Making Sense of Infinite

Uniqueness Sergio Salvatore, Jaan Valsiner, Alessandro Gennaro, 2013-02-01 YIS has been thought as an annual series of volumes collecting contributes aimed at developing the integration of idiographic and nomothetic approaches in psychological and more in general social science At the beginning 3 years ago we got an agreement with an Italian publisher FGP Firera Publishing Group interested in the scientific project and therefore willing to help the start up of this scientific enterprise After publishing the first volume YIS 2008 yet published in 2009 the Volume is freely available on the FPG s website we have had many positive feedbacks and signals of interests as well as several submissions from many parts of the world This has provided an acceleration of the following issues Above all this led us to realize that it was time to give an editorial collocation to YIS that can be more consistent with the interest it has raised and that can ulteriorly raise FPG does not put constraint on this perspective being aware and agreed of the necessity of a worldwide context for the YIS s development Moreover there are no constraints in the possibility of going on in using the label YIS starting from Volume 4 The Series addresses a quite large potential public students and researchers interested to theoretical and methodological development of psychology and more in general social science Persons engaged with qualitative dynamic informed models of analysis will find YIS a precious tool as well as a context enabling to develop a worldwide network of practices and cultures of research The first three volumes TOC witness how large and constantly increasing is the interest around the scientific project

Idiographic Approach to Health

Raffaele De Luca Picione, Jensine Nedergaard, Maria Francesca Freda, Sergio Salvatore, 2018-12-01 The concept of health is a challenge of great complexity in terms of theoretical methodological and intervention within the idiographic frame Health cannot be considered an abstract condition but a means a resource aimed at achieving objectives that relate to the ability of people to lead their lives in a productive way individually socially and economically Health is a process that is not based on the definition of standards and categories on the basis of which typifying the states of health Rather it has to be considered a process on a large scale and on many entangled levels aimed at generating a culture of the health as a resource for individuals and communities and to promote skills needed to transform

these resources into developmental goals The notion of health indeed defined and interpreted in terms of state and not of process meets the immediate paradox of being an indicator of normativity by reason of which we risk a proliferation of new and potentially infinite forms of deviation The approach of the idiographic sciences see previous volumes of the Yearbook Idiographic Science Series by same publisher IAP considers that every psychological process but in general every process from organic to the social and cultural ones is characterized by a contextual situated and contingent dynamics That dynamics is always characterized by a never ending opening of its cycles and great variability Conditions of stagnation and hypostatization are characteristic of all forms of disease physical mental and social that sclerotize relational links between people and their environments Health is therefore a process that presents oscillation in the same way of any developmental process that has moments of crisis and rupture in order to re organize new forms of relationship with the social and cultural environment This book represent a fruitful way to deep many cogent issues and to dialogue with an idiographic perspective in order to discuss the concept of health to define its cultural meanings and possible polysemy e g wellness care hygiene quality of life resilience prevention healing deviation normality subjective potentiality for development etc its areas of pertinence and intervention somatic psychological social trying to offer possible alternatives to the normalization of health and creating new incentives for the reflection
