Contemporary Customary Land Issues in Africa J. Oloka-Onyango,Bridget Bwalya Umar,2018-07-26 This book examines current trends in customary land issues in Africa focusing on the practice of converting customary land into leasehold tenure particularly in Zambia Since the enactment of the 1995 Lands Act No 29 in Zambia conversion of customary land has become a controversial policy raising questions about the future of customary land and rural communities and the role of traditional authorities in a changing environment Alienating customary land into leasehold tenure has serious implications for local and national politics and gender dynamics Analysis of these trends suggests that the policy of creating land markets on customary land is subjecting customary systems to the forces of change However governments that have adopted this policy have not by and large adopted measures to respond to these challenges Although customary tenure is widely believed to be resilient it is not clear how the customary system will navigate the current winds of change Chapters in this book draw from the Land Use and Rural Livelihoods in Africa Project LURLAP a collaborative research project undertaken by staff and

students at the University of Cape Town and the University of Zambia

Liberalization of Russian Foreign Trade Oleg Dmitrievich Davydov, Valeriĭ Alekseevich Oreshkin, 2000 It is almost two years since the publication of Oleg Davydov's significant study *Inside Out The Radical Transformation of Russian Foreign Trade* 1992 1997 and a lot has changed since then including the August 1998 financial and banking crisis in Russia Nevertheless the views Davydov expressed in that book are still relevant and many of the recommendations he made have been implemented to good effect This book *Liberalization of Russian Foreign Trade* takes up where the first left off Here Davydov teams up with Valeriy A Oreshkin and they systematize and explain the issues related to the formation of Russia's foreign trade policy The transition from centrally planned economy to market economy has been difficult The largest problem of course has been integrating Russia into the world economic community and learning how to do business with foreign counterparts and competitors Another problem of potentially overwhelming proportions is the issue of Russia's foreign debts and the authors investigate how the country might modernize its infrastructure and invest in its future despite the enormous foreign debt repayments Part of the solution the authors believe will come from foreign investments yet Russian businesspeople must continue to convince foreign investors that investing in Russia is a good risk However given the rise of criminal activities in the foreign trade arena foreign investors are understandably hesitant In the foreseeable future the creation of internal and external conditions for a more complete integration of Russia into the world economy will remain a top priority But the key milestones to that greater goal are already in flux In an objective and informed way this book provides the best explanation available of how those milestones have changed and how such changes may affect the future development of a competitive Russian economy

government to stop managing the economy's structural development and to redefine the responsibilities of business and government. Under this proposed compact the allocation of resources would shift from the government to the private industrial and financial sectors. The transformation of the government bureaucracy from an ad hoc policy role to one of a transparent and predictable regulator is a key to the success of this undertaking. These new directions would present the government with enormous challenges. Greater competitive discipline and regulatory oversight would be required. While dealing with the complexities of the transition the government would have to maintain macroeconomic stability and the momentum of savings and investment. For comparison the study examines the industrial economies of France, Germany, Japan and the United States which underwent similar shifts. **Energy Information Abstracts** ,1991 **Leisure, Recreation, and Tourism Abstracts** ,1994
