*Making People Illegal* Catherine Dauvergne,2008-04-14 Publisher Description *Human Rights* Albert A. Zinnos,2007 Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is

based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence the term human rights is often itself an appeal to such transcended principles without basing such on existing legal concepts The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often based Within particular societies human rights refers to standards of behaviour as accepted within their respective legal systems regarding 1 the well being of individuals 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government These rights commonly include the right to life the right to an adequate standard of living the prohibition of genocide freedom from torture and other mistreatment freedom of expression freedom of movement the right to self determination the right to education and the right to participation in cultural and political life These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments This new book brings together the latest book literature centred on this crucial topic South African Yearbook of International Law ,2006 **Learning To Talk** Malcolm McIntosh,Sandra Waddock,Georg Kell,2017-09-29 The UN Global Compact complements other corporate citizenship initiatives by promoting dialogue on the relationship between business and society At the same time it is the only truly global corporate citizenship initiative It is not an auditable standard indeed it is not a standard or a code in the way that these are normally viewed It is a set of principles through which business and the United Nations can work in partnership for global social development For some businesses it is a simplified codification of their existing policies and management practices but for many engagement represents a challenge and an opportunity to raise their game by aligning profitability with the common good As the only genuinely global corporate citizenship initiative the Global Compact draws its moral authority from the UN Secretary General and its moral and political legitimacy from the UN as the only global political body It can be viewed as a series of nested networks involving the Secretary General's Office the ILO UNEP UNHCHR UNDP and UNIDO business NGOs and labour It can variously be described as an international learning network as a social network of people and organizations engaged in a global conversation as a global public policy network and as a multi stakeholder dialogue It is all of these things but more than anything its greatest success has been in providing a convening platform for a growing global conversation about social development among a variety of actors However the Global Compact is viewed it is time to reflect on the first tentative steps of an initiative born in the aftermath of the Cold War in the triumph of global economic liberalism and mass demonstrations against globalisation In its first few years the world has experienced 9 11 and the Iraq War not forgetting the forty or so civil wars that are ongoing at this time Whatever is written about the UN Global Compact or its success will be tentative But there can be some serious reflection on

its aims and origins some telling of stories of engagement and discussion on how this initiative has quickly become an important reference point in the dialogue on global and corporate governance

Mendes, 2022-08-18 This book offers a stimulating introduction to the links between areas of global governance human rights global economy and international law By drawing on a range of diverse subject areas it argues that the foundations of global governance human rights and international law are undermined by a conflict or tragic flaw where insistence on absolute conceptions of state sovereignty are pitted against universally accepted principles of justice and human rights resulting in destructive self interest for both the state and the global community Following the election of President Donald Trump the second edition will explore how we are witnessing a critical battle to ensure that human rights international law and the beneficial aspects of globalization will still be relevant and applied in some of the critical institutions of global governance and in the operations of the global private sector The second edition will focus on how States institutions and global civil society will have to ramp up the struggle to fight this tragic flaw that is now even more evident with the actions of the US and other authoritarian states like China and Russia in this second decade of the 21st Century      *The Future of Ocean Regime-Building* Aldo Chircop, Theodore McDorman, Susan Rolston, 2009-02-23 One of the most creative innovations of the international diplomatic community in the 20th century was its invention of the international regime wrote Douglas M Johnston in his last major work published posthumously *The Historical Foundations of World Order The Tower and the Arena* Nijhoff 2008 While regimes often provide order and certainty and a consequent reduction in disputes and misunderstandings regimes are driven by specific concerns With diverse disciplinary backgrounds and perspectives the distinguished contributors to this tribute follow a long tradition of scholarly inquiry into the governance creation operation viability and maintenance of international regimes Their contributions on ocean and environmental regimes as diverse as fisheries ocean dumping maritime security seafarers rights or enhancement of marine environmental protection attest to the depth to which modern international law and the underlying international relations have been transformed into an international law of structured cooperation This book

includes biographical and bibliographic notes on Douglas M Johnston      *WORLD INSECURITY* Miguel Vilombo, 2014 The world is increasingly becoming interdependent and this interdependency has raised the number of unmistakable vulnerabilities threats and risks The institutions of governance in weak and failing states are driving forces that often lead to environmental damage mismanagement of natural resources to the expansion of international terrorism inter religious violence transnational organized crime and to piracy activities that affect energy security in the Gulf of Guinea and Aden All this creates open security spaces whose impacts are national sub regional regional and threatens the international security order The UN and other intergovernmental bodies are often drawn in to mitigate conflicts and political crisis and to provide emergency humanitarian responses at very high costs The cost of post conflict society s recovery processes such as rebuilding institutions of governance is enormous due to financial and human resources commitment efforts Therefore to resolve insecurity problems a firefighter strategy is not good enough unless efforts are redirected towards information management and analysis of global trends to enable a more adequate response to the crisis The main issue is therefore to provide now and for future generations a response that has to be effective and adequate to both manmade and natural crisis

*Regulating Transnational Corporations in Domestic and International Regimes* Evaristus Oshionebo, 2009-01-01 This study explores the range of strategies for regulating the social and environmental practices of TNCs in Africa s extractive industries
