## **Globalisation Human Rights And Labour Law In Pacific Asia:**

Globalisation, Human Rights and Labour Law in Pacific Asia Anthony Woodiwiss, 1998-04-30 Anthony Woodiwiss's pathbreaking book was the first substantive contribution to a sociology of human rights. In it, he takes up the question of whether so-called Asian values are compatible with human rights discourse and argues against human rights issues being the major obstacle to East-West co-operation. Dr Woodiwiss's sociological and post-structuralist approach to the concept of rights and his incorporation of the transnational dimension into sociological theory enable him to demonstrate how the global human rights regime can accommodate Asian patriarchy while Pacific Asia is itself adapting by means of what he calls enforceable benevolence. His studies of Hong Kong, the Philippines, Malaysia and Singapore highlight similarities between Pacific Asian and Western societies and offer a positive view of the social forces obtaining in these territories. *The Routledge International Handbook of Globalization Studies* Bryan Turner, 2013-01-11 The Routledge International Handbook of Globalization Studies offers students clear and informed chapters on the history of globalization and key theories that have considered the causes and consequences of the globalization process. There are substantive sections looking at demographic, economic, technological, social and cultural changes in globalization. The handbook examines many negative aspects: new wars, slavery, illegal migration, pollution and inequality, but concludes with an examination of responses to these problems through human rights organizations, international labour law and the growth of cosmopolitanism. There is a strong emphasis on interdisciplinary approaches with essays covering sociology, demography, economics, politics, anthropology and history. The Handbook, written in a clear and direct style, will appeal to a wide audience. The extensive references and sources will direct students to areas of further study. **Law and Labour Market Regulation in East Asia** Sean Cooney, Tim Lindsey, Richard Mitchell, Zhu Ying, 2003-08-29 This edited collection examines the labour laws of seven industrializing East Asian societies: China, Indonesia, Malaysia, South Korea, Taiwan, the Philippines and Vietnam, and discusses the variation in their impact across the whole region. Leading scholars from each country consider both laws pertaining to working conditions and industrial relations and those that regulate the labour market as a whole. Legislation concerning migrant labour, gender equality, employment creation and skills formation is also examined. Adopting their own distinct theoretical perspectives, the authors trace the historical development of labour regulation and reveal that most countries in the region now have quite extensive frameworks. This book will be particularly useful to people interested in the place of labour law and law in general in contemporary East Asian societies. *The Routledge International Handbook of Globalization Studies* Bryan Turner, Robert Holton, 2015-12-22 The second edition of the Routledge International Handbook of Globalization Studies offers students clear and informed chapters on the history of globalization and key theories that have considered the causes and consequences of the globalization process. There are substantive sections looking at demographic, economic, technological, social and cultural changes in globalization. The handbook examines many negative aspects: new wars, slavery, illegal migration, pollution and

inequality but concludes with an examination of responses to these problems through human rights organizations international labour law and the growth of cosmopolitanism There is a strong emphasis on interdisciplinary approaches with essays covering sociology demography economics politics anthropology and history The second edition has been completely revised and features important new thinking on themes such as Islamophobia and the globalization of religious conflict shifts in global energy production such as fracking global inequalities fiscal transformations of the state and problems of taxation globalization and higher education and an analysis of the general sense of catastrophe that surrounds contemporary understandings of the consequences of a global world

*The Rule of Law in Singapore* Li-ann Thio, 2025-01-09 This book examines the operation of the rule of law in the non liberal democracy of Singapore The rule of law in Singapore has been both lauded for anchoring efficient and effective government and lambasted for being procedural and statist 21st century Singapore has experienced modest political liberalisation manifesting a paternal democracy where the governor governed relationship is evolving from a father knows best paternalistic mindset to a more consultative approach to governance where dialogue rather than diktat is the norm in a post deferential era The Singapore case study helps pluralise the rule of law as a universal principle which moderates power and may be variously implemented The book examines the reception of the rule of law within the Singapore legal order and how it interacts with constitutional principles like the separation of powers and democracy in the design of constitutional institutions and forging of structural and rights oriented judicial review It considers how the rule of law contoured by legal communitarianism sustains a managed

democracy in relation to legislation governing internal security public assemblies religious harmony and online falsehoods It questions whether the chilling of political speech by strict laws on political defamation and contempt of court has been significantly defrosted by important developments which seek ordered liberty through a more calibrated form of review Lucid and engaging this book will be of interest to researchers working in constitutional law Welfare Capitalism in East Asia I. Holliday,P. Wilding,2003-09-18 Social Policy has been a key dimension of dynamic economic growth in East Asia s little tigers and is also a prominent strand of their responses to the financial crisis of the late 1990s This systematic comparative analysis of social policy in the region focuses on the key sectors of education health housing and social security It sets these sectoral analyses in wider contexts of debates about developmental states the East Asian welfare model and globalization **The Silicon Empire** Michael B. Likosky,2018-01-18 Michael Likosky examines the continuities and discontinuities between colonial and present day high tech transnational legal orders His concern is specifically with the colonial characteristics of the legal order which underpins the global high tech economy He distinguishes the democratic and human rights rhetoric of this economy from a reality wherein the legal order is often used to reproduce colonial type relationships Just as in the colonial period the expansion of trans border commerce overlaps with democratic demands and human rights in complex multifaceted and paradoxical ways Through a case study looking at Malaysia s Multimedia Super Corridor a high tech national development plan and foreign direct investment scheme he examines how the transnational leaders of the high tech economy along with the Malaysian political elite react when human rights problems threaten to derail commercial plans

Law and Society in East Asia Christoph Antons, 2017-07-05 The massive and complex process of change in East Asia over recent decades has brought about a transformation in the nature of law and legal institutions in the region Whilst the process of change has to some degree mimicked western models of law and legal change there have been significant differences in approach due to the different social foundations of East Asian societies The more obvious of these has been the variety of ways in which rule of law ideas have been adopted in many East Asian countries where the role of the state is more dominant when compared with Western models This volume brings together a selection of the most important writings on East Asia of researchers in recent years and shows the broad range of questions which researchers have been addressing about the effect of law reform and legal change in societies dominated by traditional values and political forces and at a time of massive economic change
