Global Environmental Politics Volume 1 No 1:

Global Environmental Politics Jean-Frédéric Morin, Amandine Orsini, Sikina Jinnah, 2020 *Global Environmental Politics* provides a fully up to date and comprehensive introduction to the most important issues dominating this fast moving field. Going beyond the issue of climate change the textbook also introduces students to the pressing issues of desertification, trade in hazardous waste, biodiversity protection, whaling, acid rain, ozone depletion, water consumption and over fishing. Importantly the authors pay particular attention to the interactions between environmental politics and other governance issues such as gender, trade, development, health, agriculture and security. *Global Environmental Politics*, 2005. Global Environmental Politics Pamela S. Chasek, 2018-05-04. For more than twenty years *Global Environmental Politics* has provided an up to date accurate and unbiased introduction to the world's most pressing environmental issues. This new edition continues this tradition while covering critical new developments in the field. Through case studies on key issues such as climate change, toxic chemicals and biodiversity loss the authors detail the development of major environmental regimes. With new material on the adoption of global Sustainable Development Goals and the 2030 Agenda for Sustainable Development, the December 2015 Paris Climate Change conference and recent meetings of major conventions on desertification, biological diversity and more the authors present a comprehensive overview of contemporary international environmental politics. *Global Environmental Politics* is vital reading for any student wishing to understand the current state of the field and to make informed decisions about which policies might best safeguard our environment for the future. **Handbook of Global Environmental Politics** Peter Dauvergne, 2012-01-01. The second edition of this Handbook contains more than 30 new and original articles as well as six essential updates by leading scholars of global environmental politics. This landmark book maps the latest theoretical and empirical research in this energetic and growing field. Captured here are the pioneering and lively debates over concerns for the health of the planet and how they might best be addressed. The introduction explores the intellectual trends and evolving parameters in the field of global environmental politics. It makes a case for an expansive definition of the field, one that embraces an interdisciplinary literature on the connections between global politics and environmental change. The remaining chapters are divided into four broad themes: states and cooperation, global governance, the political economy of governance and knowledge and ethics, with each section covering key emerging issues. In depth explorations are given to topics such as climate change, multinational corporations, international agreements and UN organizations, regulations and business standards, trade and international finance, multilevel and transnational governance and ecological citizenship. *Handbook of Global Environmental Politics* Second Edition is a comprehensive review of the field and offers cutting edge ideas for further research. As such, scholars, students and policymakers will find themselves looking to it for many years to come. **Global Environmental Politics** Gabriela Kütting, 2010-09-13. *Global Environmental Politics* is the perfect introduction to this increasingly significant area. The text combines an accessible introduction to the most

important environmental theories and concepts with a series of detailed case studies of the most pressing environmental problems Features and benefits of the book Explains the most important concepts and theories in environmental politics Introduces environmental politics within the context of political science and international relations theories Demonstrates how the concepts and theories apply in a wide variety of real world contexts Case studies include the most important environmental issues from climate change and biodiversity to forests and marine pollution Each chapter is written by an established international authority in the field This exciting new textbook is essential reading all students of environmental politics and will be of great interest to students of International Relations and Political Economy *Beyond the success in transboundary water management* Abdurasul Kayumov, 2016-02-29 Today when so many countries share the same transboundary river basins unilateral water management becomes extremely critical Joint water management on the other hand faces many obstacles because of states interests in particular function of the water Water is needed for drinking household irrigation hydro energy fishing navigation tourism as well as many other purposes and unfortunately it cannot meet all needs simultaneously The satisfaction of one need often impedes the others In this regard transboundary river basins often create challenges among states by leading them to negotiate in asymmetric relations This book is an attempt to address the effectiveness of transboundary water management from a social and political perspective by offering new theoretical underpinnings to understand the success conditions in sharing transboundary water resources The author focused in the work on three conditions i e institutional conditions and country specific conditions as well as conditions of regional integrity level and role of external actors The proposed conditions were tested on two river basins i e the successful one in the example of Orange Senqu river basin and unsuccessful one in the case of Naryn Syrdarya river basin

The Impact of Big Business Melanie Jarman, 2006-08-01 Debates various topics involving big business including Are oil companies too powerful Should pharmaceutical patents still apply in developing countries and Should big business be allowed into schools

State Behavior and the International Criminal Court Franziska Boehme, 2022-06-09 This book analyzes patterns and causes of state cooperation with the International Criminal Court The work focuses on several African cases including those against leading state officials to dive into current debates about compliance with international law and resistance to international courts The book which draws on interview data collected in The Hague Kenya and South Africa reveals the diversity of state behaviors ranging from full compliance and diplomatic support to partial compliance to resistance and exit This redirects the widespread narrative about African resistance against the ICC to include evidence of continued Court support It is argued that the degree of cooperation the Court receives is affected by a government's perceived costs and benefits of executing an ICC request a cooperation request is considered high cost or low cost depending on the suspect's position the type of action requested and the government's domestic and regional policy objectives In response the Court has been careful not to alienate states further thus highlighting that the Court is both above and below the state having the power to charge individuals including state officials but relying on governments sometimes those from which suspects come to take action on behalf of the Court against the same suspects The book will be of interest to academics researchers and policymakers working in the areas of international law human rights international criminal justice and international relations

Reforming International Environmental Governance W. Bradnee Chambers, Jessica F. Green, 2005 The World Summit on Sustainable Development in Johannesburg in 2002 underscored the need to reform the current institutional framework for environmental governance Chambers and Green both affiliated with the United Nations University Institute of Advanced Studies in Japan gather contributors to take up the question left unanswered at Johannesburg

Shadows in the Forest Peter

Dauvergne,1997 This book is the first to analyze the environmental impact of Japanese trade corporations and aid on timber management in the context of Southeast Asian political economies It is also one of the first comprehensive studies of why Southeast Asian states are unable to enforce forest policies and regulations **Marine Pollution, Shipping Waste and International Law** Gabriela Argüello,2019-07-22 Waste management poses increasing challenges to both the protection of the environment and to human health To face these challenges this book claims that environmental law needs to shift attention from media specific pollution regimes to integrative life cycle approaches of waste management i e from the prevention of waste generation to the actual handling of wastes Furthermore the cooperation of States and the establishment of coordinated activities is essential because states can no longer have separate standards for wastes posing transboundary risks and for purely domestic wastes Drawing upon both International and EU law the book provides a detailed analysis of the regimes set up to deal with the transboundary movement of wastes and ship source pollution so as to elucidate the obligations and legal principles governing such regimes It concludes that treaty obligations concerning transboundary movements of wastes are inapplicable to ship wastes while on board ships and on land However despite the limitations of the transboundary movement of wastes regime the principle of Environmentally Sound Management ESM embodied in this regime has gradually transformed into a legal principle ESM works to address the legal gaps in the regulation of wastes and consequently it provides the desired coherence to the legal system since it acts as a bridge between several regulatory and sectoral levels Furthermore ESM offers a new light with which to understand and interpret existing obligations and it provides a renewed impetus to regimes that directly and indirectly govern wastes This impetus translates into greater coordination and the establishment of cross sectional policies By offering alternative ways to solve problems linked to the management of ship wastes in the sea land interface this book will appeal to anyone with an interest in International Environmental Law *Security Studies* Associate Professor Elliott School of International Affairs Paul D Williams, Dr,Paul D. Williams,2008-06-03 Security Studies is the most comprehensive textbook available on security studies It gives students a detailed overview of the major theoretical approaches key themes and most significant issues within security studies Part 1 explores the main theoretical approaches currently used within the field from realism to international political sociology Part 2 explains the central concepts underpinning contemporary debates from the security dilemma to terrorism Part 3 presents an overview of the institutional security architecture currently influencing world politics using international regional and global levels of analysis Part 4 examines some of the key contemporary challenges to global security from the arms trade to energy security Part 5 discusses the future of security Security Studies provides a valuable teaching tool for undergraduates and MA students by collecting these related strands of the field together into a single coherent textbook **Global Environmental Politics** Hayley Stevenson,2018 This introduction to global environmental politics examines why environmental challenges occur and how we can effectively respond to them
