**Pro TacticsTM: Muskie** Jack Burns, Rob Kimm, 2008-05-01 They don't call it the Fish of Ten Thousand Casts for nothing. The challenge of catching muskie is not only finding them but also figuring out their attitude and what presentation might work today. To find success tomorrow you'll probably need a different location, attitude, and lure. Pro muskie hunters Jack Burns and Rob Kimm share their own experience as well as that of the many other muskie anglers with whom they've worked and fished over the years. They cover the basic biology of muskies and how you can use that knowledge to catch more and bigger fish. They discuss fishing tackle, release techniques, reacting to follows, doing figure eights, triggering strikes, and much more. In this expertly written book, you'll find examples of on-the-water tactics and strategies covering a wide range of situations. More important, you'll develop an understanding of the why behind a particular strategy and how to adapt to different water and weather conditions throughout the year. The result is a complete up-to-date course on muskie fishing for the beginning to intermediate angler.

**Caring Hearts and Critical Minds** Steven Wolk, 2023-10-10 Imagine if going to school meant more than preparing kids for a test, teaching a canned curriculum, and training students for their future as workers. What if school were also about cultivating students to be caring, community-involved citizens and critical, creative thinkers who love to read? In *Caring Hearts Critical Minds*, teacher-author Steven Wolk shows teachers how to help students become better readers as well as better people. I want my students to be thinkers and have rich conversations regarding critical issues in the text and be able to formulate opinions regarding these issues, says Leslie Rector, a sixth-grade teacher who collaborated with Wolk on some of the units featured in this book. Wolk demonstrates how to integrate inquiry learning, exciting and contemporary literature, and teaching for social responsibility across the curriculum. He takes teachers step by step through the process of designing an inquiry-based literature unit and then provides five full units used in real middle-grade classrooms. Featuring a remarkable range of recommended resources and hundreds of novels from across the literary genres, *Caring Hearts Critical Minds* gives teachers a blueprint for creating dynamic units with rigorous lessons about topics kids care about, from media and the environment to personal happiness and global poverty. Wolk shows teachers how to find stimulating, real-world, complex texts called for in the Common Core State Standards and integrate them into literature units. I know from experience that a great book changes the reader, says Karen Tellez, an eighth-grade teacher featured in the book. For me, books have helped me escape, fall in love, recover from heartbreak, and have broken open my mind from the age of twelve. I hope my students gain better reading comprehension, confidence as readers, connections to the characters and events, a curiosity for the world, and tolerance for others. *Caring Hearts Critical Minds* shows teachers how to turn these hopes and goals into reality.
