*Frederic Remington's Own Outdoors*, 1964      *Frederic Remington's Own Outdoors* Douglas Allen, 1964      Frederic Remington Peter H. Hassrick, 2016-05-31 One of America's most popular and influential American artists Frederic Remington 1861-1909 is renowned for his depictions of the Old West Through paintings drawings and sculptures he immortalized a dynamic world of cowboys and American Indians hunters and horses landscapes and wildlife Frederic Remington A Catalogue Raisonné II is a comprehensive presentation of the artist's body of flat work both in print and on this book's companion website Beautifully illustrated with more than 150 figures and 100 color plates this book offers insightful essays by notable art historians who explore Remington's experiences in Taos New Mexico and other parts of the West The chapters include analyses of Remington's artistic development from an illustrator to a fine art painter his search for and understanding of men with the bark on his relationship with the famed illustrator Howard Pyle and the shared imagery of Remington and Buffalo Bill Cody A chapter considering Remington's enduring bond with the horse and its representation in his paintings follows an examination of Remington's ties to Theodore Roosevelt that reveals how the two men helped move the American conscience toward wildlife preservation An assessment of the authentication process for evaluating Remington's works opens the collection Remington is perhaps the most frequently faked American artist The book features a unique keycode granting access to a companion website that brings together more than 3 000 reproductions of the artist's flat works including the complete original 1996 edition of the Catalogue Raisonné and nearly 300 previously unknown or relocated pieces Each entry includes the title date medium size inscriptions provenance and exhibition and publication history of the work as well as select commentary The online catalogue is fully searchable and will be continuously updated as new information becomes available Based on decades of scholarship and research the revised Remington Catalogue Raisonné is an essential resource for scholars collectors museum curators historians of the American West and anyone seeking definitive information on the art of Frederic Remington Frederic Remington A Catalogue Raisonné II is published in cooperation with the Buffalo Bill Center of the West Cody Wyoming      *Frederic Remington and the West* Ben Merchant Vorpahl, 2014-11-11 A biography of the artist examining his complex relationship with the American West and how he expressed his imagination Frederic Remington and the West sheds new light on the remarkably complicated and much misunderstood career of Frederic Remington This study of the complex relationship between Remington and the American West focuses on the artist's imagination and how it expressed itself Ben Merchant Vorpahl considers all the dimensions of Remington's extensive work from journalism to fiction sculpture and painting He traces the events of Remington's life and makes extensive use of literary and art criticism and nineteenth century American social cultural and military history in interpreting his work Vorpahl reveals Remington as a talented sensitive and sometimes neurotic American whose work reflects with peculiar force the excitement and distress of the period between the Civil War and the Spanish American War Remington was not a western

artist in the conventional sense neither was he a historian he lacked the historian's breadth of vision and discipline expressing himself not through analysis but through synthesis Vorpahl shows that even while Remington catered to the sometimes maudlin sometimes jingoistic tastes of his public and his editors his resourceful imagination was at work devising a far more demanding and worthwhile design a composite work executed in prose pictures and bronze This body of work as the author demonstrates demands to be regarded as an interrelated whole Here guilt shame and personal failure are honestly articulated and death itself is confronted as the artist's chief subject Because Remington was so prolific a painter sculptor illustrator and writer and because his subjects techniques and media were so apparently diverse the deeper continuity of his work had not previously been recognized This study is a major contribution to our understanding of an important American artist In addition Vorpahl illuminates the interplay between history artistic consciousness and the development of America's sense of itself during Remington's lifetime

**A Literary History of the American West** Western Literature Association (U.S.), 1987 Literary histories of course do not have a reason for being unless there exists the literature itself This volume perhaps more than others of its kind is an expression of appreciation for the talented and dedicated literary artists who ignored the odds avoided temptations to write for popularity or prestige and chose to write honestly about the American West believing that experiences long known to be of historical importance are also experiences that need and deserve a literature of importance

**Branding the American West** Marian Wardle, Sarah E. Boehme, 2016-02-17 Artists and filmmakers in the early twentieth century reshaped our vision of the American West In particular the Taos Society of Artists and the California based artist Maynard Dixon departed from the legendary depiction of the Wild West and fostered new images or brands for western art This volume illustrated with more than 150 images examines select paintings and films to demonstrate how these artists both enhanced and contradicted earlier representations of the West Prior to this period American art tended to portray the West as a wild frontier with untamed lands and peoples Renowned artists such as Henry Farny and Frederic Remington set their work in the past invoking an environment immersed in conflict and violence This trademark perspective began to change however when artists enamored with the Southwest stamped a new imprint on their paintings The contributors to this volume illuminate the complex ways in which early twentieth century artists as well as filmmakers evoked a southwestern environment not just suspended in time but also permanent rather than transient Yet as the authors also reveal these artists were not entirely immune to the siren call of the vanishing West and their portrayal of peaceful yet exotic Native Americans was an expansion rather than a dismissal of earlier tropes Both brands cast a romantic spell on the West and both have been seared into public consciousness Branding the American West is published in association with the Brigham Young University Museum of Art Provo Utah and the Stark Museum of Art Orange Texas
