Education and Globalization in Southeast Asia Lee Hock Guan, 2018-02-14

Prior to the era of globalization education in Southeast Asia was viewed in the context of the national state and it was deployed in the service of state and nation building and national economic development. States monopolized education and public funded centralized education systems were established to teach literacy transmit national cultures and promote social cohesion and to produce literate workers. Globalization forces however dramatically impacted in varying ways and degrees the national education systems across the region. As states began to see their citizens as resources to enhance the countries competitiveness in the global market it among other things led to the increasing demand for highly skilled and qualified human capital. The accompanying neoliberal ideology led to varying degrees of decentralization privatization and internationalization of education especially of higher education in Southeast Asia. The chapters in this volume focus on a number of issues and challenges confronting the education sector in Southeast Asia including i the contrasting language in education policy in Singapore and Malaysia ii the introduction of an English medium private education sector in Malaysia iii the internationalization of Thai higher education iv access and quality issues in the massification of Malaysian higher education v secondary school quality and higher education participation in Indonesia vi equity access and retention in primary school education in Malaysia and vii reforms in the primary and secondary education in Myanmar.
