## **Global Purchasing And Supply Management:**

**Global Purchasing and Supply Management** Victor H. Pooler, David J. Pooler, Samuel D. Farney, 2005-12-19 Achieving the promise of e business Two divergent approaches exist in purchasing and supply management organizations today which give at least the perception of conflicting direction 1 Some organizations counseled by consultants and e procurement software suppliers but without a clear understanding of current actual procurement processes have implemented expensive systems with the expectations of tremendous savings and spectacular supply chain improvements The results often haven't lived up to the claims 2 Many buyers and purchasing managers failing to grasp the potential benefits from e procurement have resisted change and not given their full support to system improvements Those who have delayed have missed the opportunities of vastly improved processes and supplier contributions Both have valid viewpoints but neither has delivered on the true promise of supply chain improvements so the lessons of this book should benefit both Active supporters of e procurement can benefit from understanding the nuts and bolts approach to the fundamental supply management processes in a global context Moreover buyers and their managers with a better vision of the future will be better prepared to adapt to and support the needed changes Global Purchasing Victor H. **Global sourcing: performance and competition** Paul Scheffler,2015-09-01 In today s times more and more companies pursue global sourcing strategies in some form and to some extent The most prominent reason for the increased interest in global sourcing is the idea to benefit from factor cost differences between sourcing regions However recent research indicates that cross border sourcing is no panacea to generate cost savings There are situations in which international sourcing does not lead to the intended price reductions or even causes expensive backsourcing activities Accordingly the ambiguous image of global sourcing is the point of departure for the dissertation at hand Thus the main purpose of this thesis is to explore how global sourcing can contribute to a firm s purchasing performance The results indicate that the accumulation of social capital between the buying organisation and its international suppliers can increase the sourcing success However given the limited amount of resources for those intimate buyer supplier relationships close partnerships cannot be maintained with all suppliers Consequently the research at hand points in the direction that global sourcing can be a means to increase the intensity of competition in supply markets facilitating the pursuit of more adversarial relationships
