Globalization The State And Violence:

Globalization, the State, and Violence Jonathan Friedman, 2004-09-08 Friedman and a distinguished group of contributors offer a compelling analysis of globalization and the lethal explosiveness that characterizes the current world order. In particular, they investigate global processes and political forces that determine networks of crime, commerce, and terror, and reveal the economic, social, and cultural fragmentation of transnational networks. In a critical introduction, Friedman evaluates how transnational capital represents a truly global force, but geographical decentralization of accumulation still leads to declining state hegemony in some areas and increasing hegemony in others. The authors examine the growth and increasing autonomy of indigenous populations and the massively destabilizing effect of migration processes. They describe the rapid increase in criminalization of ethnic and immigrant groups, as well as an increase in class stratification creating new forms of social confrontation and violence. In addition to ethnic identity-based conflict, there are analyses of transnational criminal networks which also represent disintegration of larger homogeneous territories or hierarchical orders. The authors ask us to reevaluate the dynamics of globalization, the contradictions of centralization and fragmentation around the world, as we discover how best to transform these conditions for the future. This research was originally funded by the Harry Frank Guggenheim Foundation. *Globalization, the State, and Violence* Jonathan Friedman, 2003 A dozen essays by US and European urbanists, anthropologists, sociologists, and political scientists develop an approach to understanding the increasing violence that has occurred on a global scale over the past couple of decades and try to construct a more adequate comprehension of global processes than has been provided in the language of globalization. Among the topics are class projects, social consciousness, and the contradictions of globalization and the case for citizenship as social contract.

State Terror, State Violence Bettina Koch, 2015-12-16 The volume critically discusses theoretical discourses and theoretically informed case studies on state violence and state terror. How do states justify their acts of violence? How are these justifications critiqued? Although legally state terrorism does not exist, some states nonetheless commit acts of violence that qualify as state terror as a social fact. In which cases and under what circumstances do illegitimate acts of violence qualify as state terrorism? Geographically, the volume covers cases and discourses from the Caucasus, South East and Central Asia, the Middle East, and North America.
