*Alienation After Derrida* Simon Skempton, 2011-10-20 *Alienation After Derrida* rearticulates the Hegelian Marxist theory of alienation in the light of Derrida's deconstruction of the metaphysics of presence Simon Skempton aims to demonstrate in what way Derridian deconstruction can itself be said to be a critique of alienation In so doing he argues that the acceptance of Derrida's deconstructive concepts does not necessarily entail the acceptance of his interpretations of Hegel and Marx In this way the book proposes radical reinterpretations not only of Hegel and Marx but of Derridian deconstruction itself The critique of the notions of alienation and de-alienation is a key component of Derridian deconstruction that has been largely neglected by scholars to date This important new study puts forward a unique and original argument that Derridian deconstruction can itself provide the basis for a rethinking of the concept of alienation a concept that has received little serious philosophically engaged attention for several decades

*Hegel and the Art of Negation* Andrew W. Hass, 2013-11-12 Why is the philosopher Hegel returning as a potent force in contemporary thinking Why after a long period when Hegel and his dialectics of history have seemed less compelling than they were for previous generations of philosophers is study of Hegel again becoming important Fashionable contemporary theorists like Francis Fukuyama and Slavoj Žižek as well as radical theologians like Thomas Altizer have all recently been influenced by Hegel the philosopher whose philosophy now seems somehow perennial or to borrow an idea from Nietzsche

eternally returning Exploring this revival via the notion of negation in Hegelian thought and relating such negativity to sophisticated ideas about art and artistic creation Andrew W Hass argues that the notion of Hegelian negation moves us into an expansive territory where art religion and philosophy may all be radically conceived and broken open into new forms of philosophical expression The implications of such a revived Hegelian philosophy are the author argues vast and current Hegel thereby becomes the philosopher par excellence who can address vital issues in politics economics war and violence leading to a new form of globalised ethics Hass makes a bold and original contribution to religion philosophy art and the history of ideas

**Calvin's Salvation in Writing** William A. Wright,2015-04-14 Academic writing is not a neutral medium for conveying truth its powers and faults must be exposed before theology entrusts its mysteries to the academic text To that end William Wright en route to putting Calvin's Salvation in Writing institutes a new theological genre theography theology that confesses its academic parameters

with both gratitude and repentance He delineates those parameters by contrasting the philosophical rationales for writing found in Hegel and Derrida Drawing on their insights into dialectic and difference Wright sets out Calvin's doctrine of justification and sanctification across a shifting written terrain Observing Calvin's doctrinal structure thus becomes a path to save academic writing from claiming for itself either too much or too little Calvin's Salvation in Writing A Confessional Academic Theology is the philosophically boldest employment of Calvin to date Through innovatively mining Calvin's theology William Wright designs a new method of theology that will enliven the field

**Excluded Within** Sina Kramer,2017 Why are some claims seen or heard as political claims while others are not Why are some people not seen or heard as political agents And how does their political unintelligibility shape political bodies and the terms of political agency from which they are excluded In this groundbreaking book Sina Kramer uses the framework of constitutive exclusion to describe the phenomenon of internal exclusion exclusions that occur within a political body More specifically constitutive exclusions occur when a system of thought or a political body defines itself by excluding some difference based on gender race class sexuality etc that is considered intolerable to the boundaries that comprise the body or system s political worth This exclusion is not absolute but preserves the very difference it seeks to repress in order to define itself against what it is not Yet as Kramer argues if those who are excluded contest their repression their political claims are deemed threatening and criminal But can we ever be without constitutive exclusions And can we avoid reinscribing them through critique Kramer ultimately argues that to do justice to the excluded to render those claims intelligible as political claims instead requires the reconstitution of the political body on new terms Importantly this book offers both a diagnosis and a critique of the concept of constitutive exclusion articulating what counts as a political action and who counts as a political agent Kramer takes up a range of cases including those of Antigone Claudette Colvin and Rosa Parks the 1992 Los Angeles riots and the Black Lives Matter movement to better understand who counts as a political actor and how we understand political belonging and the contestation of exclusion Excluded Within articulates who we are by virtue of who we exclude and what claims we cannot see hear or understand

Hegel's Interpretation of the Religions of the World Jon Stewart,2018-09-05 In his Lectures on the Philosophy of Religion Hegel treats the religions of the world under the rubric the

determinate religion This is a part of his corpus that has traditionally been neglected since scholars have struggled to understand what philosophical work it is supposed to do In Hegel s Interpretation of the Religions of the World Jon Stewart argues that Hegel s rich analyses of Buddhism Hinduism Zoroastrianism Judaism Egyptian and Greek polytheism and the Roman religion are not simply irrelevant historical material as is often thought Instead they play a central role in Hegel s argument for what he regards as the truth of Christianity Hegel believes that the different conceptions of the gods in the world religions are reflections of individual peoples at specific periods in history These conceptions might at first glance appear random and chaotic but there is Hegel claims a discernible logic in them Simultaneously a theory of mythology history and philosophical anthropology Hegel s account of the world religions goes far beyond the field of philosophy of religion The controversial issues surrounding his treatment of the non European religions are still very much with us today and make his account of religion an issue of continued topicality in the academic landscape of the twenty first century
