The Pursuit of Sustainability David L. Rainey, Robert J. Araujo, 2015-04-01

The Pursuit of Sustainability Creating Business Value through Strategic Leadership Holistic Perspectives and Exceptional Performance focuses on the hierarchical levels of sustainability strategic leadership holistic perspectives strategic and financial performance It also focuses on management constructs for developing and implementing cutting edge solutions to the exciting opportunities and daunting challenges facing strategic leaders It discusses the requisite strategic thinking methods techniques and practices for examining understanding and

managing in today's complex and turbulent business world. Sustainability and sustainable development are critical for creating positive outcomes and achieving success given the dynamics of the global economy and the ongoing shifts in customer expectations, emerging markets, and the intensity of competition. The aim of the book is to articulate concepts, constructs, and methodologies pertaining to how global corporations and small and medium size enterprises can develop and deploy enhanced solutions and more integrated systems that facilitate leading change in a more interconnected and dynamic business world. The basic perspective is that insightful strategic leaders and astute professionals and their companies can enhance performance, create extraordinary value, and sustain success through sophisticated leadership, cutting edge management constructs, and state of the art systems that reach across space and time. This includes establishing metrics on how companies can measure their progress in relation to global opportunities and challenges and the needs and expectations of people and society. The book is intended to provide strategic leaders, professionals, and practitioners with the insights, guidance, and methods for developing and implementing sustainable solutions and holistic management systems without prescribing a generalized model that supposedly would fit every situation. The strategic logic is really the opposite of the prevailing mindset of the last century in which generic concepts were developed by leading theorists, academics, and business leaders who believed that they could articulate one fits all business methods and models. In today's more complicated business world, businesses and their strategic leaders and senior professionals have to develop unique management constructs and business models for achieving the desired outcomes and sustaining success. The book describes and articulates how strategic leaders and professionals can take advantage of opportunities and challenges by addressing sustainability, sustainable development, and the pursuit of sustainability, and how they can develop and deploy exciting solutions and effective systems in the quest for excellence. Excellence provides the mantra for positive change and sustainable success. The book consists of two parts. Part I examines the hierarchy of sustainability, external context, and sustainable solutions. It includes defining and examining overarching concepts and constructs pertaining to sustainability and sustainable development, highlighting the importance of the pursuit of sustainability, examining the social world and the natural environment, and discussing holistic perspectives and management constructs used to achieve sustainable success. Part II explores sustainable strategic leadership, creating business value, and management constructs pertaining to performance, vulnerabilities, and sustainable success. Most importantly, Part II presents a strategic sustainability performance model that allows strategic leaders and professionals to discern where they fit in the hierarchy of sustainability.

The Writing of Business Robert P. Inkster, Judith M. Kilborn, 1999. The Writing of Business sees writing as an essential tool for creating personal and organizational strategies for managing an increasingly complex workplace. To help students use their writing to attain these goals, the authors have employed a powerful heuristic, GRACE. GRACE represents five essential kinds of generative questions: Goals, Readers, Arguments, Conventions, and Expression, for analyzing a writing situation and generating

specific questions leading to effective written documents Grounded in rhetoric The Writing of Business contextualizes traditional sentence and paragraph conventions within the realities of the business world such as globalization outsourcing and constantly changing technology A business writing text that is reader friendly in both content and voice The Writing of Business equips students for a radically changed workplace This book presents a vision of writing as an activity that is central and essential to doing business in the 21st Century
