Globalizing Interests:

Globalizing Interests Michael Zurn, 2012-02-01 Globalizing Interests is an innovative study of globalization from inside looking at the reaction of nationally constituted interest groups to challenges produced by the denationalization process The contributors focus on business associations trade unions civil rights organizations and right wing populists from Canada Germany Great Britain and the United States and examine how they have responded to three extremely globalized issue areas the Internet migration and climate change What they find is that the politics of denationalization is a new game with new rules new teams and surprisingly broad support for governance beyond the nation state **Globalizing Interests**

Michael Zurn, Gregor Walter, 2006-06-01 Examines how national interest groups respond to the international pressures of globalization **Global Studies** Tuo Cai, Zhenye Liu, 2020-06-07 Since the 1950s globalization has been an increasingly irresistible trend and one that has exerted a tremendous impact on the political economic military environmental and social fortunes of mankind and yet existing theories in humanities and social sciences have been fundamentally built upon the traditional nation state model These two volumes a pioneering work on global studies to be published out of China aim at creating a new theoretical framework against the backdrop of globalization This volume discusses globalization on the supranational level The editors reveal the complexity of global studies by examining the multi level and multi dimensional nature of globalization analyzing processes and systems of global society against the backdrop of globalization and exploring the construction of a stable and rational global order These two volumes are an essential reference for scholars and students in politics economics international relations and law An Introduction to Global Studies Tuo Cai, Zhenye Liu, 2022-07-30

Since the 1950s globalization has been an increasingly irresistible trend and one that has exerted a tremendous impact on the political economic military environmental and social fortunes of mankind and yet existing theories in humanities and social sciences have been fundamentally built upon the traditional nation state model These two volumes a pioneering work on global studies to be published out of China aims at creating a new theoretical framework against the backdrop of globalization Volume 1 introduces the core concepts and discusses the critical issues of globalization while the editors redefine notions of politics economics law and globality while deploying globalization as a theoretical framework Volume 2 examines the multi level and multi dimensional nature of globalization analysing processes and systems of global society in the light of globalization and exploring the construction of a stable and rational global order These two volumes of global studies are an essential reference for scholars and students in politics economics international relations and law *Global Stakeholder Democracy* Terry Macdonald, 2008-08-07 A pressing question at the forefront of current global political debates is how can we salvage the democratic project in the context of globalization In recent years political activists have mounted high profile campaigns for the democratization of powerful international institutions such as the World Bank and IMF and for greater corporate accountability In turn many of the NGOs linked to these campaigns have themselves faced demands for

greater democratic legitimacy Global Stakeholder Democracy responds to these challenges by outlining an innovative theoretical and institutional framework for democratizing the many state and non state actors wielding public power in contemporary global politics In doing so the book lays out a promising new agenda for global democratic reform Its analysis begins with the recognition that we cannot simply recreate traditional constitutional and electoral institutions of democratic states on a global scale through the construction of a democratic super state Rather we must develop new kinds of democratic institutions capable of dealing with the realities of global pluralism and democratizing powerful non state actors as well as states Through reflecting on the democratic dilemmas surrounding the political power of global NGOs the book mounts a powerful challenge to the state centric theoretical assumptions that have underpinned the established democratic theories of both cosmopolitan and communitarian liberals In particular it challenges the widespread assumption that sovereign power bounded national or global societies and electoral processes are essential institutional foundations of a democratic system The book then re thinks the democratic project from its conceptual foundations posing the questions What needs to be controlled Who ought to control it How could they do so In answering these questions the book develops a novel theoretical model of representative democracy that is focused on plural state and non state actors rather than on unitary state structures It elaborates a democratic framework based on the new theoretical concepts of public power stakeholder communities and non electoral representation and illustrates the practical implications of these proposals for projects of global institutional reform

Global Governance Timothy J. Sinclair, 2004 *Globalization and Transnational Capitalism in Asia and Oceania* Jeb Sprague, 2015-12-15 News headlines warn of rivalries and competing nations across Asia and the Pacific even as powerful new cross border relations form as never before This book looks behind the Asia Pacific curtain at the new forms of social economic and political integration taking place through a global capitalism that is rife with contradictions inequality and crisis We are moved beyond traditional conceptualizations of the inter state system with its nation state competition as the core organizing principle of world capitalism and the principal institutional framework that shapes the makeup of global social forces These important studies examine and debate over how there is a growing transnationality of material economic relations in the global era as well as an emerging transnationality of many social and class relations How does transnational capitalist class fractions new middle strata and labor undergird globalization in Asia and Oceania How have states and institutions become entwined with such processes This book provides insight into a field of dynamic change

The Global Public Sphere Ingrid Volkmer, 2014-07-17 Over the last several years the debate about publics seems to have newly emerged This debate critically reflects the Habermasian ideal of a national public sphere in a transnational context However it seems that the issue of a reconstruction of a global public sphere is more complex In this brilliant and provocative book Ingrid Volkmer argues that a reflective approach of globalization is required in order to identify and deconstruct key strata of deliberate public discourse in supra and subnational societal formations This

construction helps to understand the new processes of legitimacy at the beginning of the 21st century in which the traditional conception of a public and its role as a legitimizing force are being challenged and transformed. The book unfolds this key phenomenon of global deliberate interconnectedness as a discursive and negotiated dimension within reflective globalization, i.e. continuously constituting, maintaining and refining the life of the global public and conceptualizes a global public sphere. Offering insightful case studies to illustrate this new theory of the global public sphere, the book will be essential reading for students and scholars of media and communication studies and social and political theory.

Frontiers of Globalization Research: Ino Rossi, 2007-03-21 To bring this volume together, the editor asked leading scholars in the field of globalization to outline a research framework that reflects their own approach to the subject. The resulting book presents a broad spectrum of analytical approaches to globalization. Theoretical reviews are complemented by substantive chapters and methodological analyses. Contributors include scholars in the fields of sociology, anthropology, history and political science. These writings have been organized into four sections: theoretical perspectives and cultural globalization, economic globalization, political globalization and methodological approaches.

Readings in Globalization George Ritzer, Zeynep Atalay, 2010-03-01 This unique and engaging anthology introduces students to the major concepts of globalization within the context of the key debates and disputes. Introduces globalization through its basic concepts rather than thematically, a distinctive approach that provides students with a better grasp of what social science has to offer on the topic. Utilizes concepts from interdisciplinary sources, bringing together work from key figures across a number of fields, from Weber and Marx to contemporary figures in the field, including Beck, Bauman, Castells and Homi Bhabha. Includes excerpts to illustrate ideas at an appropriate level of difficulty for an undergraduate audience. Offers all of this in the dynamic context of major debates surrounding the basic concepts and the fundamental realities of globalization. Designed so it can be used independently or alongside Ritzer's *Globalization: A Basic Text* for a complete student resource.

Critical Globalization Studies Richard P. Appelbaum, William I. Robinson, 2005 First Published in 2005 Routledge is an imprint of Taylor & Francis, an informa company.

Chinese Perspectives on Global Governance and China, 2021-10-25 The acceleration of globalization and the rise of China are among the most important events in the 21st century. Globalization is a double-edged sword for human society. There is a strong belief among the international community that global governance is the most effective solution to most of our global problems. In this volume, Chinese scholars contribute to the study of global governance by exploring ways to effectively face the tough challenges brought by globalization, such as economic prosperity, environmental issues and global security.

Cities in a Globalizing World UN-Habitat, 2012-06-25 The world has entered the urban millennium. Nearly half the world's people are now city dwellers, and the rapid increase in urban population is expected to continue, mainly in developing countries. This historic transition is being further propelled by the powerful forces of globalization. The central challenge for the international community is clear: to make both urbanization and globalization

work for all people instead of leaving billions behind or on the margins Cities in a Globalizing World Global Report on Human Settlements is a comprehensive review of conditions in the world's cities and the prospects for making them better safer places to live in an age of globalization I hope that it will provide all stakeholders foremost among them the urban poor themselves with reliable and timely information with which to set our policies right and get the machinery of urban life moving in a constructive direction From the Foreword by Kofi Annan Secretary General United Nations Cities in a Globalizing World presents a comprehensive review of the world's cities and analyses the positive and negative impacts on human settlements of the global trends towards social and economic integration and the rapid changes in information and communication technologies In this Global Report the United Nations Centre for Human Settlements Habitat draws on specially commissioned and contributed background papers from more than 80 leading international specialists The report focuses on recent trends in human settlements and their implications for poverty inequity and social polarization It develops advance knowledge for urban planning and management policies in support and promotion of inclusive cities and good urban governance This major and influential report is the most authoritative and up to date assessment of human settlements conditions and trends Written in clear non technical language and supported by informative graphics case studies and extensive statistical data it should be an essential tool and reference for academics researchers planners public authorities and civil society organizations around the world

The Broken Promise of Global Advocacy Marcel Hanegraaff, Arlo Poletti, 2022-06-27 The Broken Promise of Global Advocacy addresses two key normative debates associated with the rise of transnational advocacy whether global interest communities are biased in favor of wealthier countries and whether the growth of global advocacy implies the emergence of a global civil society truly representative of global constituencies The authors address these important debates using original data drawn from a large scale project which maps all organized interests participating in two international venues the World Trade Organizations Ministerial Conferences 1995 2017 and the United Nations Climate Summits 1997 2017 They leverage this unique dataset to carry out a systematic empirical assessment of contending views on the factors driving the rise of transnational advocacy In doing so the book demonstrates that cross national differences in global interest representation largely mirror states economic power and that global interest communities are likely to remain dominated by organizations representing national rather than global interests This book will be of great interest to students and scholars working in

comparative politics public policy governance international relations and international political economy **U.S. Politics and the Global Economy** Ronald W. Cox, Daniel Skidmore-Hess, 1999 This book investigates the influence of globalization on ideology and politics in the United States Ronald Cox and Daniel Skidmore Hess argue that U S policy has been motivated less by anxiety about the independence and stability of the domestic economy and more by worry about factors that might limit the participation of U S corporations in international markets Connecting trends in domestic and foreign policy with the changing needs of industry they associate increased globalization with the the breakup of the liberal New Deal coalition the collapse of the Bretton Woods Agreement in the 1970s the neoconservative antiregulatory movements of the 1980s and the rightward drift of both the Republican and Democratic Parties The Perils and Promise of Global Transparency Kristin M. Lord, 2012-02-01 While the trend toward greater transparency will bring many benefits Kristin M Lord argues that predictions that it will lead inevitably to peace understanding and democracy are wrong The conventional view is of authoritarian governments losing control over information thanks to technology the media and international organizations but there is a darker side one in which some of the same forces spread hatred conflict and lies In this book Lord discusses the complex implications of growing transparency paying particular attention to the circumstances under which transparency s effects are negative Case studies of the 1994 genocide in Rwanda and the government of Singapore s successful control of information are included A Global Union for Global Workers Nathan Lillie, 2013-10-08 This is a book about how global unionism was born in the maritime shipping sector It argues that the industrial structure of shipping and specifically the interconnected nature of shipping production chains facilitated the globalization of union bargaining strategy and the transnationalization of union structures for mobilizing industrial action This in turn led to global collective bargaining institutions and effective union participation in global regulatory politics This study uses a variety of source and analytical techniques relying heavily on interviews with union official and other maritime industry people in many countries

Introduction to Global Studies John McCormick, 2025-03-06 Building on the strengths of the previous edition this well established textbook gives students a broad and inclusive overview of the important issues and events of our rapidly changing world Delving into key debates and topics in global studies ranging from migration and trade to the global climate emergency and health and disease this new edition covers the latest developments in global issues supporting students with an intriguing review of the world as it is today With popular learning features such as comparisons of the Global and Local and the Global North and South as well as Contemporary Debates boxes this text equips students with relevant examples and wide ranging perspectives for addressing central themes in global studies Ideal for students on introductory global studies and globalization courses this third edition offers A brand new chapter on food and agriculture Chapters have been expanded to allow for more case studies and increased coverage of the themes of globalization inequality and development Figures and tables updated with the most recent data and new details on the UN s Sustainable Development Goals A comprehensive
