Globalisation State And Labour:

Globalisation, State and Labour Peter Fairbrother, Al Rainnie, 2007-05-07 Globalisation State and Labour combines a new theoretical approach with comparative analysis ensuring that it will be of vital interest to anyone concerned with the globalization debate the future of the state and organized labour It shows how although the world is undergoing enormous changes involving politics the economy and society the position and place of the state and the significance of state policy in this process is heavily contested Presenting a timely opportunity to review and re assess the modern state with regards to labour the essays included in this text written by leading researchers in the area develop a new theoretical framework that puts work workers and their organizations at the heart of analyzing state restructuring Using major studies from four countries UK Denmark Australia and New Zealand the contributors challenge many preconceptions regarding globalization and labour organization including the notions that the state is being marginalized by the processes of globalization and that the trade unions are becoming irrelevant *Labor, Globalization and the State* Debdas Banerjee, Michael

Goldfield, 2007-12-13 This book explores the impact of neoliberal globalization on labour markets and the state in the developed and developing world It focuses especially on the United States and the economies of Asia in particular India Liberalized trade and investment are thought by neoliberals to be the best levers for raising labour standards provided labour market flexibility and capital market restructuring accompany them Labour market flexibility and capital market restructuring at a first glance appear to be complementary and symmetric policies In practice however they might have very asymmetric consequences This book addresses these issues and it presents a comprehensive analysis of the key questions such as How far is globalization a real threat to the conventional systems of wage fixation employment pattern and basic rights at work in both developed as well as underdeveloped countries Are casualization and informalization of the workforce direct outcomes of deregulation How do labour organizations cope with the volatility of the labour market Are the existing labour market conditions and forms of labour organizations misfits in the globalized business world Is it at all feasible to choose a high road that combines some degree of labour market flexibility with better labour standards This book will be of interest to academics working on International Development Development Economics Political Economy Comparative Labour Studies and Asian Studies

Globalisation,, Knowledge and Labour Mario Novelli, Anibel Ferus-Comelo, 2009-12-16 Knowledge is playing an important role in the development of contemporary capitalism This book addresses the questions such as how labour movements learn and what strategies they deploy to defend their interests *The Global Economy, National States and the Regulation of Labour* Paul Edwards, Tony Elger, 2014-06-03 The implications of globalization for labour are more often asserted than analyzed This collection and its companion volume Globalization and Patterns of Labour Resistance edited by Jeremy Waddington seek to remedy this deficiency by presenting contemporary research on the relationship between the globalization of production and the regulation of labour It considers the ways in which national and

supra national regimes of labour regulation are being actively reconstructed in the context of the internationalization of production The contributors analyze the implications of changes in different national labour regimes for relations between state capital and labour and for class and gender segmentation and discuss the scope and limits of recent initiatives in the implementation of international labour standards Handbook on Globalisation and Labour Standards Elliott, Kimberly A.,2022-03-15 This comprehensive Handbook explores the complex and volatile debate over globalisation and labour standards It offers key insights into the impact of globalisation on workers the obligations of corporations and international legal bodies in protecting workers rights and maximising the opportunities offered by international trade and investment

Labour and Globalisation Ronaldo Munck,2004-01-01 It is often assumed that social movements such as that of labour will simply be overwhelmed by the changes brought about by globalisation This volume points to this conclusion as at best premature and possibly also misguided *Unions and Globalisation* Peter Fairbrother,John O'Brien,Anne Junor,Michael O'Donnell,Glynne Williams,2011-09-15 In recent decades trade unions have suffered major reversals and experienced declining memberships Transnational corporations and state owned multi nationals have increasingly implemented deteriorating terms and conditions of employment with vulnerable and insecure job contracts In this context there has been a wide ranging debate about the form of trade unionism the bases for collective organization and struggle and the future of trade unionism This book addresses these questions both theoretically in relation to debates as well as substantively via a series of selected studies It is a must read for all those studying industrial relations human resource management the sociology of work and employment economic sociology economic and labor geography and business studies in general

International Trade, Labor Relations, and Bargaining Power Matthew M. Fischer-Daly,2023-04-28 International Trade Labor Relations and Bargaining Power International Strawberry Commodity Networks examines power in the commercial food system through the history of always available strawberries Applying an interdisciplinary approach to case studies on strawberry production and sales in Mexico Spain and the United States the author untangles the symbiotic relationships between the economic boom and labor strife in the sector By comparing workers struggles in the sector he develops a novel model of workplace bargaining power in which the process of dignity catalyzes change Since international trade in strawberries began three decades ago the sector s growth has paralleled the rise of retailer dominance of food sales Highlighting inequitable gains from the sales boom workers have organized mass strikes boycotts and pressure campaigns The divergent results ranged from ephemeral acknowledgments of workers concerns to the establishment of union collective bargaining and steadily improving working conditions Grounded in extensive research the book provides fresh analytical approaches to understanding the social dimensions of international trade and workplace bargaining power The book unpacks the relationship between poor working conditions and economic growth by applying a new method international commodity network analysis which builds on prior global supply chain approaches It explains differences in workers initiatives to

improve employment conditions by identifying the process of dignity in the creation of solidarity

Regulating Labour in the Wake of Globalisation Brian Bercusson, Cynthia Estlund, 2008-01-10 In recent decades the prevailing response to the problem of unacceptable labour market outcomes in both Europe and North America national regulation of labour standards and labour relations coupled with collective bargaining has come under increasing pressure from the economic and technological forces associated with globalisation As those forces have shifted power away from national governments and labour unions and toward capital the appropriate institutional locus of labour regulation has become hotly contested There have been efforts to move the locus of regulation downward to smaller units of governance including firms themselves upward to larger units such as regional federations and international organizations and outward to non governmental organizations and civil society In this volume labour relations scholars from North America and Europe examine the efficacy of these emerging forms of labour regulation their democratic legitimacy the goals and values underlying them and the appropriate direction of reform

Non-State Actors and Authority in the Global System Andreas Bieler, Richard Higgott, Geoffrey Underhill, 2004-01-14 Traditionally in International Relations power and authority were considered to rest with states But recently in the light of changes associated with globalisation this has come under scrutiny both empirically and theoretically This book analyses the continuing but changing role of states in the international arena and their relationships with a wide range of non state actors which possess increasingly salient capabilities to structure global politics and economics

Labour, the State, Social Movements & the Challenge of Neo-Liberal Globalisation Andrew Gamble, 2007-07-15 With the emergence of neo liberalism in the 1980 s as the dominant domestic and international political economic orthodoxy labor as both a social category and political movement tended to be written off or ignored by academics politicians and commentators However at a time when the world s working class is growing faster than at any previous time in history and neo liberalism is widely challenged this orthodoxy is clearly inadequate The spread of global production means that to ignore labor its organizations interests and politics is to ignore one of the key components of that process Labor organizations have not gone away and neither has the state their relationship remains as significant as ever

The Struggle for Labour's Soul Raymond Plant, Matt Beech, Kevin Hickson, 2004 Contributors ranging from Chancellor Gordon Brown to the Guardian newspaper s Polly Toybee discuss the Labour Party s political philosophy and address key topics like globalization constitutional reform equality and the third way

The Political Economy of Work in the Global South Anita Hammer, Adam Fishwick, 2020-03-28 Part of the Critical Perspectives on Work and Employment series this edited collection brings together contributions from leading international scholars to initiate an important dialogue between labour process analysis and scholarship on work in the Global South This book characterises the forms of work and

labour process that characterise globalising capitalism today and addresses core analytical concerns within Labour Process Theory and research on work in the South It explores how a wide range of production relations in the Global South ranging from formal to informal employment and self employment are embedded in wider social relations of gender caste religion and ethnicity and are related to wider patterns of commodification and resistance Drawing on cutting edge research the book s chapters consider a diverse range of working situations covering migrant workers in the Middle East commercial surrogacy work in India and cooperative garment workers in Argentina In offering a novel reading of the political economy of work in the Global South and shedding light on lesser considered fields of work and worker organization this volume will provide new insights for making sense of the changing world of work for students scholars labour activists and practitioners alike

Labor, Global Supply Chains, and the Garment Industry in South Asia Sanchita Saxena,2019-06-27 This book argues that larger flaws in the global supply chain must first be addressed to change the way business is conducted to prevent factory owners from taking deadly risks to meet clients demands in the garment industry in Bangladesh Using the 2013 Rana Plaza disaster as a departure point and to prevent such tragedies from occurring in the future this book presents an interdisciplinary analysis to address the disaster which resulted in a radical change in the functioning of the garment industry The chapters present innovative ways of thinking about solutions that go beyond third party monitoring They open up possibilities for a renewed engagement of international brands and buyers within the garment sector a focus on direct worker empowerment using technology the role of community based movements developing a model of change through enforceable contracts combined with workers movements and a more productive and influential role for both factory owners and the government This book makes key interventions and rethinks the approaches that have been taken until now and proposes suggestions for the way forward It engages with international brands the private sector and civil society to strategize about the future of the industry and for those who depend on it for their livelihood A much needed review and evaluation of the many initiatives that have been set up in Bangladesh in the wake of Rana Plaza this book is a valuable addition to academics in the fields of development studies gender and women s studies human rights poverty and practice political science economics sociology anthropology and South Asian studies

Historical Materialism and Globalisation Mark Rupert,Hazel Smith,2016-04-29 Now that Soviet style socialism has collapsed upon itself and liberal capitalism offers itself as the natural necessary and absolute condition of human social life on a worldwide scale this book insists that the potentially emancipatory resources of a renewed and perhaps reconstructed historical materialism are more relevant in today s world than ever before Rather than viewing global capitalism as an eluctable natural force these

essays seek to show how a dialectic of power and resistance is at work in the contemporary global political economy producing and contesting new realities and creating conditions in which new forms of collective self determination become thinkable and materially possible It will be vital topical reading for anyone interested in international relations international political economy sociology and political theory

International Labour Migration in the Middle East and Asia Kwen Fee Lian, Naomi Hosoda, Masako Ishii, 2019-08-22 The discourse on migration outcomes in the West has largely been dominated by issues of integration but it is more relevant to view immigration in non Western societies in relation to practices of exclusion and inclusion Exclusion refers to a situation in which individuals and groups are usually denied access to the goods services activities and resources associated with citizenship However this approach has been criticised in relation to gender issues which are very relevant to the situation of migrants The authors in this volume address this criticism Furthermore when framed within a North South discourse it may be potentially ethnocentric to assume that the experience of exclusion is cross culturally uniform Indeed work on migration issues has invariably been conducted within such a discourse The contributors go beyond this binary discourse of exclusion versus inclusion which has dominated migration research They examine the situation of migrants in the Middle East and Asia as one that encompasses both exclusion and inclusion addressing related concepts of empowerment ethnocracy the feminisation of migration and gendered geographies of power liberal constraint and multiculturalism individual agency migrant friendly discourses spaces of emancipation and spaces of insecurity The book highlights current research in the Arab Gulf states and examines multiculturalism in Asia more broadly It will be of particular interest to students and researchers in international labour migration studies in the Middle East and Asia

Globalisation and Education Policy Reform in Botswana Richard Tabulawa, 2023-07-21 This book uses the global local dialect approach to explicate education policy reform in Botswana and interrogates the practical effects of the various education policies on curriculum pedagogy and governance of the Botswana General Education system Considering the effect of three reform policies since Botswana's Independence in 1966 the book evaluates the performance of each of the policies and examines their consequences in terms of the interplay of global forces and domestic pressures The result of this interplay has been an education landscape that while reflecting globally circulating education discourses markedly differs from those same discourses The book argues that the State in Botswana has appropriated education policy to legitimate itself in times of crisis and that each policy has improved access to general education but collectively have failed to improve its quality making suggestions for how this can be improved in the future As the first book of its kind to delve into education in Botswana from a single authored critical lens the book will be a highly relevant reading for academics researchers and post graduate students of African education comparative education education policy and curriculum studies
