Lavochkins Pistonengined Fighters:

Lavochkin's Piston-Engined Fighters (Red Star Series) Yefim Gordon, 2003 The latest addition to the Red Star series addresses the formation and early years of OKB 301 the design bureau created by Semyon shortly before the outbreak of the Great Pacific War This book describes in detail all the piston engined fighters developed by OKB 301 starting with the LaGG 3 an aircraft that first saw service in the Winter War against Finland The story continues with the legendary La 5 and La 7 which rendered sterling service during the war For Soviet airmen these aircraft were what the Spitfire was to the RAF and the P 51 Mustang was to the Americans They were a match for the Messerschmitt Bf109 and the Focke Wulf Fw190 and several pilots were awarded the decoration Hero of the Soviet Union for their exploits in these aircraft The concluding chapters deal with the last of the line the La 9 and the La 11 which saw combat in China and Korea in the late 1940s and early 1950s Illustrated with numerous rare and previously unpublished photos drawn from Russian military archives the book's color content will delight the aviation modeler and anyone interested in Soviet aviation in the World War II era The colorful nose art which many aircraft sported is recorded as are Lavochkin fighters in the liveries of allies of the Soviet Union and captured aircraft in the colors of the enemies of the Soviets

Lavochkin Fighters of the Second World War Jason Moore, 2017-03-13 The Lavochkin fighters remain little known in the West although with the Yakovlev fighter series they were the backbone of the Red Air Force fighter force during the Second World War The author rectifies that with this comprehensive history of these fighters With this book he describes in great detail the three main variants of the Lavochkin fighter series during the Second World War the only partially successful LaGG 3 inline engined fighter the successful radial engined La 5 fighter and the superb radial engined La 7 fighter one of the best piston engined fighter aircraft of the entire Second World War Both the design and history of these fighters are featured including how the mediocre inline engined LaGG 3 was turned into a top notch fighter by the replacement of the Klimov inline engine by the Shvetsov M 82 radial engine Besides describing the wartime designs he includes a section on the postwar successors to the Second World War fighters the completely new all metal La 9 and La 11 which saw extensive postwar service Accurate color profiles illustrate all variants

Soviet Fighters of the Second World War Jason Nicholas Moore, 2021-07-30 The Red Air Force had just started to re equip with modern monoplane fighters when the Germans opened Operation Barbarossa the invasion of the Soviet Union Hundreds of fighters were destroyed in the first few days but many of these were obsolete biplanes Soviet Fighters of the Second World War details fighter development from the dark days of Barbarossa to eventual triumph over Berlin Starting with outdated aircraft such as the Polikarpov Po 2 biplane and monoplane fighters the Soviets then settled on two main lines of development the inline engine LaGG 3 and its radial engine derivatives the La 5 and La 7 and the inline engine Yakovlev fighters which were produced in greater numbers than any other series of fighters Not only are these aircraft accurately described but experimental fighters are also dealt with In addition colour profiles illustrate these aircraft

in terms of design camouflage and markings From the I 15bis biplane of the late 1930s to the superb La 7 and Yak 3 fighters of the last year of the war all Red Air Force fighters are covered in this comprehensive volume **LaGG & Lavochkin Aces of World War 2** George Mellinger,2012-10-20 This book examines the LaGG family of fighters that were amongst the first modern piston engined interceptors made available to the Red Air Forces in early 1941 and proved far better fighters than their radial engined predecessors Despite technical maladies and political interference from Moscow the LaGG 3 matured into an effective fighter when flown to its strengths at low level Many early Soviet aces were weaned on the LaGG 3 and if they survived the early massacres of 1941 42 they went on to fly the Lavochkin family of fighters Indeed as this book demonstrates the Lavochkin La 3 5 and 7 were the fighters of choice for Heroes of the Soviet Union such as Ivan Kozhedub who claimed 62 kills **Professional Journal of the United States Army**,1954 Lavochkin Fighters of the Second World War Jason Moore,2016 The Lavochkin fighters remain little known in the West although with the Yakovlev fighter series they were the backbone of the Red Air Force fighter force during the Second World War The author rectifies that with this comprehensive history of these fighters With this book he describes in great detail the three main variants of the Lavochkin fighter series during the Second World War the only partially successful LaGG 3 inline engined fighter the successful radial engined La 5 fighter and the superb radial engined La 7 fighter one of the best piston engined fighter aircraft of the entire Second World War Both the design and history of these fighters are featured including how the mediocre inline engined LaGG 3 was turned into a top notch fighter by the replacement of the Klimov inline engine by the Shvetsov M 82 radial engine Besides describing the wartime designs he includes a section on the postwar successors to the Second World War fighters the completely new all metal La 9 and La 11 which saw extensive postwar service Accurate color profiles illustrate all variants **Early Jet Fighters, 1944-1954** Leo Marriott,2020-03-30 A clearly written profusely illustrated and well organized volume on Soviet and European jet fighter design Air Power History In his previous book on early jet fighters Leo Marriott traced the history of the revolutionary aircraft produced by the British and Americans immediately after the Second World War Now in this companion volume he describes jet fighter development on the continent of Europe and in the Soviet Union during the same remarkable period Using over 200 archive photographs he covers the pioneering German designs then the range of experimental and operational fighters constructed by the Soviets the French and the Swedes The sheer variety of the designs that manufacturers came up with during this short intense period of innovation make for fascinating reading Several of the most famous jet fighters feature prominently in the rare photographs and are analyzed in the expert text including the Messerschmitt Me 262 the Heinkel He 162 the MiGs 15 17 and 19 the Dassault Ouragan and the Saab J29 But perhaps the most rewarding aspect of the book is its record of experimental projects testing new concepts that rapidly became established elements of jet aircraft design The photographs of these largely forgotten aircraft give us an insight into the extraordinary technical challenges and the ambition and inventiveness of the

designers and manufacturers who overcame them **Soviet Aircraft Industry** Peter G Dancey, 2017-04-22 Soviet aircraft industry was an essential part of the USSR's campaign for global dominance in the twentieth century. Thanks to the thick fog of secrecy that enveloped it throughout the Cold War, it has long inspired the fascination of analysts and enthusiasts in the West. Until the collapse of the USSR in 1991, details of Soviet aircraft were often a matter of conjecture. This book aims to uncover fully the mystery surrounding this topic. Drawing on original and previously unpublished information obtained directly from the former USSR, *Soviet Aircraft Industry* examines the unique characteristics of Soviet designed aircraft, particularly military types, which were the cause of great concern to the West. Further, by virtue of the industry's central role throughout Soviet history, this book provides a rare and important perspective into the broader theme of Russia's great communist experiment.
