Practitioners still think that the LAEM may lower an international investor s unconditional portfolio risk In view of this belief concerning emerging markets the present thesis seeks to answer three sets of questions 1 What are the investment laws in the LAEM and how do they compare to developed countries 2 How heterogeneous are the implicit trading costs in the LAEM and which factors are responsible for the heterogeneity And how dif ferent is the implicit trading cost of the LAEM from the developed stock markets And 3 does the predictability of stock returns in the LAEM differ from those docu mented for developed markets A large number of investigations in modern financial economics have been dedicated to quantifying the trade off between risk and expected returns of financial securities
