El Croquis 117 Frank Gehry 1996 2003:

Architecture, Crisis and Resuscitation Tahl Kaminer, 2011-01-20 Studying the relation of architecture to society this book explains the manner in which the discipline of architecture adjusted itself in order to satisfy new pressures by society. Consequently it offers an understanding of contemporary conditions and phenomena ranging from the ubiquity of landmark buildings to the celebrity status of architects. It concerns the period spanning from 1966 to the first years of the current century a period which saw radical change in economy politics and culture and a period in which architecture radically transformed substituting the alleged dreariness of modernism with spectacle. *El Croquis*, 2005 John Pawson, 1995-2005 John Pawson, 2005

Visible Spirit Irving Lavin, 2006-12-31 As early as the 1950s Professor Irving Lavin was recognized as a major voice in American art history. His sustained production of seminal scholarly contributions have left their mark on an astonishingly wide range of subjects and fields. Bringing these far reaching publications together will not only provide a valuable resource to scholars and students but will also underscore fundamental themes in the history of art: historicism, the art of commemoration, the relationship between style and meaning, the intelligence of artists, themes that define the role of the visual arts in human communication. Irving Lavin is best known for his array of fundamental publications on the Baroque artist Gian Lorenzo Bernini 1598-1680. These include new discoveries and studies on the master's prodigious childhood, his architecture and portraiture, his invention of caricature, his depictions of religious faith and political leadership, his work in the theatre, his attitude toward death and the role of the artist in the creation of a modern sense of social responsibility. All of Professor Lavin's papers on Bernini are here brought together in three volumes. The studies have been reset and in many cases updated and there is a comprehensive index. *Croquis* Toyoo Itō, 2005 X. D. G. A. Xaveer de Geyter, 1992-2005, 2005

Dekonstruktivismus in der Architektur? Simone Kraft, 2015-08-15 Philip Johnson und Mark Wigley versammelten 1988 in ihrer ebenso erfolgreichen wie umstrittenen Ausstellung Deconstructivist Architecture Namen die heute zur internationalen Elite der Architekten gehören: Frank Gehry, Daniel Libeskind, Rem Koolhaas, Peter Eisenman, Zaha Hadid, Coop Himmelblau und Bernard Tschumi. Simone Kraft legt nun mehr als 25 Jahre später erstmals eine Untersuchung zu den Widersprüchlichkeiten der Ausstellung vor. Sie macht sich intensive Archivrecherchen und Informationen von Zeitzeugen zunutze, um die ungewöhnlichen organisatorischen Hintergründe zu rekonstruieren und argumentative Schwachstellen des kuratorischen Konzepts zu beleuchten. So wird schließlich am Beispiel der sieben ausgestellten Architekten eine Annäherung an einen fundierten Begriff von der dekonstruktivistischen Architektur ermöglicht.

Modernism as Memory Kathleen James-Chakraborty, 2018-01-15 After World War II West Germans and West Berliners found ways of communicating both their recent sufferings and aspirations for stable communities through buildings that fused the ruins of historicist structures with new constructions rooted in the modernism of the 1910s and 20s As Modernism as Memory illustrates these postwar practices undergird the approaches later taken in influential structures created or renovated in Berlin following the fall of the Wall including the Jewish Museum and the Reichstag the New Museum and the Topography of Terror While others have characterized contemporary Berlin s museums and memorials as postmodern Kathleen James Chakraborty argues that these environments are examples of an architecture of modern memory that is much older more complex and historically contingent She reveals that churches and museums repaired and designed before 1989 in D ren Hanover Munich Neviges Pforzheim Stuttgart and Weil am Rhein contributed to a modernist precedent for the relationship between German identity and the past developed since then in the Ruhr region and in Berlin Modernism as Memory demonstrates that how one

remembers can be detached from what one remembers contrasting ruins with recollections of modernism to commemorate German suffering the Holocaust and the industrial revolution as well as new spaces for Islam in the country Frank Gehry from A to Z 1996 2003 ,2003 00 000 00: 00 00 0000 00 000,2014-12-20 **Dissolving the image** José Llinàs,2006
