Global Geography:

Encyclopedia of World Geography R. W. McColl, 2005 Presents a comprehensive guide to the geography of the world with world maps and articles on cartography notable explorers climate and more Global Perspectives in the Geography Curriculum Alex Standish, 2008-10-07 For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians Standish's careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq Iran and Afghanistan on a map Prof Dennis Hayes Oxford Brookes University UK A prescient and critical analysis of the changing face of geography teaching This book deserves to be widely read and debated Alex Standish's book puts current trends in geography teaching in historical and critical context It comprises a forthright and timely defence of geographical education for its own sake Dr Jim Butcher FRSA Department of Sport Science Tourism and Leisure Canterbury Christ Church University Since the early 1990s educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools from a subject which encourages students to explore spatial concepts ideas and skills to a more ethics based subject concerned with the promotion of environmentalism cultural diversity and social justice In this book the new approach is critically examined within a historical and ideological context addressing a number of fundamental questions Should geography be used as a tool for the delivery of citizenship ideals How does this affect the intellectual and moral value of geographical education for young people If the state and teachers are taking more responsibility for the values attitudes and emotional responses of students how will they learn to develop these qualities for themselves If global perspectives shift the focus of education from learning about the outside world to learning about the self what is its vision of social progress and conception of social change This book advocates a return to liberal models of education arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject and the freedom of young people to shape the world in which they live A vital resource for teachers and student teachers alike Global Perspectives in the Geography Curriculum makes a significant contribution to the growing debate about the future direction of the discipline itself *Connecting World Geography to World History Through Storytelling, Eco-feminism, and Mindfulness* Amber J. Godwin, 2024-10-23 By approaching geography and history through an integrated eco feminist and psychogeography lens *Connecting World Geography to World History Through Storytelling Eco feminism and Mindfulness* reaches toward a fresh exploration of the land and water while offering suggestions for content based social emotional learning activities that include ethnogeography exercises and mindfulness activities **Circular - Office of Education** United States. Office of Education, 1952 **Geospatial Technologies in Geography Education** Rafael de Miguel González, Karl Donert, Kostis Koutsopoulos, 2019-05-21 This book addresses new pedagogies focusing on the use of geospatial technologies and geomedias

in the classroom Today geospatial technologies are substantially influencing geography teaching and learning particularly in secondary education Web GIS virtual globes storytelling maps and apps for mobile devices are transforming the nature and design of geography curricula instructional processes didactics resources and assessments Undoubtedly geography is among those school subjects that have benefited most from the implementation of new technologies in the classroom Geospatial technologies can be used to develop inquiry based learning or project based learning pedagogies and help students to acquire spatial reasoning and spatial citizenship skills in the context of education for sustainable development This book highlights a range of initiatives projects and educational practices from several European countries and settings related to geospatial challenges in geography education Given its scope it will be equally appealing to scientists students and teachers of geography and other fields using geospatial technologies and geomedia

The World and All the Things upon It David A. Chang, 2016-06-01 Winner of the Modern Language Association's Prize for Studies in Native American Literatures Cultures and Languages Winner of the American Historical Association's Albert J Beveridge Award Winner of NAISA's Best Subsequent Book Award Winner of the Western History Association's John C Ewers Award Finalist for the John Hope Franklin Prize What if we saw indigenous people as the active agents of global exploration rather than as the passive objects of that exploration What if instead of conceiving of global exploration as an enterprise just of European men such as

Columbus or Cook or Magellan we thought of it as an enterprise of the people they discovered What could such a new perspective reveal about geographical understanding and its place in struggles over power in the context of colonialism The World and All the Things upon It addresses these questions by tracing how Kanaka Maoli Native Hawaiian people explored the outside world and generated their own understandings of it in the century after James Cook's arrival in 1778 Writing with verve David A Chang draws on the compelling words of long ignored Hawaiian language sources stories songs chants and political prose to demonstrate how Native Hawaiian people worked to influence their metaphorical place in the world We meet for example Ka iana a Hawaiian chief who took an English captain as his lover and while sailing throughout the Pacific considered how Chinese Filipinos Pacific Islanders and Native Americans might shape relations with Westerners to their own advantage Chang's book is unique in examining travel sexuality spirituality print culture gender labor education and race to shed light on how constructions of global geography became a site through which Hawaiians as well as their would be colonizers perceived and contested imperialism colonialism and nationalism Rarely have historians asked how non Western people imagined and even forged their own geographies of their colonizers and the broader world This book takes up that task It emphasizes moreover that there is no better way to understand the process and meaning of global exploration than by looking out from the shores of a place such as Hawai'i that was allegedly the object and not the agent of exploration

Imagining a Postnational World Marc Andre Matten, 2016-11-01 This book analyzes the historical significance of rivaling concepts of world order in 20th century East Asia Since the arrival of European imperialism in 19th century coupled with its different schools of political philosophy and international law China has struggled to combine ideas on national sovereignty spatiality and hegemony in its quest of either imitating or replacing European norms of world order By analyzing Chinese visions of regional and international order and comparing them with Japanese proposals of that era this book discusses in detail the relationship of territoriality and political rule discourses of amity and enmity and finally the role of hegemoniality in the process of imagining a possible postnational world in 21st century East Asia and beyond **A Geographical Century**
