Heavy-ion Physics: Today And Tomorrow - Proceedings Of The 7th Adriatic International Conference On Nuclear Physics, 1991 Roman Caplar, Walter Greiner, 1991-11-29 Nuclear Molecules Walter Greiner, Jae Y. Park, Werner Scheid, 1995

Nuclear molecules are analogous to ordinary electronic molecules Valence nucleons are circling nuclear cores and thus bind them They appear in collisions of nuclei on nuclei and in fission and fusion processes Here a lively field of research has developed over the past 20 years Nuclear Molecules are the strongest deformed nuclear complexes and play an important role in nuclear structure cluster physics They are also of considerable interest for the synthesis of elements in astrophysics cosmology Most of the various nuclear molecular phenomena are discussed This book is the first monograph exclusively written to cover the theoretical aspects of nuclear molecular phenomena in heavy ion collisions The experimental evidence is presented and confronted with theory Proceedings of the 7th International Conference on Clustering Aspects of Nuclear Structure and Dynamics M. Korolija, Z. Basrak, R. Caplar, 2000 In the past three decades our understanding of the clustering behavior of nucleons in both nuclear structure and nuclear dynamics has evolved considerably Moreover the notion of the cluster has made its way into a number of scientific disciplines This book provides an overview of the current understanding of clustering phenomena in nuclear structure and nuclear dynamics The topics covered include fundamental aspects of nuclear clustering models of nucleon clusterization clustering aspects of nuclear structure selected topics on clustering aspects in medium and high energy nucleus nucleus collisions *Nuclear Science Abstracts*, 1975 *Clustering Aspects Of Nuclear Structure And Dynamics: Cluster '99 - Proceedings Of The 7th International Conference* Roman Caplar, 2000-03-02

Energy Research Abstracts, 1994-10 Radiochemistry G W A Newton, 2007-10-31 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 90 years The Royal Society of chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights

in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can be seen on the inside flap of this volume

Adaptive Optics for Industry and Medicine Ulrich Wittrock, 2006-01-20 The 4th International Workshop on Adaptive Optics for Industry and Medicine took place in Munster Germany from October 19 to October 24 2003 The series of International Workshops on Adaptive Optics for Industry and Medicine began with the first workshop in Shatura Russia in 1997 the second workshop took place in Durham England in 1999 and the third workshop was held in Albuquerque USA in 2001 The workshop series started out as

a true grassroots movement and kept an informal spirit throughout all four workshops. Many personal friendships and scientific collaborations have been formed at these meetings. This fourth workshop was supposed to be held in Beijing, China. However, the program committee decided in May 2003 to move the workshop to Munster due to the general perception that the SARS (Severe Acute Respiratory Syndrome) cases reported in China could lead to a large epidemic. Despite this rather short notice, the workshop in Munster was attended by about 70 people. Incidentally, the workshop coincided with the 50th anniversary of adaptive optics because it was October 1953 when Horace Babcock published his famous paper "The possibilities of compensating astronomical seeing" in the *Publications of the Astronomical Society of the Pacific*.
