The Cambridge Handbook of the Intellectual History of Psychology Robert J. Sternberg, Wade E. Pickren, 2019-05-16. We cannot understand contemporary psychology without first researching its history. Unlike other books on the history of psychology which are chronologically ordered, this Handbook is organized topically. It covers the history of ideas in multiple areas of the field and reviews the intellectual history behind the major topics of investigation. The evolution of psychological ideas is described alongside an analysis of their surrounding context. Readers learn how eminent psychologists draw on the context of their time and place for ideas and practices and also how innovation in psychology is an ongoing dialogue between past, present, and anticipated future.

International Handbook of Psychology Albert R. Gilgen, Carol K. Gilgen, 1987-08-12. A collection of status reports in the field of psychology for 29 countries and black Africa. Recommended for academic libraries. Choice. This unique compilation of perspectives from around the world is an important effort to share knowledge on the nature and scope of contemporary psychology and major developments in the field worldwide since 1945. Thirty nations and regions are represented in this unprecedented effort to provide a global perspective on the discipline. In addition to presenting comparative information, the reviews allow readers to identify the main factors which bear on the characteristics of psychology in different countries. Extensive tables and figures provide immediate visual representation of needed facts. Helpful name and subject indexes make for quick, easy reference.

Diversification and Professionalization in Psychology Csaba Pléh, 2023-12-18. *Diversification and Professionalization in Psychology* offers readers a multicentric perspective on the history of social science and compares the developments in psychology in relation to the developments made in the other social and natural sciences. This is the second volume about the formation of modern psychology and provides a comprehensive look into the origins and developments of modern psychology. With a large geographical coverage, European developments are put into their own context in their own time. In doing this, the book explores different early schools from social reductionists like Durkheim, Charles Blondel, and Maurice Halbwachs to the social debates about relativism in Lévy-Bruhl, early Piaget, the beginnings of ethology, and the semiotic approach of Karl Böhler. These thinkers are placed in relation to the recent upsurge of different social and biological theories of the mind. Throughout, the author develops a detailed presentation of the thematic development of psychology and links the history of psychology to an outline of contemporary psychology. This is an invaluable introductory text for undergraduate students of the history of psychology and will also appeal to postgraduates, academics, and anyone interested in psychology or the history of science. It will also be of interest to

graduate students of psychology biology sociology and anthropology with a theoretical interest in the history of the field
