Audretsch, Thomas Gries, Hariolf Grupp, 2013-03-14 In the new global economy more countries have opened up to international competition and rapid capital flows However in the triad the process of globalization is rather asymmetric With a rising role of multinational companies there are favorable prospects for higher global growth and economic catching up respectively Theoretical analysis suggests key ingredients of sustained growth but there is also a new concept of a long term equilibrium income gap in which convergence is rather unlikely The analysis also picks up European and US labor market issues in the context of economic globalization and raises the question of which EU policies in the field of labor market reform and of innovation policies are adequate *IMF Staff Papers, Volume 56, No. 1* International Monetary Fund. *The Palgrave Handbook of Development Economics* Machiko Nissanke, José Antonio Ocampo, 2019-08-12 This Handbook responds to the needs and aspirations of current and future generations of development economists by providing critical reference material alongside or in relation to mainstream propositions Despite the potential of globalisation in accelerating growth and development in low and middle income countries through the spread of technology knowledge and information its current practice in many parts of the world has led to processes that are socially economically and politically and ecologically unsustainable It is critical for development economists to engage with the pivotal question of how to change the nature and course of globalisation to make it work for inclusive and sustainable development Applying a critical and pluralistic approach the chapters in this Handbook examine economics of development paths under globalisation focusing on sustainable development in social environmental institutional and political economy dimensions It aims at advancing the frontier of development economics in these key

aspects and generating more refined policy perspectives It is critically reflective in examining effects of globalisation on development paths to date and in terms of methodological and analytical approaches as well as forward thinking in policy perspectives with a view to laying a foundation for sustainable development      Leading Economic and Managerial Issues Involving Globalization Jacques-Marie Aurifeille, 2005 This new book deals with the major consequences of growing globalisation for economies for economic behaviour and for business behaviour and performance It covers managerial business behaviour such as in business partnerships and marketing microeconomic and macroeconomic topics and considers adjustments in managerial behaviour and economic policies that occur or are needed in a globalising world Both applied and theoretical aspects are discussed Its coverage should interest among others those in business management marketing economics macroeconomics microeconomics industry economics managerial economics economic development international economics monetary economics and finance
