*War, Strategy and the Modern State, 1792-1914* Carl Cavanagh Hodge, 2016-11-25 This book is a comparative study of military operations conducted by modern states between the French Revolution and World War I It examines the complex relationship between political purpose and strategy on the one hand and the challenge of realizing strategic goals through military operations on the other It argues further that following the experience of the Napoleonic Wars military strength was awarded a primary status in determining the comparative modernity of all the Great Powers that military goals came progressively to distort a sober understanding of the national interest that a genuinely political and diplomatic understanding of national strategy was lost and that these developments collectively rendered the military and political catastrophe of 1914 not inevitable yet probable

*Arms Races in International Politics* Thomas Mahnken, Joseph Maiolo, David Stevenson, 2016-01-14 This volume provides the first comprehensive history of the arms racing phenomenon in modern international politics drawing both on theoretical approaches and on the latest historical research Written by an international team of specialists it is divided into four sections before 1914 the inter war years the Cold War and extra

European and post Cold War arms races Twelve case studies examine land and naval armaments before the First World War air land and naval competition during the 1920s and 1930s and nuclear as well as conventional weapons since 1945 Armaments policies are placed within the context of technological development international politics and diplomacy and social politics and economics An extended general introduction and conclusion and introductions to each section provide coherence between the specialized chapters and draw out wider implications for policymakers and for political scientists Arms Races in International Politics addresses two key questions what causes arms races and what is the connection between arms races and the outbreak of wars

**War in the Nineteenth Century** Jeremy Black, 2009-07-27 This book provides an accessible and up to date account of the rich military history of the nineteenth century It takes a fresh approach making novel links with conflict and coercion and moving away from teleological emphases Naval developments and warfare are included as are social and cultural dimensions of military activity Leading military historian Jeremy Black offers the reader a twenty first century approach to this period particularly through his focus on the dynamic drive provided by different forms of military goals or tasking This allows echoes with modern warfare to come to the fore and provides a fuller understanding of a period sometimes considered solely as background to the total war of 1914 45 Alongside state to state warfare and the move toward total war Black s emphasis on different military goals gives due weight to trans oceanic conflict at the expense of non Europeans Irregular internal and asymmetric war are all considered ranging from local insurgencies to imperial expeditions and provide a deliberate shift from Western centrality At the very cutting edge of its field this book is a must read for all students and scholars of military history and its related disciplines
