 1856-1857** Charles Darwin,Frederick Burkhardt,1985 For the first time full authoritative texts of Darwin s are made available edited according to modern textual editorial principles and practice

Letter writing was of crucial importance to Darwin's work not only because his poor health isolated him from direct personal communication with his scientific colleagues but also because the nature of his investigations required communication with naturalists in many fields and in all quarters of the globe. Thus the letters are a mine of information about the work in progress of a creative genius who produced an intellectual revolution. Investigating Archaeological Cultures Benjamin W. Roberts, Marc Vander Linden, 2011-06-04 Defining culture is an important step in undertaking archaeological research. Any thorough study of a particular culture first has to determine what that culture contains, what particular time period, geographic region, and group of people make up that culture. The study of archaeology has many accepted definitions of particular cultures, but recently these accepted definitions have come into question. As archaeologists struggle to define cultures, they also seek to define the components of culture. This volume brings together 21 international case studies to explore the meaning of culture for regions around the globe and periods from the Paleolithic to the Bronze Age and beyond. Taking lessons and overarching themes from these studies, the contributors draw important conclusions about cultural transmission, technology development, and cultural development. The result is a comprehensive model for approaching the study of culture, broken down into regions: Russia, Continental Europe, North America, Britain, and Africa; materials: Lithics, Ceramics, Metals; and time periods. This work will be valuable to all archaeologists and cultural anthropologists, particularly those studying material culture. **A Revised Correlation of Quaternary Deposits in the British Isles** D. Q. Bowen, 1999 The correlation and classification of Quaternary deposits is desirable for the following reasons: as an exercise in lithostratigraphy to find out about palaeoclimate and to provide standard geographical information. Culture History and Convergent Evolution Huw S. Groucutt, 2020-07-23 This volume brings together diverse contributions from leading archaeologists and paleoanthropologists covering various spatial and temporal periods to distinguish convergent evolution from cultural transmission in order to see if we can discover ancient human populations. With a focus on lithic technology, the book analyzes ancient materials and cultures to systematically explore the theoretical and physical aspects of culture, convergence, and populations in human evolution and prehistory. The book will be of interest to academics, students, and researchers in archaeology, paleoanthropology, genetics, and paleontology. The book begins by addressing early prehistory, discussing the convergent evolution of behaviors and the diverse ecological conditions driving the success of different evolutionary paths. Chapters discuss these topics and technology in the context of the Lower Paleolithic, Earlier Stone Age, and Middle Paleolithic/Middle Stone Age. The book then moves towards a focus on the prehistory of our species over the last 40,000 years. Topics covered include the human evolutionary and dispersal consequences of the Middle/Upper Paleolithic Transition in Western Eurasia. Readers will also learn about the cultural convergences and divergences that occurred during the Terminal Pleistocene and Holocene, such as the budding of human societies in the Americas. The book concludes by integrating these various perspectives and theories and explores different methods of analysis to link technological

developments and cultural convergence
