Globalization And A High Tech Economy:

Globalization and a High-Tech Economy Ashok Bardhan, Dwight Jaffee, Cynthia Kroll, 2007-05-08 High technology and globalization are arguably the two most important forces driving the US economy today This book analyzes how they interact and the implications of that interaction The methodology applies data and statistical analysis to determine the impact of these forces over a broad spectrum of the US economy Key topics addressed include why the US economy runs a continuing trade deficit in manufactured high tech goods why high tech firms steadily lose manufacturing jobs while creating professional jobs and why high tech industries rely on foreign outsourcing for much of their manufacturing

High Tech and High Heels in the Global Economy Carla Freeman, 2000-03-15 High Tech and High Heels in the Global Economy is an ethnography of globalization positioned at the intersection between political economy and cultural studies Carla Freeman's fieldwork in Barbados grounds the processes of transnational capitalism production consumption and the crafting of modern identities in the lives of Afro Caribbean women working in a new high tech industry called informatics It places gender at the center of transnational analysis and local Caribbean culture and history at the center of global studies Freeman examines the expansion of the global assembly line into the realm of computer based work and focuses specifically on the incorporation of young Barbadian women into these high tech informatics jobs As such Caribbean women are seen as integral not simply to the workings of globalization but as helping to shape its very form Through the enactment of professionalism in both appearances and labor practices and by insisting that motherhood and work go hand in hand they re define the companies profile of ideal workers and create their own pink collar identities Through new modes of dress and imagemaking the informatics workers seek to distinguish themselves from factory workers and to achieve these new modes of consumption they engage in a wide array of extra income earning activities Freeman argues that for the new Barbadian pink collar workers the globalization of production cannot be viewed apart from the globalization of consumption In doing so she shows the connections between formal and informal economies and challenges long standing oppositions between first world consumers and third world producers as well as white collar and blue collar labor Written in a style that allows the voices of the pink collar workers to demonstrate the simultaneous burdens and pleasures of their work High Tech and High Heels in the Global Economy will appeal to scholars and students in a wide range of disciplines including anthropology cultural studies sociology women's studies political economy and Caribbean studies as well as labor and postcolonial studies

Globalization, Technology, and Philosophy David Tabachnick, Toivo

Koivukoski,2012-02-01 Rather than focusing on political economic or social manifestations of technology and globalization this book examines these related phenomena from a philosophical perspective Prominent thinkers from philosophy sociology and political science reflect on a variety of important topics and individuals including the Internet citizenship individuality the human condition spirituality Nietzsche Heidegger Kojve and Strauss The contributors ask whether political community and citizenship are still possible in an age of technology and globalization and what it means to be human in a globalized technological society *Emerging Nodes in the Global Economy: Frankfurt and Tel Aviv Compared* D. Felsenstein,E.W. Schamp,A. Shachar,2013-03-14 Cities form one of the principal arenas in which globalization processes are manifest Much of the interest in the urban outcomes of globalization is focused on a limited number of iconic global or world cities Most places however will never attain that status They are more likely to play limited and specialized roles in a world economy increasingly dominated by flows Emerging Nodes in a Global Network looks at the temporal and volatile ways in which two such cities Frankfurt and Tel Aviv engage the global economy The central thesis of the book contends that the current round of globalization is characterized by places selectively functioning as nodes within global networks Drawing on a combination of qualitative and quantitative empirical studies of leading sectors in Frankfurt and Tel Aviv financial and business services high technology air transportation tourism and cultural industries the process of network formation is systematically analyzed and the role of national and regional policy is highlighted Audience This book will be of major interest to academics researchers practitioners and policy makers in the areas of urban and economic geography public policy and economic development It also provides valuable material for government officials and regional and national agencies involved in metropolitan planning and development *Technology Transfer in a Global Economy* David B. Audretsch,Erik E. Lehmann,Albert N. Link,Alexander Starnecker,2012-12-16 Technology transfer the process of sharing and disseminating knowledge skills scientific discoveries production methods and other innovations among universities government agencies private firms and other institutions is one of the major challenges of societies operating in the global economy This volume offers state of the art insights on the dynamics of technology transfer emerging from the annual meeting of the Technology Transfer Society in 2011 in Augsburg Germany It showcases theoretical and empirical analyses from participants across the technology transfer spectrum representing academic educational policymaking and commercial perspectives The volume features case studies of industries and institutions in Europe the United States and Australasia explored through a variety of methodological approaches and providing unique contributions to our understanding of how and why technology transfer is shaped and affected by different institutional settings with implications for policy and business decision making **Global Economy, Global Technology, Global Corporations** National Research Council,Policy and Global Affairs,Office of International Affairs,Committee on Japan,1998-05-17 *Corporate Power, Class Conflict, and the Crisis of the New Globalization* Ronald W. Cox,2019-01-14 Transnational corporations have used their market and political power in the U S

the European Union and Japan to expand global production on terms that are highly favorable to corporate interests Through a detailed history of the establishment of global value chains Ronald W Cox examines how corporations have internationalized production by working directly with political elites to establish terms of investment and trade that facilitate working class exploitation He also examines the political implications of the growing gap between the global rich and the working class including the increasing illegitimacy of corporate backed governments in the United States and the European Union The author concludes the book with suggestions for how the global working class can fight for their own interests in the context of the rising threats of far right extremism and neo fascist political movements

Zhang,2005-12-19 First Published in 2017 Routledge is an imprint of Taylor Francis an Informa company **Global Issues beyond Sovereignty** Maryann Cusimano Love,2019-10-07 Other global issues books are a rather eclectic mash up of topics

headlines du jour with an and now this organizational scheme The hot topics may have cooled by press time and the presentation to students is disjointed not clear The approach is often a scare em and leave em presentation of a global horror show of problems without clear arguments about the connections among the issues or integrated discussions of solutions In contrast *Global Issues Beyond Sovereignty* provides a thesis and a common narrative throughout the issue chapters The range of responses to manage global issues are compared and discussed throughout Global problems move at internet speed governments do not move so quickly This creates gaps in what citizens expect the state to do and what countries have the capacities to do This paradox is a problem not only for weak or failing states even the strongest states in the system struggle in how to effectively respond to global issues from cybersecurity to environmental toxins States cannot solve or manage trans sovereign issues alone The power of the private sector is growing both legal and illegal for profit and non profit while state power is flat or in some places declining While private sector actors have means to impact transnational issues they do not have a public mandate to do so Countries increasingly must learn how to play well with others this is easier said than done Attempts to manage global issues flow through three channels public sector responses private sector responses and mixed public private partnerships All three channels are explored throughout the book uniting the issue chapters in a common discussion of challenges and responses The conclusion presents lessons learned for theory and practice from managing global issues
