Frederick Law Olmsted en perspective Paolo Costantini, Phyllis Lambert, John Szarkowski, 1996-12-01 **Frederick Law Olmsted** Frederick Law Olmsted, 2015-04-15 Frederick Law Olmsted 1822 1903 planned many parks and park systems across the United States leaving an enduring legacy of designed public space that is enjoyed and defended today His public parks the design of which he was most proud have had a lasting effect on urban America The Master List of Design Projects of the Olmsted Firm, 1857-1979 Lucy Lawliss, Caroline Loughlin, Lauren Meier, 2008 *Frederick Law Olmsted's Point Chautauqua* Edgar C. Conkling, 2024-12-01 Point Chautauqua was designed by renowned landscape architect Frederick Law Olmsted in 1875 on a wooded hillside rising steeply from the shores of Lake Chautauqua The only religious community designed by Olmsted over the years it evolved into a hotel resort and then a lakeside residential community Point Chautauqua was listed on the National Register of Historic Places in 1996 and is now considered one of the masterpieces of America s greatest landscape architect Despite being in continuous use for nearly 150 years Point Chautauqua continues to exhibit the design principles that are hallmarks of Olmsted creations It also poses a striking contrast to the more famous Chautauqua Institution across the lake Olmsted criticized the prosaic grid pattern of streets which he felt denied Institution residents a sense of connection with its lakeside site and found the crowding of buildings at the Institution to be unhealthy Taking a very different approach Olmsted laid out Point Chautauqua with curving streets that follow the landscape and allow residents to enjoy views of the lake and lake breezes Like his earlier designs for Riverside near Chicago Parkside in Buffalo and Tacoma Washington Point Chautauqua anticipated the layout of many twentieth century suburban residential communities This priceless artifact is also a living working community of people making it a rewarding laboratory for students of historic landscape architecture as well as for those who seek the preservation of such communities **The Papers of Frederick Law Olmsted** Frederick Law Olmsted, 1977 The concluding volume of the monumental Papers of Frederick Law Olmsted captures some of Olmsted s greatest achievements Choice 2015 Outstanding Academic Title In 1890 Frederick Law Olmsted then nearly sixty eight years old had risen to the pinnacle of his career Together with his partners stepson John Charles Olmsted and protégé Henry Sargent Codman he was involved in a number of major ongoing projects including the Boston Buffalo and Rochester park systems the campus plan for Stanford University and numerous private estates In July he reported that the firm had twenty works of considerable importance underway including nine large parks and six estates that he believed were matters of public interest Before the summer ended the firm s commitments would expand dramatically as Olmsted and his partners were appointed landscape architects for the World s Columbian Exposition in Chicago As commissions for new park systems residential communities grounds for educational institutions and private homes increased Olmsted feared that their commitments would exceed the partners ability to do their best work Despite these fears Olmsted s work in the final six years of his professional career would only enhance his considerable reputation as

the ninth and final volume of The Papers of Frederick Law Olmsted reveals With its impressive waterways monumental buildings and verdant islands and shores the Chicago fair proved to be one of the firm s crowning achievements The early 1890s also saw the culmination of Olmsted s wide ranging work on one of his other great projects the design of the grounds of George W Vanderbilt s massive estate Biltmore near Asheville North Carolina In planning the estate s thousands of acres Olmsted outlined new approaches to landscape design promoted the creation of the first scientific forestry operation in the United States designed a model residential subdivision and proposed an arboretum that would have been the most ambitious in the nation The Last Great Projects 1890 1895 chronicles the history of one of the world s greatest landscape design firms while offering a fascinating retrospective on Frederick Law Olmsted s productive final years The volume also gathers together the important documents of this last triumphant era As Olmsted neared the end of his career he wrote some of his most reflective letters and reports summarizing the legacy of his involvement with the U S Sanitary Commission the quality of landscape design in England and France the biographical circumstances that proved most important to his development as an artist and his hopes and fears for the future of his profession [Artbibliographies Modern](#) ,1997 [Landscape and Images](#) John R. Stilgoe,2015-02-12 John Stilgoe is just looking around This is more difficult than it sounds particularly in our mediated age when advances in both theory and technology too often seek to replace the visual evidence before our own eyes rather than complement it We are surrounded by landscapes charged with our past and yet from our earliest schooldays we are instructed not to stare out the window Someone who stops to look isn t only a rarity he or she is suspect Landscape and Images records a lifetime spent observing America s constructed landscapes Stilgoe s essays follow the eclectic trains of thought that have resulted from his observation from the postcard preference for sunsets over sunrises to the concept of teen geography to the unwillingness of Americans to walk up and down stairs In Stilgoe s hands the subject of jack o lanterns becomes an occasion to explore centuries old concepts of boundaries and trespassing and to examine why this originally pagan symbol has persisted into our own age Even something as mundane as putting the cat out before going to bed is traced back to fears of unwatched animals and an untended frontier fireplace Stilgoe ponders the forgotten connections between politics and painted landscapes and asks why a country whose vast majority lives less than a hundred miles from a coast nonetheless looks to the rural Midwest for the classic image of itself At times breathtaking in their erudition the essays collected here are as meticulously researched as they are elegantly written Stilgoe s observations speak to specialists whether they be artists historians or environmental designers as well as to the common reader Our landscapes constitute a fascinating history of accident and intent The proof says Stilgoe is all around us [Architectural Publications Index](#) ,1997 [Popular Photography](#) ,1983-06 **City Images** Mary Ann Caws,2013-11-26 First Published in 1991 Knowing any real city and still more so knowing what it is to know a city may be as much about passive as about active experience What we read in the field that field of the city in all its bizarre mixture of culture and nature is bound to determine to some non

fictional extent what we know of it what we imagine it could be what we fear it may be or become These essays are meant to be albeit in their critical mode the recountings of knowing something through something else they are the projected imagination through reading of the reading by the self and or others a wide range of each of a city or cities as such of what city knowing or city thinking is The city as stage market and labyrinth variously trafficked and aestheticized dreamt and politicized as passionately written by authors from Cicero to Kazin from Wordsworth Dickens Whitman and Woolf to Williams Ashbery and Bonnefoy is the place the essays play themselves out through architecture and metaphor

Disfigured Images Patricia Morton, 1991-05-21 Much of the material unearthed by this book is ugly states historiographer Patricia Morton who exposes profoundly dehumanizing constructions of reality embedded in American scholarship as it has attempted to render the history of the Afro American woman Focusing on the scholarly literature of fact rather than on fictional or popular portrayals Disfigured Images explores the telling and frequent mis telling of the story of black women during a century of American historiography beginning in the late nineteenth century and extending to the present Morton finds that during this period a large body of scholarly literature was generated that presented little fact and much fiction about black women s history The book s ten chapters take long and lingering looks at the black woman s prefabricated past Contemporary revisionist studies with their goals of discovering and articulating the real nature of the slave woman s experience and role are thoroughly examined in the conclusion Disfigured Images complements current work by recognizing in its findings a long needed refutation of a caricatured mythical version of black women s history Morton s introduction presents an overview of her subject emphasizing the mythical ingrained nature of the black woman s image in historiography as a natural and permanent slave The succeeding chapters use historical and social science works as primary sources to explore such issues as the foundations of sexism racism the writing of W E B DuBois twentieth century notions of black women current black and women s studies new and old images of motherhood and more The conclusion investigates how and why recent American historiographical scholarship has banished the old myths by presenting a more accurate history of black women This keenly perceptive and original study should find an influential place in both women s studies and black studies programs as well as in American history American literature and sociology departments With its unusually complete panorama of the period covered it would be a unique and valuable addition to courses such as slavery the American South women in North American history Afro American history race and sex in American literature and discourse and the sociology of race

Global Perspectives on Industrial Transformation in the American South Michele Gillespie,2005
Covering the late colonial age to World War I and beyond this collection of essays places the economic history of the American South in an international light by establishing useful comparisons with the larger Atlantic and world economy In an attempt to dispel long lasting myths about the South the essays analyze the economic evolution of the South since the slave era From this perspective the conception of a backward wholly agricultural antebellum South occupied only by wealthy planters poor whites and contented slaves has finally given way to one of economic and social dynamism as well as regional prosperity In a coherent and cohesive progression of subjects these essays show that the South had been deeply enmeshed in the Atlantic economy since the colonial period and after the Civil War retained distinctive needs that caused increasing departure from the course northerners adopted on matters of political economy This comparative approach also helps explain the motivations behind the political choices made by the South as an eminently export oriented region This book shows that the South was not slower to develop with respect to industrialization than either the majority of the northern states especially in the West or the countries of Western Europe In fact the apparently disappointing performance of the New South s economy appears to be the result of more pervasive and largely uncontrollable trends that affected the national as well as the international economy Global Perspectives on Industrial Transformation in the American South makes an important contribution to the economic history of the South and to recent efforts to place American history in a more international context
