and the multiple unintended uses of Internet and mobile technologies Notwithstanding the contemporary context Donald s arguments consider a range of media deployment that although not especially new in technological terms offer new insights into a formalized Chinese media system for children Scholars and students of Asian and children s film and education will find this unique work a fascinating window into Chinese culture and society and a provocative exploration of media culture

**Corporate Governance** Vasudha Joshi, 2004 Corporate governance is part of an economy s system which has today become the most important mechanism for resource allocation It is affected by capital market block holders institutional investors proxy wars company law and capital market regulations and many other macro economic as well as political factors Historical evolution of corporate governance naturally has a bearing on current developments This book is an attempt to weave these factors together coherently Much of the concerned literature revolves around the agency problem while in developing countries expropriation of small shareholders is the governance problem However shareholder activism is not likely to resolve the issue Many more measures from audit committees of the board rigorous disclosures exercise of voting rights by institutional investors strict monitoring by capital market regulator to takeover bids are required to ensure corporate accountability

*e-Economy* Leslie Budd, Lisa Harris, 2004-09-30 As dot com became dot bomb the hype that surrounded the meteoric growth of the network economy has given way to realism or even scepticism about the potential of ICT as a source of new business models It is now appropriate to reflect critically on the e economy hype and to use this as a way of looking forward to new more realistic possibilities

**International Economic Governance in a Multipolar World**

Radhika Desai,2022-04-19 This book covers key aspects of the governance of the world economy from the structures of capitalism to regional economic integration through the trading and production systems International economic governance was already in crisis well before the pandemic and talk of the crisis of multilateralism and of the postwar Bretton Woods arrangements had become commonplace The pandemic with its economic political and international reverberations has only widened and deepened that crisis which has now taken the form of a new cold war on China and made the search for solutions more urgent In this context the chapters in this volume contribute to a deeper understanding of how international economic governance and the world economy have been changing over the long run and provide insights into the new forms they are taking at the macro and micro levels The book covers the crisis of capitalism revealed by the pandemic particularly when contrasted with socialist countries initiatives of regional economic integration that challenge rather than being subordinated by western powers including the US the evolution of the trade regime in ways that make contemporary trade wars intelligible and the shakeup of the international production system The chapters in this book were originally published as a special issue of *The Japanese Political Economy Technology, Globalization, and Sustainable Development* Nicholas A. Ashford, Ralph P. Hall,2011-10-18 In this work the authors offer a unified transdisciplinary approach for achieving sustainable development in industrialized nations They present an insightful analysis of the ways in which industrial states are unsustainable and how economic and social welfare are related to the environment public health and safety **Science, Technology and Innovation Policies for Development** Gustavo Crespi, Gabriela Dutrénit,2014-04-11 This book examines the implementation of science technology and innovation STI policy in eight Latin American countries and the different paths these policies have taken It provides empirical evidence to examine the extent to which STI policies are contributing to the development of the region as well as to the solution of market failures and the stimulus of the region s innovation systems Since the pioneering work of Solow 1957 it has been recognized that innovation is critical for economic growth both in developed and in less developed countries Unfortunately Latin America lags behind world trends and although over the last 20 years the region has established a more stable and certain macroeconomic regime it is also clear that these changes have not been enough to trigger a process of innovation and productivity to catch up Against this rather grim scenario there is some optimism emerging throughout the region After many years of inaction the region has begun to invest in science technology and engineering once again Furthermore after many changes in innovation policy frameworks there is now an emerging consensus on the need for a solution to coordination failures that hinder the interaction between supply and demand Offering an informative and analytic insight into STI policymaking within Latin America this book can be used by students researchers and practitioners who are interested in the design and implementation of innovation policies This book also intends to encourage discussion and collaboration amongst current policy makers within the region **Sustainable Prosperity in the New Economy?** William Lazonick,2009 This book provides an alternative perspective on how corporate

resource allocation can contribute to the achievement of sustainable prosperity

**Innovation and Institutions** Steven Casper, Frans van Waarden, 2005-01-01 The idea behind this book is that institutions are important when it comes to explaining the specialisation and performance of national innovation systems The idea is not new But largely the institution concept has remained somewhat vague and unspecified in the literature This book is valuable since it succeeds in opening up the black box of institutions and organisations The distinction between institutions at different levels and how they link up and form a systemic whole is especially original and fruitful The interdisciplinary team behind the book has also produced a welcome antidote to the current tendency to benchmark innovation systems exclusively on the basis of quantitative indicators The analysis demonstrates that some national systems do better in some specific areas because of being supported by institutions that are sometimes deeply rooted in history and culture This is why imitating best practice across countries is not a straight forward thing to do Bengt ke Lundvall Aalborg University Denmark Innovation and Institutions is an extensive elaboration on the make up of systems of innovation It examines why some countries are more innovative than others why national styles of innovation differ and goes on to explore why some countries make radical innovations but fail to successfully market them whilst others making incremental innovations have more commercial success The book draws on a variety of different literatures and perspectives to illustrate the organizational and institutional dimensions of national innovation systems Literatures discussed include the economics of innovation organizational sociology administrative science institutional economics organizational learning network analysis business systems economic governance and regulation This truly interdisciplinary book will be invaluable to academics and researchers focussing on innovation in a wide range of fields It will also strongly appeal to practitioners and policymakers concerned with innovation

Corporate Governance and Sustainable Prosperity W. Lazonick, M. O'Sullivan, 2001-11-14 How can we explain the persistent worsening of the income distribution in the United States in the 1980s and 1990s What are the prospects for the re emergence of sustainable prosperity in the US economy over the next generation Situating these questions within a wider context through historical analysis and comparisons with Germany and Japan this book focuses on the microeconomics of corporate investment behaviour and the macroeconomics of household saving behaviour Specifically the contributors analyze how the combined pressures of excessive corporate growth international competition and intergenerational dependence have influenced corporate investment over the past two decades They also offer a perspective on how corporate investment in skill bases can support sustainable prosperity with studies drawn from the machine tool aircraft engine and medical equipment industries
