Education Eva Aboagye, S. Nombuso Dlamini, 2021-03-01 The idea of citizenship and conceptions of what it means to be a good citizen have evolved over time On the one hand good citizenship entails the ability to live with others in diverse societies and to promote a common set of values of acceptance human rights and democracy On the other hand in order to compete in the global economy nations require a more innovative autonomous and reflective workforce meaning good citizens are also those who successfully participate in the economic development of themselves and their country These competing conceptions of good citizenship can result in people's participation in activities such as profit driven labor exploitation that contradict human rights and democratic tenants Thus global citizenship education is fundamental to teaching learning and redressing sociopolitical economic and environmental exploitation around the world Detailing the

historical development of this field of study to achieve recognition Global Citizenship Education Challenges and Successes provides a critical discourse on global citizenship education GCE Authors in this collection discuss the underpinnings of global citizenship education via contemporary theories and methodologies as well as specific case studies that illustrate the application of GCE initiatives Editors Eva Aboagye and S Nombuso Dlamini aim to motivate learners and educators in post secondary institutions not only to understand the issues of social and economic inequality and political and civil unrest facing us but also to take action that will lead to equitable change in both local and global spaces **Understanding**

Global Perspectives in the Geography Curriculum Alex Standish, 2008-10-07 For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians Standish's careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq Iran and Afghanistan on a map Prof Dennis Hayes Oxford Brookes University UK A prescient and critical analysis of the changing face of geography teaching This book deserves to be widely read and debated Alex Standish's book puts current trends in geography teaching in historical and critical context It comprises a forthright and timely defence of geographical education for its own sake Dr Jim Butcher FRSA Department of Sport Science Tourism and Leisure Canterbury Christ Church University Since the early 1990s educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools from a subject which encourages students to explore spatial concepts ideas and skills to a more ethics based subject concerned with the promotion of environmentalism cultural diversity and social justice In this book the new approach is critically examined within a historical and ideological context addressing a number of fundamental questions Should geography be used as a tool for the delivery of citizenship ideals How does this affect the intellectual and moral value of geographical education for young people If the state and teachers are taking more responsibility for the values attitudes and emotional responses of students how will they learn to develop these qualities for themselves If global perspectives shift the focus of education from learning about the outside world to learning about the self what is its vision of social progress and conception of social change This book advocates a return to liberal models of education arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject and the freedom of young people to shape the world in which they live A vital resource for teachers and student teachers alike **Global Perspectives in the Geography Curriculum** makes a significant contribution to the growing debate about the future direction of the discipline itself

Reconstructing the Authoritarian State in Africa

George Kieh, Jr.,Pita Agbese,2013-10-01 This work seeks to examine the nature and dynamics of authoritarianism in Africa and to suggest ways in which the states covered in the book can be democratically reconstituted In 1990 a wave of euphoria greeted the third wave of democratization that swept across the African Continent The repression wearied subalterns were hopeful that the third wave would have set into motion the process of democratically reconstituting the authoritarian state on the continent More than two decades thereafter although some progress has been made by and large the authoritarian state remains the dominant construct in the region Even in some of the countries in which democratic transitions have taken place the process of democratic consolidation remains an elusive quest as these states are sandwiched between authoritarianism and democracy Against this background the purpose of this book is to examine the travails of the authoritarian state in Africa including the Herculean task to democratically reconstruct it In order to do this six of Africa s perennial authoritarian states Cameroon the Democratic Republic of the Congo Egypt Liberia Rwanda and Uganda are used as the case studies The book has two major objectives First the various chapters probe the nature and dynamics of authoritarianism in Africa Second the chapters suggest ways in which the various authoritarian states covered in the book can be democratically reconstituted

Environmental Problems in Coastal Regions VII C. A. Brebbia,2008 This book contains most of the papers presented at the 7th International Conference on Environmental Problems in Coastal Regions The conference provides a forum for the discussion of problems that are related to coastal regions which are increasingly being affected by population growth and industrial and tourism activities The pressure of these developments generates social ecological and economic problems the solution of which requires an interdisciplinary approach Effective strategies for the management of coastal areas should therefore consist of dynamic and integrated solutions in order to control their environmental quality The contributions included in this book are listed in the following sections Ecology and the Coastal Environment Coastal Deterioration

Management of Risk Water Quality Issues Sediment Transport Coastal Dunes
