Millennium Development Goals Matthew Clarke, Simon Feeny, 2013-09-13 In the year 2000 the international community agreed to a framework to address global poverty This framework known as the Millennium Development Goals was time bound with an end date of 2015 With this end now in sight the international community is focusing on the achievement of these goals However it is also very important that consideration now turns to what will follow the MDGs after 2015 Millennium Development Goals Looking Beyond 2015 provides a critical analysis of the MDGs and discusses a range of issues that must be considered by the international community in determining what poverty alleviation framework might replace the MDGs This reflection is made even more imperative as the poverty landscape has shifted considerably since these original goals were made This book was originally published as a special issue of the Journal of the Asia Pacific Economy

International Development Corinna R. Unger, 2018-09-06 International Development A Postwar History offers the first concise historical overview of international development policies and practices in the 20th century Embracing a longue durée perspective the book describes the emergence of the development field at the intersection of late colonialism the Second World War the onset of decolonization and the Cold War It discusses the role of international organizations colonial administrations national governments and transnational actors in the making of the field and it analyzes how the political intellectual and economic changes over the course of the postwar period affected the understanding of and expectations toward development By drawing on examples of development projects in different parts of the world and in different fields Corinna R Unger shows how the plurality of development experiences shaped the notion of development as we know it today This book is ideal for scholars seeking to understand the history of development assistance and to gain new insight into the international history of the 20th century

Environmental Protection, Security and Armed Conflict Onita Das, 2013-01-01 Environmental Protection Security and Armed Conflict is a timely reminder of the

need to integrate sustainable development into key areas of international law including all phases of armed conflict Onita Das cleverly picks her way through the applicable law and derives solid suggestions for the future Karen Hulme University of Essex UK This book explores environmental protection relevant to security and armed conflict from a sustainable development perspective The author details how at each stage of the armed conflict life cycle policy law and enforcement have fallen short of the sustainable development model and concludes with a set of suggestions for how to address this pressing concern The book considers and discusses Environmental protection relevant to security and armed conflict from a holistically sustainable development perspective Environmental protection relevant to security and armed conflict in the life cycle of armed conflict pre conflict in conflict and post conflict Uses substantive sustainable development principles duty of states to ensure sustainable use of natural resources equity and the eradication of poverty common but differentiated responsibilities precautionary principle public participation good governance integration and interrelationship and polluter pays principle as tools or objectives to achieve sustainable development in the context of environmental protection relevant to security and armed conflict The concept of sustainable development is utilized to fill the gaps left by policy and law in the field of environmental protection relevant to security and armed conflict The book also examines 5 case studies relating to Somalia Darfur Sudan Sierra Leone the First Gulf war and the Kosovo conflict This fascinating and detailed study will strongly appeal to academics and postgraduate students in the fields of both environmental protection and international law researchers policy makers NGOs and individuals working in the field

Climate Change and Sustainable Development

Mohamed Abdel Rahim M. Salih, 2009-01-01 this book gives a good overview of major challenges facing policy makers researchers and ultimately humankind in dealing with climate change The reader also gets a good understanding of how fragmented and transversal the issues of climate change and sustainable development are Quarterly Journal of International Agriculture a unified useful and stimulating book which should act as a springboard for further work into what is a very topical and extremely important issue for everyone in the world not just academics and policymakers This book serves its intended audience but also deserves to be more widely read World Entrepreneurship Society Too often writings on climate change are placed into two categories climate change deniers and climate change supporters What this timely and insightful collection of Mohamed Salih s does is to problematise the issue taking the debate to a level where it desperately needs to be asking the thorny questions of how do the politics and international relations of climate impact upon the most vulnerable the least affluent the dwellers of the majority world In short Salih challenges us How did the climate change about climate change The responses of his contributors are salient to the point sometimes disturbing but always thought provoking Timothy Doyle Keele University UK Editing the proceedings of a symposium into a cogent and coherent book is no easy task This book a tribute to Professor Opschoor is no exception with disperse contributions of some highly acclaimed authors covering a wide spectrum of themes It is a credit to Professor Salih s insight to string them together in the introductory chapter and entice

the reader to read on This book has food for thought on many fronts reaching far beyond climate change as did the oeuvre of Hans Opschoor an instructive read Paul Vlek Center for Development Research ZEF Bonn Germany It is difficult if not impossible to formulate and implement sustainable policy without first understanding the dynamic relationships between nature society economics and technology and research plays a pivotal role in this regard Climate Change and Sustainable Development is an important book which deals with these issues in the context of climate change and the changing global context of development It alerts us to the relationship climate change has with two urgent tasks poverty reduction and sustainable development which require efforts that span countries regions and communities In this interdependent world argue the authors a shared vision and common effort are vital to sustaining our life support system It is a must read Jacqueline Cramer The Netherlands Minister for Spatial Planning and the Environment This unique book provides cutting edge knowledge and analyses of the consequences that climate change will have for sustainable development and poverty reduction within the context of global development Exploring alternative resource management approaches including federal resource management governance ecosystem services digital dematerialization ecological cities biofuels versus food and children and climate change this innovative volume provides fresh insights on the human condition with regards to the current debates on climate change The distinguished contributors examine climate change induced processes that present profound challenges to sustainable development and poverty reduction at the local national and global levels This groundbreaking study will be a welcome addition for graduate and post graduate students in development and environmental studies It will also have great appeal to scientists policy makers and researchers in these fields **Employment,**

Inequality and Globalization Rolph van der Hoeven, 2013-09-13 The nature of globalization and the fallout from the international financial crisis have brought profound changes to societies and economies around the world This book documents that over the last two decades the growth of nonstandard and informal employment has led to greater inequalities This is partly explained by the fact that adjustment policies in the 1980s market liberalization policies in the 1990s and more recently globalization and anti poverty policies did not pay sufficient attention to policies for employment and income redistribution As a response to these trends this book recommends the development of clearer policies for employment and income redistribution These policies should now become an integral part of national and international economic policy making This is even more relevant in the current context of the international financial crisis as Several elements of globalization especially the unfettered markets and the growing inequality have given cause to the current crisis and There is growing evidence that the employment human and social effects of the financial crisis will be felt well after an economic recovery has taken place especially if no corrective action is taken This volume will be of benefit to policymakers scholars and practitioners alike This book was published as a special issue of the Journal of Human Development and Capabilities

Water Justice Rutgerd Boelens, Tom Perreault, Jeroen Vos, 2018-03-15 Water justice is becoming an ever more pressing

issue in times of increasing water based inequalities and discrimination Megacities mining forestry industry and agribusiness claim an increasingly large share of available surface and groundwater reserves Water grabbing and pollution generate poverty and endanger ecosystems sustainability Beyond large visible injustices the book also unfolds the many hidden water world injustices subtly masked as rational equitable and democratic It features critical conceptual approaches including analysis of environmental social cultural and legal issues surrounding the distribution and management of water Illustrated with case studies of historic and contemporary water injustices and contestations around the world the book lays new ground for challenging current water governance forms and unequal power structures It also provides inspiration for building alternative water realities With contributions from renowned scholars this is an indispensable book for students researchers and policymakers interested in water governance environmental policy and law and political geography

Local Governance, Economic Development and Institutions G. Gomez,P. Knorrinda,Georgina M. Gómez,2016-04-08 Development is what most people see as progress in the places where they live and in the ways they live It has to do with public services the ways to complain when these are not delivered properly and the spaces to change power structures It is related to the economy the opportunities to access a secure job a sustainable livelihood and increased welfare while caring for the planet and others It is also linked to the institutions that allow people to live life well using resources ethically and doing business responsibly in relation to other communities and future generations This edited collection examines the interconnections between local governance economic development and institutions by focusing on what initiatives work and under what conditions they do so Based on a variety of theories and empirical data it presents evidence from current experiences around the world revealed by researchers across different continents and several generations

Globalization in Practice N. J. Thrift,Adam Tickell,Steve

Woolgar, William H. Rupp, 2014 The concept of globalization has become ubiquitous in social science and in the public consciousness and is often invoked as an explanation for a diverse range of changes to economies societies politics and cultures both as a positive liberating force and as a wholly negative one While our understanding of the politics economics and social resonance of the phenomenon has become increasingly sophisticated at the macro level this book argues that globalization too often continues to be depicted as a set of extra terrestrial forces with no real physical manifestation except as effects The essays challenge this dominant understanding of globalization from above through explorations of the mundane means by which globalization has been achieved Instead of a focus on the meta political economy of global capitalism the book concentrates on the everyday life of capitalism the not so little things that keep the large forces of globalization ticking over With its eye on the mundane the book demonstrates that a series of everyday and consequently all but invisible formations critically facilitate and create the conditions under which globalization has flourished The emphasis is on concrete moments in the history of capitalism when these new means of regular reproduction were invented and deployed Only by understanding these infrastructures can we understand the dynamics of globalization In short punchy essays by distinguished researchers from across a range of disciplines this book provides a new way of understanding globalization moving away from the standard accounts of global forces economic flows and capitalist dynamics to show how ordinary practices and artefacts are crucial elements and symbols of globalization *Re-Interrogating Civil Society in South Asia* Peter B. Andersen, Rubya Mehdi, Amit Prakash, 2021-03-30 This book offers an overview of the history and development of civil society in three major nations of South Asia Pakistan India and Bangladesh from colonial times to the present It examines the liberalization of civil society since the 1980s the needs it created for civil action the professionalization of civil society organizations and the extent to which civil society may benefit society at large in the context of local national and global transformations in the economy political regime and ideology The reader will find new insights on the interaction between the liberalization of multifaceted civil societies in the three countries presenting contrasts such as restrictions put on women s organizations or labour unions and acceptance of religious organizations activities The volume looks at forms of transfer of civil society models representation and democratic legitimacy of civil society organizations such as nongovernmental organizations government organized NGOs and faith based organizations along with the structuring of civil society through legal frames as well as female religious and ethnic mobilizations around language and literature Using wide ranging empirical data and theoretical analyses it deals with civil society issues relating to human rights and political challenges justice inequality empowerment and the role of bureaucracy women s movements and ethnic and linguistic minorities It also presents early responses to the Covid 19 crisis in 2020 which created significant pressure on the states and on civil society This book will be useful to scholars and researchers of political studies development studies sociology public policy and governance law and human rights as also to professionals in think tanks civil society activists and NGOs

Resource and Environmental Management Bruce Mitchell, 2019 In order to optimally manage the environment and natural resources it is vitally important to recognize that there is much more to consider than just the environment itself and the natural resources it provides A key consideration is also the interrelationship between natural ecosystems and human involvement and behavior This interaction is where the field of environmental resource management comes into play the complex ecological and sociological systems of the natural world intertwined The purpose of this book is to consider such matters and to help readers develop their own capacities as environmental managers and stewards Bruce Mitchell's textbook *Resource and Environmental Management* served as the gold standard for many environmental science courses when the first edition published in 1997 Now twenty years later an updated third edition allows for the inclusion of recent developments The book covers the basic theories and concepts of environmental resource management and guides students to be able to apply those concepts to practical situations By covering basic theories and concepts and by using case studies to show how these have been applied Bruce Mitchell's new edition seeks to ensure that students have competence in both aspects The text enhances the reader's capacity to conduct practice and research in resource and environmental management

Matthew Nicole Wilkinson Duran, James P. Grimshaw, 2013 The Texts Contexts series gathers scholarly voices from diverse contexts and social locations to bring new or unfamiliar facets of biblical texts to light Matthew sheds new light from new perspectives on themes in the Gospel including community land labor and Empire children parents and families health and disabilities and border crossings The authors challenge us to consider how we deal with cultural distances between ourselves and these ancient writings and between one another in the contemporary world

Anthropology and Development Emma Crewe, Richard Axelby, 2013 An exploration of anthropological perspectives on the cultures moralities and politics of the world of aid and development

John Kenneth Galbraith and the Future of Economics B. Laperche, D. Uzunidis, 2005-09-15 This book examines the life and works of John Kenneth Galbraith and demonstrates how his non conventional approach to economics is critical to understanding the trouble that currently exists within economics and economic policies With new perspectives on his work this book proposes new answers to the economic challenges both industrialized and developing economies are facing

The Transformation of Property Regimes and Transitional Justice in Central Eastern Europe Liviu Damşa, 2017-01-03 This volume examines the property transformations in post communist Central Eastern Europe CEE and focuses on the role of restitution and privatisation in such transformations It argues that the theorisation of restitution in post communist CEE is incomplete in the transitional justice scholarship and in the literature on correction of historical wrongs The book also argues that for a more complete theorisation of post communist restitution the transformations of property in post communist societies ought to be studied in a more holistic way The main legal vehicles used for such transformations privatisation and restitution should not be studied separately and in abstract but in their reciprocal relationship and in connection to the dimension of justice which each could achieve Finally

the book integrates privatisation in a theory of post communist transformation of property **Investigating Developmentalism** Dev Nath Pathak,Amiya Kumar Das,2019-06-18 Compiling various strands of the disenchantment with development discourse in contemporary South Asia with specific focus on the cases from India this edited book brings together anthropologists sociologists economists and historians to refresh the understanding of development It introduces ways of thinking otherwise about development discourse and what the contributors term developmentalism the social enchantment with development The cultural discourse of development in contemporary South Asia manifests not only in the official programs of state agencies but in cinema television and mass media Dear to various stakeholders from government leaders and manufacturers to consumers and the electorate is the axiom of a developmental society Organized to bridge familiar understandings of development with radical ways of thinking through developmentalism this book holds value for those engaged in the anthropology and sociology of development development studies South Asian studies as well as for development professionals working for state and non governmental organizations **Handbook of Sustainability and Social Science Research** Walter Leal Filho,Robert W. Marans,John Callewaert,2017-10-26 In this handbook social science researchers who focus on sustainability present and discuss their findings including empirical work case studies teaching and learning innovations and applied projects As such the book offers a basis for the dissemination of information ideas and experiences acquired in the execution of research projects especially initiatives which have influenced behavior decision making or policy Furthermore it introduces methodological approaches and projects which aim to offer a better understanding of sustainability across society and economic sectors This multidisciplinary overview presents the work of researchers from across the spectrum of the social sciences It stimulates innovative thinking on how social sciences influence sustainable development and vice versa Democracy in the Woods Prakash Kashwan,2017-01-02 How do societies negotiate the apparently competing agendas of environmental protection and social justice Why do some countries perform much better than others on this front Democracy in the Woods addresses these question by examining land rights conflicts and the fate of forest dependent peasants in the context of the different forest property regimes in India Tanzania and Mexico These three countries are prominent in the scholarship and policy debates about national forest policies and land conflicts associated with international support for nature conservation This unique comparative study of national forestland regimes challenges the received wisdom that redistributive policies necessarily undermine the goals of environmental protection It shows instead that the form that national environmental protection efforts take either inclusive as in Mexico or exclusive as in Tanzania and for the most part in India depends on whether dominant political parties are compelled to create structures of political intermediation that channel peasant demands for forest and land rights into the policy process This book offers three different tests of this theory of political origins of forestland regimes First it explains why it took the Indian political elites nearly sixty years to introduce meaningful reforms of the colonial era forestland regimes Second it successfully

explains the rather counterintuitive local outcomes of the programs for formalization of land rights in India Tanzania and Mexico Third it provides a coherent explanation of why each of these three countries proposes a significantly different distribution of the benefits of forest based climate change mitigation programs being developed under the auspices of the United Nations In its political analysis of the control over and the use of nature this book opens up new avenues for reflecting on how legacies of the past and international interventions interject into domestic political processes to produce specific configurations of environmental protection and social justice Democracy in the Woods offers a theoretically rigorous argument about why and in what specific ways politics determine the prospects of a socially just and environmentally secure world Included in the Studies in Comparative Energy and Environmental Politics Series
