Free Markets Under Siege:

Free Markets under Siege Richard A. Epstein, 2013-09-01 Drawing on his extensive knowledge of history law and economics Richard Epstein examines how best to regulate the interface between market choice and government intervention and find a middle way between socialism and libertarianism He argues the merits of competition over protectionism and reveals the negative results that ensue when political forces displace economic competition with subsidies and barriers to entry In the process he provides an illuminating analysis of some of the ways that special interest groups with the help of sympathetic politicians have been able to manipulate free markets in their favor

The Free-market Family Maxine Eichner, 2020 US families have been pushed to the wall At the bottom of the economic ladder poor and working class adults aren't forming stable relationships and can't give their kids the start they need because of low wages and uncertain job prospects Toward the top professional parents lives have become a grinding slog of long hours of paid work Meanwhile their kids are overstressed by pressure to succeed and get into good colleges In this provocative book Maxine Eichner argues that these very different struggles might seem unconnected but they share the same root cause the increasingly large toll that economic inequality and insecurity are taking on families It's government rather than families that's to blame Eichner persuasively contends Since the 1970s politicians have sold families out to the wrongheaded notion that the free market alone best supports them In five decades of free market family policy they've scrapped government programs and gutted market regulations that had helped families thrive The consequence is the steady drumbeat of bad news we hear about our country today the opioid epidemic skyrocketing suicide and mental illness rates deaths of despair and mediocre student achievement scores Meanwhile politicians just keep telling families to work a little harder

The Free Market Family documents US families impossible plight showing how much worse they fare than families in other countries It then demonstrates how politicians free market illusions steered our nation wildly off course Finally it shows how using commonsense measures we can restructure the economy to work for families rather than the reverse Doing so would invest in our children's futures increase our wellbeing reknit our social fabric and allow our country to reclaim the American Dream

The SAGE Handbook of Marketing Theory Pauline Maclaran, Michael Saren, Barbara Stern, Mark Tadajewski, 2009-12-04 Bringing together the latest debates concerning the development of marketing theory featuring original contributions from a selection of leading international authors this collection aims to give greater conceptual cohesion to the field by drawing together the many disparate perspectives and presenting them in one volume The contributors are all leading international scholars chosen to represent the intellectual diversity within marketing theory Divided into six parts the Handbook covers the historical development of marketing theory its philosophical underpinnings major theoretical debates the impact of theory on representations of the consumer the impact of theory on representations of the marketing organisation and contemporary issues in marketing theory

Free Market Conservatism (Routledge Revivals) Edward Nell, 2009-10-15

First published in 1984 this book carefully dissects and convincingly demonstrates that conservative economics is incoherent in theory and disastrous in practice The three main schools of thought supporting free market policies supply side economics monetarism and rational expectations are examined in turn and each is found defective Three case studies of conservative policy in action follow Reagan's U S Thatcher's U K and Pinochet's Chile and their courses are charted in depth In addition Robert Heilbroner and Edward Nell analyse economic conservatism's ideology and social policy and the book concludes with an assessment of the political reasons for the continuing appeal of free market conservatism despite its theoretical incoherence and practical failure This is a careful and comprehensive look at this subject which tackles both the theory and the practice head on It will make useful and stimulating reading for students of economics and political economy on courses of economic policy and macro economics and in addition will be of keen interest to all those involved in the debate about one of the major policy issues of our time *Commerce and Community* Robert F. Garnett Jr., Paul Lewis, Lenore T.

Ealy, 2014-11-27 Since the end of the Cold War the human face of economics has gained renewed visibility and generated new conversations among economists and other social theorists The monistic mechanical economic systems that characterized the capitalism vs socialism debates of the mid twentieth century have given way to pluralistic ecologies of economic provisioning in which complexly constituted agents cooperate via heterogeneous forms of production and exchange Through the lenses of multiple disciplines this book examines how this pluralistic turn in economic thinking bears upon the venerable social theoretical division of cooperative activity into separate spheres of impersonal *Gesellschaft* commerce and ethically thick *Gemeinschaft* community Drawing resources from diverse disciplinary and philosophical traditions these essays offer fresh critical appraisals of the *Gemeinschaft* *Gesellschaft* segregation of face to face community from impersonal commerce Some authors issue urgent calls to transcend this dualism whilst others propose to recast it in more nuanced ways or affirm the importance of treating impersonal and personal cooperation as ethically epistemically and economically separate worlds Yet even in their disagreements our contributors paint the process of voluntary cooperation the space commerce and community with uncommon color and nuance by traversing the boundaries that once separated the thin sociality of economics as science of commerce from the thick sociality of sociology and anthropology as sciences of community This book facilitates critical exchange among economists philosophers sociologists anthropologists and other social theorists by exploring the overlapping notions of cooperation rationality identity reciprocity trust and exchange that emerge from multiple analytic traditions within and across their respective disciplines The Case Against the Employee Free Choice Act Richard A. Epstein, 2013-09-01 With the Obama administration in the White House and an overwhelmingly Democratic Congress passage of the Employee Free Choice Act EFCA appears likely But it can and should be stopped if at all possible given the adverse impact that it will have on the workplace and the overall economy In *The Case against the Employee Free Choice Act* Richard Epstein examines this proposed legislation and why it is a large step backward in labor

relations that will work to the detriment of employees employers and the public at large Social Problems in a Free Society Myles J. Kelleher,2004-09-02 The future of the sociologist s profession is jeopardized by an ongoing trend toward the politicization of sociology and the radicalization of social problems This book calls for the rethinking of the culture of social political and economic liberty to create a resurgence of a sociological agenda Social Problems in a Free Society offers an original perspective on social problems such as violations of the principles of individual rights and the free market This book is a vision for reinvigorating the discipline in a fashion undreamt of within the wearisome strains of today s radical social problems theory *Parental Liability in EU Competition Law* Peter Whelan,2023 Parental Liability in EU Competition Law assesses the shortcomings of the EU doctrine of parental antitrust liability and proposes a new framework for imposing liability that is theoretically robust effective in practice fair in substance and legally sound *Raghu-nomics Part 6: Articles of 2011* John aka Raghu Giuffre, **Central Banks at a Crossroads** Michael D. Copp,2008 In this book Stephen Copp has brought together some of the world s leading figures in the field of law and economics to discuss questions that are central to our understanding of how a free market economy operates Though most people accept that a free economy cannot exist in a legal vacuum important questions about how systems of law come into being and what form they should take remain in dispute The authors shed light on some of these issues such as whether common law systems are better than codified law systems the relationship between natural law and government law whether systems of law evolve within societies or are imposed from above by government and the role of human rights as guaranteed by constitutions After examining these questions the authors then proceed to look at specific problems that are frequently disputed by economists such as the role of competition law the relationship between law regulation and economics and how the law can protect the environment without onerous regulation This collection is an important contribution to the literature in the field of law and economics It is important both for economists who wish to understand more about the origins and purposes of law and regulation and for lawyers who need to understand more about the economic foundations of sound legal systems **Woke Agenda** Conrad Riker,101-01-01 Are you tired of being told what to think and how to feel Do you feel like your voice is being silenced in the name of progress Are you concerned about the erosion of traditional values and the rise of identity politics If so this book is for you Discover how social justice warriors are rewriting history to fit their narrative Learn how to recognize and resist the woke agenda in your daily life Understand the impact of critical theory on education media and politics Explore the ways in which traditional values are being undermined Gain insights into the tactics used by social justice warriors to silence dissent Find out how to protect your family and community from the woke agenda Learn how to navigate the challenges of living in a society that prioritizes identity over merit Discover practical strategies for reclaiming your voice and standing up for what

Suranovic,2010-11-22 Looking at all sides of the globalization debate this book analyzes how international economic policy is made and how it has become so controversial The author offers a solution to the debate between free trade unregulated markets and the push for greater government involvement that is consistent with both economic efficiency and social justice Global Business Mark Casson,2023-09-06 This fascinating book examines international business and multinational enterprise as part of a bigger picture considering the importance of two main components space and time Summarising the past five years Mark Casson reviews the changing role of multinational enterprises within the global economy and how leading firms have generated profitability and growth not only from innovations in technology and marketing but also by exploiting legal loopholes in tax and regulatory systems **Cato Supreme Court Review 2004-2005** Mark K. Coercion, Authority and Democracy Grahame Booker,2022-10-31 Classical liberalism has typically sought to maintain as much room as possible for the exercise of personal initiative in the face of the encroachment of states This book explores these questions of coercion and authority in the context of the size and scope of the state and argues that the state and its agents should be held to the same moral rules as are the individuals it rules over The book considers how a distinct feature of the state is its police or coercive power about which one may ask how the state acquires it and what if anything would justify its use It considers the implication that there is nothing inherent about state agents that entitles one to behave in ways that we would not accept from a private actor and how once that argument is made the state s claim to authority is weakened The author also discusses the extent to which democracy has been thought to provide any sort of justification for coercion or authority This book will be of interest to academics and students of political philosophy especially classical liberalism and legal philosophy Legitimacy in EU Cartel Control Ingeborg Simonsson,2010-02-23 This book examines the law developed by the EU to control cartels The law including case law is carefully documented and analysed against a standard of legitimacy which questions the EU s enforcement measures its institutional structures policy choices substantive law evidentiary standards and procedures and sanctions It includes a unique catalogue of over 150 EU cartel decisions as well as novel analyses of difficult borderline issues such as mixed horizontal and vertical cartels single brand dealer cartels and buyer cartels The effect on trade in cartel cases is analysed with reference to established law and deterrence theory Throughout the book the author asks whether EU law also applies at the national level or whether certain assessments need to be made according to national law This approach makes the book particularly helpful for national authorities courts and private practitioners The book includes in depth comparisons with US law as well as a comprehensive survey of the secondary academic literature on cartels As such it presents not only a comprehensive practical view but also a sound theoretical framework for better understanding cartel law This is a work which will be of utmost importance to those working

in competition authorities and competition courts in the EU Member States as well as those working for EU institutions and in private practice and academia

Free Markets Under Siege Richard Epstein, 2023 In this paper Richard A Epstein Professor of Law at the University of Chicago explains how there are substantial gains to be made from countries getting easy policy decisions correct Societies collapse and become impoverished when they do not accept the basic principles of freedom to contract and competition Even in the developed world these principles have not been accepted in key areas such as agricultural and labour markets Significant welfare gains could be achieved from liberalisation in both areas Epstein explains how liberal economists politicians and civil servants often spend much time discussing difficult cases While these issues may be important to particular groups in society the implications of getting difficult cases wrong is not serious Thus policy makers and their advisers Epstein says would do well to concentrate on the easy cases In his study Professor Epstein uses evidence and analysis derived from the disciplines of both law and economics Professor Geoffrey E Wood provides a commentary that elucidates Epstein's argument and shows how it can be further applied to policy issues relevant to the UK

Anti-Americanism in Europe Russell A. Berman, 2013-09-01 In his analysis of Europe's ambivalence toward jihadist terror and the spread of aggressive Islamism with particular emphasis on the European responses or lack thereof to this violent anti modernism Russell A Berman describes how some European countries opt for appeasement and apologetics whereas others muster the strength to defend their way of life and stand up for freedom He describes a complex continent of different nations and traditions to further our understanding of the range of reactions to Islamism

Property Rights Terry L. Anderson, Laura E. Huggins, 2013-09-01 Drawing on the thoughts of various philosophers political thinkers economists and lawyers Terry Anderson and Laura Huggins present a blueprint for the nonexpert expert on how societies can encourage or discourage freedom and prosperity through their property rights institutions This Hoover Classic edition of Property Rights details step by step what property rights are what they do how they evolve how they can be protected and how they promote freedom and prosperity
