Global Politics Of The Environment:

The Global Politics of the Environment Lorraine Elliott, 2004-08 Human activity is changing the global environment on a scale unlike that of any other era Environmental deterioration is now a global issue ecologically politically and economically that requires global solutions Yet there is considerable disagreement over what kinds of strategies we should adopt in order to halt and reverse damage to the global ecosystem What kinds of international institutions are best suited to dealing with global environmental problems Why are women and indigenous peoples still marginalized in global environmental politics What are the consequences of the global ecological crisis for economic and security policies The Global Politics of the Environment makes sense of the often seemingly irreconcilable answers to these questions It focuses throughout on the tensions between mainstream strategies which seek to build support for reforms through existing institutions and radical critiques which argue that environmental degradation is a symptom of a dysfunctional world order that must itself be transformed if we are to meet the challenge of saving the planet *The Global Politics of the Environment* Lorraine M. Elliott, 1998 What kinds of international institutions are best suited to dealing with global environmental problems How can we address the crisis of state capacity What role should non state actors have in environmental governance Why are women and indigenous peoples still marginalized in global environmental politics What are the consequences of the global ecological crisis for economic and security policies The Global Politics of the Environment makes sense of the often seemingly irreconcilable ideas behind answers to these questions It focuses throughout on the tensions between mainstream strategies which seek to build support for reforms through existing institutions and radical critiques which argue that environmental degradation is a symptom of a dysfunctional world order that must itself be transformed if we are to meet the challenge of saving the planet *Understanding Global Environmental Politics* M. Paterson, 2000-04-07 *Understanding Global Environmental Politics* develops a new critical approach to global environmental politics It argues that the major power structures of world politics are deeply problematic in ecological terms and that they cannot be easily used to resolve major environmental challenges such as global warming Instead of simply advocating the construction of new international institutions to respond to such challenges therefore the book argues that the construction of alternative social and political structures is necessary **Understanding Global Environmental Politics** Matthew Paterson, 2000 *Understanding Global Environmental Politics* develops a new critical approach to global environmental politics It argues that the major power structures of world politics are deeply problematic in ecological terms and that they cannot be easily used to resolve major environmental challenges such as global warming Instead of simply advocating the construction of new international institutions to respond to such challenges therefore the book argues that the construction of alternative social and political structures is necessary It develops this argument through an analysis of globalized social practices which generate environmental change After an examination of policy making surrounding sea defences which

challenges the notion that political institutions are neutral regarding environmental change it examines the political dynamics of car culture and of the meat centred fast food industry Through such analysis Understanding Global Environmental Politics provides a distinctive new perspective on the field **BOOK JACKET Global Environmental Politics** Hayley Stevenson, 2018 This introduction to global environmental politics examines why environmental challenges occur and how we can effectively respond to them **International Politics and the Environment** Ronald B Mitchell, 2009-11-13 This book provides a sophisticated overview of the theories concepts and methods central to the complex and contentious field of International Environmental Politics IEP Ronald B Mitchell carefully introduces students to the political processes involved in both causing and resolving international environmental problems Each fully integrated chapter Links environmental policy to politics bringing in a wide range of practical real life examples Deepens students theoretical understanding helping them to identify and explain international environmental problems and their solutions Goes beyond description and develops students ability to evaluate claims about outcomes in international environmental politics through empirical testing A rounded in depth examination of IEP this book has been specifically written for graduate and advanced undergraduate courses in global environmental politics and modules of broader international relations programs SAGE Series on the Foundations of International Relations Series Editors Walter Carlsnaes Uppsala University Sweden Jeffrey T Checkel Simon Fraser University Canada International Advisory Board Peter J Katzenstein Cornell University USA Emanuel Adler University of Toronto Canada Martha Finnemore George Washington University USA Andrew Hurrell Oxford University UK G John Ikenberry Princeton University USA Beth Simmons Harvard University USA Steve Smith University of Exeter UK Michael Zuern Hertie School of Governance Berlin Germany The SAGE Foundations series fills the gap between narrowly focused research monographs and broad introductory texts providing graduate students with state of the art critical overviews of the key sub fields within International Relations International Political Economy International Security Foreign Policy Analysis International Organization Normative IR Theory International Environmental Politics Globalization and IR Theory Explicitly designed to further the transatlantic dialogue fostered by publications such as the SAGE Handbook of International Relations the series is written by renowned scholars drawn from North America continental Europe and the UK The books are intended as core texts on advanced courses in IR taking students beyond the basics and into the heart of the debates within each field encouraging an independent critical approach and signposting further avenues of research

Global Environment and World Politics Elizabeth R. DeSombre, 2005-01-01 Politically the world is composed of states Environmentally the world is made up of ecosystems This disconnection between ecological and political systems makes addressing environmental issues at the global level both more difficult and more necessary This volume examines how we should set about addressing the problems that face the environment internationally The field of international environmental politics draws on a variety of academic traditions It uses international relations theory to look at the concerns and actions of

states but it also uses variety of new perspectives to explain issues that are unique to the study of the environment Elizabeth DeSombre explores four important approaches to the field international environmental cooperation the relationship between the environment and security the issues of science uncertainty and risk and the role of non state actors She explores these approaches with the help of case studies on specific problems facing the global environment focusing in particular on ozone depletion and global climate change the politics of whaling the protection of Amazonian biodiversity and acid rain in Europe and North America

International Politics and the Environment Ronald B Mitchell, 2010 This title provides graduate students with a sophisticated overview of this increasingly important field outlining the causes of international environmental problems and assessing the ways in which political responses have been formulated implemented and evaluated

Global Environmental Politics Gabriela Kütting, Kyle Herman, 2018-05-11 Global Environmental Politics is the perfect introduction to this increasingly significant area This fully revised and updated new edition combines an accessible introduction to the most important environmental theories and concepts with a series of detailed case studies of the most pressing environmental problems Features and benefits of the book Explains the most important concepts and theories in environmental politics Introduces environmental politics within the context of political science and international relations theories Demonstrates how the concepts and theories apply in a wide variety of real world contexts New case study chapters on the role of technology the role of China endangered species biodiversity and the politics of conservation the politics of food forests and the politics of waste Each chapter is written by an established international authority in the field Fully up to date with the latest topics such as climate change negotiations transnational governance new indicators for sustainable development goals and much more More in text support such as end of chapter web links and discussion questions This exciting textbook is essential reading for all students of environmental politics and will be of key interest to students of international relations and political economy

Global Warming and Global Politics Matthew Paterson, 1996 Examines the major theories within international relations and how these can help us understand the emergence of global warming as a political issue

Environmental NGOs in World Politics Matthias Finger, Thomas Princen, 2013-01-11 At a time when states are reactive at best to the global ecological crisis and when economic globalization seems to be significantly contributing to the acceleration of that crisis environmental non governmental organisations NGOs are proliferating This book explains the key role of NGOs in an emerging world environmental politics showing how NGOs act both as independent bargainers and as agents of social learning to link biophysical conditions to the political realm at both the local and global levels Through the use of case studies the authors reveal the richness and diversity of NGO activity and the difficulty of the choices facing decision makers in their attempts to protect the environment seek new forms of governance and foster social environmental learning The book generates questions that are central not only to an understanding of NGO relations but to the study of international environmental politics Environmental NOGs in World Politics will be of great interest to upper level student

sand scholars of both environmental politics and international relations It will also appeal to environmental policy professionals *Global Environmental Politics* Gareth Porter,1991 Essays discuss environmental issues interest groups security and trade considerations and future approaches to environmental policy **Advocacy Groups Versus State Power** Harry Cleveland Ozeroff,1999 *A Fragmented Continent* Guy Edwards,J. Timmons Roberts,2015-11-13 How Latin American countries became leading voices and innovators on addressing climate change and what threatens their leadership Latin American countries have increased their influence at the United Nations climate change negotiations and offered potential solutions on coping with global warming But in the face of competing priorities sometimes these climate policies are jettisoned undermined or simply ignored A Fragmented Continent focuses on Latin America s three major blocs at the U N climate negotiations and how they attempt to balance climate action with building prosperity Brazil has reduced its deforestation but continues its drive for economic growth and global recognition A leftist group led by Venezuela Bolivia and Ecuador decries the injustice of climate change but is highly dependent on the export of fossil fuels A new group including Chile Costa Rica and Peru and supported by Mexico offers sharp reductions in their carbon emissions in return for greater action by others these countries now have to deliver on their promises Weaving together issues of politics and economy trade foreign policy civil society and environmental protection A Fragmented Continent offers a long missing perspective on one of this century s greatest challenges and neglected regions *The Global Environment and World Politics* Elizabeth R. DeSombre,2002 Politically the world is composed of states Environmentally the world is made up of ecosystems This disconnection between ecological and political systems makes addressing environmental issues at the global level both more difficult and more necessary This volume examines how we should set about addressing the problems that face the environment internationally The field of international environmental politics draws on a variety of academic traditions It uses international relations theory to look at the concerns and actions of states but it also uses variety of new perspectives to explain issues that are unique to the study of the environment Elizabeth DeSombre explores four important approaches to the field international environmental cooperation the relationship between the environment and security the issues of science uncertainty and risk and the role of non state actors She explores these approaches with the help of case studies on specific problems facing the global environment focusing in particular on ozone depletion and global climate change the politics of whaling the protection of Amazonian biodiversity and acid rain in Europe and North America *The Politics of Climate Change* Paul G. Harris,2013-09-13 Climate change is now a mainstream part of the international political agenda It has become clear that it is not solely a technical issue to be resolved by scientists but a political issue with political implications at all levels of global governance Indeed some may argue that few long term problems in international affairs are more important than this one The purpose of this book is to reveal and apply some of the latest thinking on the implications of climate change for international affairs and to explore how various proposals for tackling climate change will affect interstate

relations in coming years Chapters by scholars of international relations international political economy and international law contribute to current discussions of climate change doing so in way that is accessible to students stakeholders government officials and informed laypersons Some questions considered in the book include the following How has the discussion of climate change affected interstate relations How does this problem and how do environmental issues more generally challenge international relations theory How do international climate politics influence domestic politics and vice versa How would climate change or action taken to tackle it affect the balance of power or balance of influence Is climate change a matter of international security or international justice or both and how does the answer to this question affect policy responses of governments Which states are likely to benefit or suffer from the various proposals to address climate change What are the legal ethical and political implications of the uneven distribution of the impacts of climate change This book was previously published as a special issue of the Cambridge Review of International Affairs

The Environment and International Relations Kate O'Neill, 2009-01-22 This textbook enables students to apply the theory and approach of International Relations to environmental challenges facing a complex international political system

Global Green Politics Peter Newell, 2019-12-12 In light of growing urgency in tackling the global environmental crisis there is a need for new visions and strategies to ensure a more sustainable and just world This book provides a comprehensive overview of Green perspectives on a range of global issues including security the economy the state global governance development and the environment Drawing on academic literature on Green political theory combined with insights from real world practice and the author's own extensive personal experience it provides a timely and accessible account of why we need to embrace Green politics in order to tackle the multiple crises facing the world today Presenting alternative visions and concrete strategies for achieving change this book will be of interest to activists and policy makers as well as students of environment development and politics

Climate for Change Peter Newell, 2000-09-04 Describes how non state actors have shaped the international global warming debate for researchers policy makers and students

The Urbanization of Green Internationalism Yonn Dierwechter, 2018-09-25 The recent rise of cities in global environmental politics has stimulated remarkable debates about sustainable urban development and the geopolitics of a changing world order no longer defined by tightly bordered national regimes This book explores this major theme by drawing on approaches that document the diverse histories and emergent geographies of internationalism It is no longer possible the book argues to analyze the global politics of the environment without considering its various urbanization s wherein multiple actors are reforming reassembling and adapting to nascent threats posed by global ecological decay The ongoing imposition and abrasion of different world orders Westphalian and post Westphalian further suggests we need a wider frame to capture new kinds of urbanized spaces and global green politics The book will appeal to students scholars and practitioners interested in global sustainability urban development planning politics and international affairs Case studies and grounded examples of green internationalism in

urban action ultimately explore how select city regions like Cape Town Los Angeles and Melbourne are trying to negotiate and actually work through this postulated dilemma
