Global Economics and Religion James Finn, 1983      Religion, Economics, and Public Policy Andrew D. Walsh, 2000-06-30

As Americans seem bent on dismantling the safety net of the New Deal era the most popular version of the culture wars thesis paints an arguably cosmic battle between defenders of religious orthodoxy who embrace laissez faire capitalism and secular elites who have imposed a Marxist welfare state upon an unsuspecting populace Walsh shows that this thesis ignores the role of religious leaders in legitimizing the types of programs embodied in America's approach to the welfare state Walsh explores the arguments of William Jennings Bryan America's foremost fundamentalist who opposed the Social Darwinism often associated with the defense of laissez faire capitalism John Ryan the Catholic priest whose writings foreshadowed Roosevelt's New Deal legislation Reinhold Niebuhr the influential mainstream Protestant leader who defended America's Cold War strategy of containment while opposing laissez faire capitalism and the arguments of influential African American Protestant and Jewish leaders Finally he looks at the role of religious leaders in the contemporary debates over issues such as health care and welfare reform Whenever possible the relationship between the official views of the religious leaders is analyzed in light of the opinions and voting patterns of their constituents The opinions and voting patterns of secular Americans are also contrasted to those of religious Americans Of particular interest to scholars students and general readers concerned with the role of religion in American politics      Islam and the Political Amr G. E. Sabet, 2008-05-20 This book compares Islamic and Western political formulations highlighting areas of agreement and disparity Building on this analysis the author goes on to show that political Islam offers a serious alternative to the dominant political system and ideology of the West Sabet argues that rather than leading to a Clash of Civilizations or the assimilation of Islam into the Western system a positive process of interactive self reflection between Islam and liberal democracy is the best way forward Beginning this process Sabet highlights key concepts of Islamic political thought and brings them into dialogue with Western modernity The resulting synthesis is essential reading for advanced undergraduate and graduate students of Islamic and Middle Eastern politics political theory comparative politics and international relations      **The Korean Tradition of Religion, Society, and Ethics** Chai-sik Chung, 2016-11-10 By making Korea a central part of comparative history of East Asian religion and society this book traces the evolution of Korean religion from the oldest representation to that of the current day by utilizing wide ranging interdisciplinary and comparative resources This book presents a holistic view of the enduring religious tradition of Korea and its cultural and social significance within the wider horizons of modern and globalizing changes Reflecting nearly five decades of the author's work on the subject it presents an understanding of the main current in Korean religion and social thought throughout history It then goes on to examine discourses on values and morality involving the relationship between religion and society in particular the human meaning of economy and society which is one of the most central and practical problems in the contemporary world with global relevance beyond Korea and Asia Addressing the

overview of the Korean religious tradition in the context of its impact on the making of modern society and economy this book will appeal to students and scholars of Religious Studies Korean Studies and Asian Studies **Routledge Library Editions: Development Mini-Set J: Politics and International Relations** Various, 2022-01-18 Routledge Library Editions Development will re issue works which address economic political and social aspects of development Published over more than four decades these books trace the emergence of development as one of the most important contemporary issues and one of the key areas of study for modern social science The books cover the most important themes within development and include studies of Latin America Africa and Asia Authors include Sir Alexander Cairncross W Arthur Lewis Lord Peter Bauer and Cristobal Kay An extensive collection of previously hard to access or out of print books this set presents an unrivalled opportunity to build up a wealth of material in the field of development studies with a particular focus upon economic and political concerns The volumes in the collection offer both a global overview of the history of development in the twentieth century and a huge variety of case studies on the development of individual nations For institutional purchases for e book sets please contact online sales tandf co uk customers in the UK Europe and Rest of World *Having* William Schweiker, Charles T. Mathewes, 2004 In today's market economies people constitute much of their identity in relation to the things they possess and communities facilitate social intercourse and survival by means of property relations What if anything might the study of the biblical religions contribute to thinking about and responding to the basic reality of having In this book scholars in a variety of fields theology ethics economics and biblical studies address in new and penetrating ways the meaning of having in religious and social life and offer a number of compelling answers to challenging questions about property and possession in our present global age *The Future of the Environment* David Pitt, 2013-10-31 A major concern of this book is how ordinary people might come to manage their own environment more effectively A valuable resource for students of environmental studies it considers how this might be facilitated by more appropriate technology assistance and communications Reviewed by the International Journal of Environmental Studies it has something of interest and information in every chapter of this book and I urge all readers to look at it carefully for its combination of the examination of general principles and down to earth data and problems is one of the best for years *Political Conflict and Economic Change in Nigeria* Henry Bienen, 2013-11-26 First Published in 1985 In the early morning hours of 31 December 1984 the Nigerian military once again removed an elected head of state A coup carried out by senior military officers ended the Second Republic which had been ushered in by elections at the end of 1979 Political Conflict and Economic Change in Nigeria is based on articles and essays written between 1978 and 1983 **Is the Good Corporation Dead?** John W. Houch, Oliver F. Williams, 1996 Can corporations remain socially responsible in today's fiercely competitive global economy For several decades after World War II companies like IBM which exemplified what journalist Robert J Samuelson called the good corporation poured forth material comforts and technological ideas while guaranteeing full employment and adequate

retirement In the 1980s all of that changed as corporations moved to downsize and become lean mean global competitors In this collection thirteen prominent scholars in business ethics finance management and religion and six corporate leaders respond to a new essay by Samuelson that sounds the death knell of the good corporation They propose new approaches to corporate integrity and social responsibility in the global economy The book will be useful in corporate workshops and will make an excellent business ethics text in philosophy departments and business schools *Cultures Merging* Eric L. Jones, 2016-06-28 Economists agree about many things contrary to popular opinion but the majority agree about culture only in the sense that they no longer give it much thought So begins the first chapter of *Cultures Merging* in which Eric Jones one of the world's leading economic historians takes an eloquent pointed and personal look at the question of whether culture determines economics or is instead determined by it Bringing immense learning and originality to the issue of cultural change over the long term course of global economic history Jones questions cultural explanations of much social behavior in Europe East Asia the United States Australia and the Middle East He also examines contemporary globalization arguing that while centuries of economic competition have resulted in the merging of cultures into fewer and larger units these changes have led to exciting new syntheses Culture matters to economic outcomes Jones argues but cultures in turn never stop responding to market forces even if some elements of culture stubbornly persist beyond the time when they can be explained by current economic pressures In the longer run however cultures show a fluidity that will astonish some cultural determinists Jones concludes that culture's ghostly transit through history is much less powerful than noneconomists often claim yet it has a greater influence than economists usually admit The product of a lifetime of reading and thinking on culture and economics a work of history and an analysis of the contemporary world *Cultures Merging* will be essential reading for anyone concerned about the interaction of cultures and markets around the world *Armed Forces, Conflict, And Change In Africa* Henry S. Bienen, 2019-03-04 Nigeria has not evolved political formulas that explicitly allow religion or religious authorities to define legitimacy There have however been struggles carried out in religious terms over constitutional mechanisms for adjudicating conflict Religion also has been an element in the conflict between ethnic language groups Finally religion provides a language a set of values and institutions through which groups struggle and over which groups contend both within and between religious communities It has been necessary for northern leaders to stress Islam in order to maintain northern unity However Islam itself has worked to intensify fissures opened up by social and economic change in Nigeria Islam in Nigeria continues to be contentious in both domestic and foreign policy *The Great Satan Vs. the Mad Mullahs* William O. Beeman, 2008-04-15 Originally published Westport Conn Praeger Publishers 2005 With new preface *Hausaland Divided* William F. S. Miles, 2015-08-20 How have different forms of colonialism shaped societies and their politics William F. S. Miles focuses on the Hausa speaking people of West Africa whose land is still split by an arbitrary boundary established by Great Britain and France at the turn of the century In 1983 Miles returned as a Fulbright

scholar to the region where he had served as a Peace Corps volunteer in the late 1970s Already fluent in the Hausa language he established residence in carefully selected twin villages on either side of the border separating the Republic of Niger from the Federal Republic of Nigeria Over the next year and then during subsequent visits he traveled by horseback between the two places conducting archival research collecting oral testimony and living the ethnographic life Miles argues that the colonial imprint of the British and the French can still be discerned more than a generation after the conferring of formal independence on Nigeria and Niger Moreover such influences persist even in the relatively remote countryside in the nature of economic transactions in local education practices in the practice of Islam in the operation of chieftaincy In Hausaland as throughout the world the border illuminates the vital differences between otherwise similar societies *The Fulbright Experience, 1946-1986* Arthur Power Dudden, Russell Rowe Dynes, 1987-01-01 This collection of essays by participants in the Fulbright Educational Exchange program provides convincing evidence that the transnational educational experience is an efficient and effective way to change the attitudes of people toward others with different customs religion and political systems The book conveys the variegated flavor of the Fulbright experience and the effects of studying teaching and undertaking research in other countries The authors present a set of remarkable testimonials of personal growth and career restructuring Richard Arndt Robin Winks Peter I Rose Otto N Larsen Ray Marshall Irving Louis Horowitz and more than forty others present revealing insights We learn first hand of culture shock of developing understanding across cultural boundaries of teaching and learning about disciplinary assumptions and of breaking intellectual ground The book is a fascinating account of a successful program that tightens the bonds of affection and understanding between peoples of differing cultures

**Political Change in the Third World** Charles F. Andrain, 2010-11-26 In this informative and highly readable book first published in 1988 Charles Andrain explores the ways in which public policies and socio political beliefs and structures cause political change in the Third World The author examines 3 types of political change 1 transitions in political leaders and their policies 2 fundamental transformations in political structures policy priorities and political strategies for dealing with policy issues and 3 the impact of economic education and health care policies on the society itself including changes in unemployment inflation economic growth literacy and birth and death rates In the first part of the book Professor Andrain presents a general overview of political change in the Third World explaining how different models of political systems explain the dynamics of political events in Latin America Asia Africa and the Middle East In the second part of the book he then applies these models to specific changes in five developing nations Vietnam Cuba Chile Nigeria and Iran The book is unique in its careful blending of a policy focus with a structural analysis of nation states domestic social groups and international institutions in the often turbulent regions of the developing world It thus provides a very useful systematic approach to political developments in the Third World that will be welcomed by students faculty and general readers
