Evaluation of Translation Technology Walter Daelemans, Véronique Hoste, 2010. This collection of scholarly articles asks the question: How useful is translation technology? Pointing to the need for a widely used and reliable way to test the efficiency of language translation programs, the presenters show that commercial tools such as translation memories and translation workbenches are popular and their developers find them useful in terms of productivity, consistency or quality. However, these claims are rarely proven using objective comparative studies and this group describes several new statistical approaches to more rigorous evaluation methods. *Product Description*. *Localizing Apps* Johann Roturier, 2015-05-08.
