Law And Geography Current Legal Issues 2002:

State Theory and the Law Vesting, Thomas, 2022-03-17 There has been renewed and growing interest in exploring the significant role played by law in the centralization of power and sovereignty right from the earliest point This timely book serves as an introduction into state theory providing an overview of the conceptual history and the interdisciplinary tradition of the continental European general theory of the state Law and Ecology Andreas

Philippopoulos-Mihalopoulos, 2011-03-03 Law and Ecology New Environmental Foundations contains a series of theoretical and applied perspectives on the connection between law and ecology which together offer a radical and socially responsive foundation for environmental law While its legal corpus grows daily environmental law has not enjoyed the kind of jurisprudential underpinning generally found in other branches of law This book forges a new ecological jurisprudential foundation for environmental law where ecological is understood both in the narrow sense of a more ecosystemic perspective on law and in the broad sense of critical self reflection of the mechanisms of environmental law as they operate in a context where boundaries between the human and the non human are collapsing and where the traditional distinction between ecocentrism and anthropocentrism is recast Addressing current debates including the intellectual property of bioresources the protection of biodiversity in view of tribal land demands the ethics of genetically modified organisms the redefinition of the human through feminist and technological research the spatial geographical boundaries of environmental jurisdiction and the postcolonial geographies of pollution Law and Ecology redefines the way environmental law is perceived theorised and applied It also constitutes a radical challenge to the traditionally human centred frameworks and concerns of legal theory

Reviving Aleppo Fabian Thiel, Rahaf Orabi, 2024-09-02 This book provides indispensable and interdisciplinary insights into the revitalization and redevelopment of urban centers in war stricken conflict regions such as Aleppo in northern Syria This contribution explores innovative cutting edge toolkits for academicians digital building technologists engineers architects archeologists urban planners land policy advisors and legal scholars The compendium not only analyzes strategies and shortcomings of implementation guidelines drawn by donor organizations development agencies and political actors but also explores possibilities for initiating functioning and sustainably resilient networks that can establish capacity building platforms for recovery and reconstruction Although the work focuses on a city in Syria it holds lessons toolkits and instruments for other areas in the region and beyond **Laws and Societies in Global Contexts** Eve

Darian-Smith, 2013-01-31 This text promotes a more global sociolegal perspective that engages with multiple laws and societies and diverse sociolegal systems based on very different historical and cultural traditions interacting on multiple local national and global levels The approach to global legal pluralism seeks to provide a framework for envisioning new global governance regimes that move beyond state based solutions to deal with trenchant transnational challenges The Struggle for Land Under Israeli Law Hadeel S. Abu Hussein, 2021-11-29 This book provides a comprehensive examination of land law

for Arab Palestinians under Israeli law Land is one of the core resources of human existence development and activity Therefore it is also a key basis of political power and of social and economic status Land regimes and planning regulations play a dynamic role in deciding how competing claims over resources will be resolved According to legal geography spatial ordering impacts legal regimes whilst legal rules form social and human space Through the lenses of international law colonisation and legal geography the book examines the land regime in Israel More specifically it endeavours to understand the spatial strategies adopted by Israel to organise the entire territorial expanse of the country as Jewish while also excluding Arab Palestinian citizens of Israel and residents of East Jerusalem from the landscape The book then details how the systematic nature and processes of marginalisation are mapped out across the civil political and socio economic landscape This monograph will be of interest to international legal theorists legal geographers land lawyers and human rights practitioners and students as well as to international scholars NGOs and others focusing on the Israeli Palestinian conflict

Security, Law and Borders Tugba Basaran, 2010-09-21 This book focuses on security practices civil liberties and the politics of borders in liberal democracies In the aftermath of 9 11 security practices and the denial of human rights and civil liberties are often portrayed as an exception to liberal rule and seen as institutionally legally and spatially distinct from the liberal state Drawing upon detailed empirical studies from migration controls such as the French waiting zone Australian off shore processing and US maritime interceptions this study demonstrates that the limitation of liberties is not an anomaly of liberal rule but embedded within the legal order of liberal democracies The most ordinary yet powerful way of limiting liberties is the creation of legal identities legal borders and legal spaces It is the possibility of limiting liberties through liberal and democratic procedures that poses the key challenge to the protection of liberties The book develops three inter related arguments First it questions the discourse of exception that portrays liberal and illiberal rule as distinct ways of governing and scrutinizes liberal techniques for limiting liberties Second it highlights the space of government and argues for a change in perspective from territorial to legal borders especially legal borders of policing and legal borders of rights Third it emphasizes the role of ordinary law for illiberal practices and argues that the legal order itself privileges policing powers and prevents access to liberties This book will be of interest to students of critical security studies social and political theory political geography and legal studies and IR in general

Environmental Discourses in Public and International Law Brad Jessup, Kim Rubenstein, 2012-02-02 How do dominant views and arguments about environmental problems traverse and connect international and public law

Spatial Justice Andreas Philippopoulos-Mihalopoulos, 2014-10-30 There can be no justice that is not spatial Against a recent tendency to despatialise law matter bodies and even space itself this book insists on spatialising them arguing that there can be neither law nor justice that are not articulated through and in space Spatial Justice presents a new theory and a radical application of the material connection between space in the geographical as well as sociological and philosophical sense and the law in the broadest sense that includes written and oral law but also

embodied social and political norms More specifically it argues that spatial justice is the struggle of various bodies human natural non organic technological to occupy a certain space at a certain time Seen in this way spatial justice is the most radical offspring of the spatial turn since as this book demonstrates spatial justice can be found in the core of most contemporary legal and political issues issues such as geopolitical conflicts environmental issues animality colonisation droning the cyberspace and so on In order to argue this the book employs the lawscape as the tautology between law and space and the concept of atmosphere in its geological political aesthetic legal and biological dimension Written by a leading theorist in the area Spatial Justice Body Lawscape Atmosphere forges a new interdisciplinary understanding of space and law while offering a fresh approach to current geopolitical spatiolegal and ecological issues *Access to Justice in Rural Communities* Daniel Newman, Faith Gordon, 2023-05-04 This book offers insight on access to justice from rural areas in internationally comparable contexts to highlight the diversity of experiences within and across rural areas globally It looks at the fundamental questions for people's lives raised by the issue of access to justice as well as the rule of law It highlights a range of social geographic and cultural issues which impact the way rural communities experience the justice system throughout the world with chapters on Australia Canada England Ireland Kenya Northern Ireland South Africa Syria Turkey the USA and Wales Each chapter explores three questions 1 How do people experience the institutions of justice in rural areas and how does this rural experience differ to an urban experience 2 What impact have changes in policy had on the justice system in rural areas and have rural and urban areas been affected in different ways 3 What impact does the law have on people's lives in rural areas and what would rural communities like to be better understood about their experience of the justice system By bringing in the voices and experiences of those who are often ignored or sidelined by justice systems this book will set out an agenda for ensuring social justice in legal systems with a focus on protecting marginalised groups

Land Expropriation in Israel Yifat Holzman-Gazit, 2016-04-22 Historically Israel's Supreme Court has failed to limit the state's powers of expropriation and to protect private property This book argues that the Court's land expropriation jurisprudence can only be understood against the political cultural and institutional context in which it was shaped Security and economic pressures the precarious status of the Court in the early years the pervading ethos of collectivism the cultural symbolism of public land ownership and the perceived strategic and demographic risks posed by the Israeli Arab population all contributed to the creation of a harsh and arguably undemocratic land expropriation legal philosophy This philosophy the book argues was applied by the Supreme Court to Arabs and Jews alike from the creation of the state in 1948 and until the 1980s The book concludes with an analysis of the constitutional change of 1992 and its impact on the legal treatment of property rights under Israeli law **Property Diversity and its Implications** John Page, 2016-08-05 Property is more diverse than is usually assumed Developing the concept of property diversity this book explores the varied role of property in placed human landscapes In acknowledging the propertied diversity about us the book highlights the paucity of our settled

contemporary assumptions of property as defined by private ownership Challenging this universalizing model the book analyses how this self limiting view produces critical blind spots in modern property discourse In response it offers a re conceptualization of property that matches the grounded reality of our rich and diverse relationships with land Integrating the plurality of real property types private public and common with inclusive understandings of both interest and ownership it thus identifies and substantiates an overarching theory of property diversity Drawing on studies from numerous jurisdictions including the USA New Zealand Australia and the UK its analysis of property as something more and indeed other than a place less abstraction provides an invaluable contribution to the contemporary law and theory of property

Jurisprudence of Jurisdiction Shaun Mcveigh,2007-03-12 This book investigates the difference that jurisdiction continues to make to the ordering of normative existence It also follows the speculation that without an account of jurisdiction jurisprudence would be left with no power to address the conditions of attachment to legal and political order

Cosmopolitanism, Self-Determination and Territory Oliviero Angeli,2015-02-03 Territorial rights are often perceived to create barriers and discriminate against the poor This study challenges that notion by re examining the cosmopolitan understanding of territory It addresses issues from the right to vote the right to exclude others to the legitimacy of territorial boundaries and the exploitation of natural resources

A Discourse on Domination in Mandate Palestine Zeina B. Ghandour,2009-09-10 Weaving together an insurgent reading of the archive with extraordinary oral testimonies A Discourse on Domination in Mandate Palestine offers a thoroughgoing critique of received histories and the outline of a radically different narrative of the life and times of Palestine under British domination

Contemporary Rural Geographies Hugh Clout,2007-06-11 A cohesive set of research statements on critical related issues in British rural geography

Essays in African Land Law Robert Home (College teacher),2011

Law Unlimited Margaret Davies,2017-01-20 This book engages with a traditional yet persistent question of legal theory what is law However instead of attempting to define and limit law the aim of the book is to unlimit law to take the idea of law beyond its conventionally accepted boundaries into the material and plural domains of an interconnected human and nonhuman world Against the backdrop of analytical jurisprudence the book draws theoretical connections and continuities between different experiences spheres and modalities of law Taking up the many forms of critical and socio legal thought it presents a broad challenge to legal essentialism and abstraction as well as an important contribution to more general normative theory Reading crystallising and extending themes that have emerged in legal thought over the past century this book is the culmination of the author s 25 years of engagement with legal theory Its bold attempt to forge a thoroughly contemporary approach to law will be of enormous value to those with interests in legal and socio legal theory

International and Comparative Criminal Justice and Urban Governance Adam Crawford,2011-06-02 Criminal justice has traditionally been associated with the nation state its legitimacy and its authority The growing internationalisation of crime control raises crucial and complex questions about the future shape of justice and

urban governance as these are experienced at local national and international realms The emergence of new international justice institutions such as the International Criminal Court the greater movement of people and goods across national borders and the transfer of criminal justice policies between different jurisdictions all present novel challenges to criminal justice systems as well as our understandings of criminal justice This volume of essays explores the implications and impact of criminal justice developments in an increasingly globalised world It offers cutting edge conceptual contributions from leading international commentators organised around the themes of international criminal justice institutions and practices comparative penal policies and international and comparative urban governance and crime control *Local case studies in African land law* Robert Home,2011 *Encyclopedia of Law and Society* David S.
