Heinrich Von Veldeke Eneas:

Heinrich Von Veldeke Eneas Rodney W. Fisher, 1992 Heinrich von Veldeke's adaptation of the Eneas was regarded even by the classical generation of Middle High German poets as a pioneering achievement His immediate source the Anglo Norman Roman d Eneas offers together with other sources a logical starting point for any interpretation of Veldeke's work The last part of this volume a translation of the Middle High German text into English meets the needs of those medievalists who have no knowledge of the Middle High German language German Literature of the High Middle Ages Will Hasty, 2006 New essays on the first flowering of German literature in the High Middle Ages and especially during the period 1180-1230 The High Middle Ages and particularly the period from 1180 to 1230 saw the beginnings of a vibrant literary culture in the German vernacular While significant literary achievements in German had already been made in earlier centuries they were a somewhat precarious vernacular extension of Christian Latin culture But the vernacular literary culture of the High Middle Ages was an integral part of broader cultural developments in which the unquestioned validity of traditional authoritative models began to lose its hold A secular culture began to emerge in which positive value began to be attached to the however transitory allegiances pleasures and loves of life In new essays dealing with the most significant literary genres the heroic epics the romances the love lyrics and political poetry and with broader political social and cultural issues control of aggression territorialization this third volume of the Camden House History of German Literature demonstrates how the emergence of a vernacular literary culture in Germany was an important part of a broader cultural transformation in which medieval people began to redefine themselves their relationships to one another and the position of humanity in the scheme of things Contributors Albrecht Classen Nicola McLelland Rodney Fisher Neil Thomas Marion Gibbs and Sidney Johnson Rüdiger Krohn Will Hasty Nigel Harris Susann Samples Sara Poor Michael Resler Rüdiger Brandt Elizabeth A Andersen Ulrich Müller and Franz Viktor Spechtler Ruth Weichselbaumer W H Jackson Charles Bowlus Will Hasty is Professor of German Studies and co-founder and co-director of the Center for Medieval and Early Modern Studies at the University of Florida A Companion to Middle High German Literature to the 14th century Francis Gentry, 2002-12-01 This volume is a guide to medieval German literature from its beginnings in the eighth century to the fourteenth century It will escort the motivated student and colleague with interest in the European Middle Ages but no expertise in older German languages The chapter authors all internationally known scholars were given the freedom to arrange their chapters as they felt most appropriate including the question of the terminus ad quem Chapters deal either with a chronological period e.g. 13th century or with specific genres e.g. drama In addition chapters both on the historical epoch and on the development of the German language in the medieval period have been included In general historical and cultural topics play an important role in each chapter **A Preface to the 'Nibelungenlied'**, 1987-06 This book aims to make available the necessary background for an informed reading of the Nibelungenlied the twelfth century epic perhaps best known to non-Germans from

Wagner's music dramas Two traditions of scholarly thought exist about the Nibelungenlied The first sees the poem as a development out of German heroic legend the second focuses on the work's location in the contemporary literary context at the end of the twelfth century The first and older school deals with the evolution of the story over time and the question of how short heroic poems attained epic compass in the later Nibelungenlied The second seeks to interpret the poem in terms of the new emergence of Arthurian romance around 1200 The author attempts to bridge the gap between the two contending schools suggesting that neither approach precludes the other Although the Nibelungenlied poet drew the story itself from earlier heroic poems the author makes clear that the poet absorbed impulses from other types of literature as well The book is in three parts Part I discusses literary antecedents tracing the development of German heroic poetry from the Migration Age on then describing narrative practice in the twelfth century in historical and legendary epic on the one hand and romance on the other Part II analyzes the Nibelungenlied in its immediate literary context addressing possible sources and narrative innovations The author relates the story of the poem to the immediate antecedent versions of the legend that are now preserved only in the Norse Thidrek's Saga surveys recent general interpretations and suggests a literary historical analysis that can plot the Nibelungenlied more accurately on the literary map of the twelfth century Part III comprises previously untranslated texts and summaries of source materials bearing on the Nibelungenlied

Cityscaping Therese Fuhrer, Felix Mundt, Jan Stenger, 2015-05-19 The term cityscaping is here introduced to characterise the creative process through which the image of the city is created and represented in various media text film and artefacts It thus turns attention away from built urban spaces and onto mental images of cities One focus is on the question of which literary visual and acoustic means prompt their recipients spatial imagination another is to inquire into the semantics and functions that are ascribed to the image of a city as constructed in various media The examples of ancient texts and works of art and modern literature and films are used to elucidate the artistic potential of images of the city and the techniques by which they are semanticised With its interdisciplinary approach the volume for the first time makes clear how strongly mental images of urban space both ancient and modern have been shaped by the techniques of their representation in media

Violence in Medieval Courtly Literature Albrecht Classen, 2012-10-12 Although courtly literature is often associated with a chivalrous and idyllic life the fifteen original essays in this collection demonstrate that the quest for love in the world of medieval courtly literature was underpinned by violence Lovers were rejected mistrust ruled rape was a rampant problem and marriage was often characterized by brutality Albrecht Classen brings together an outstanding group of historical cultural and literary scholars in this volume to investigate the complicated nuanced and often surprising unions of love and violence in courtly medieval literature

Gewaltgenuss, Zorn und Gelächter Claudia Ansorge, Cora Dietl, Titus Knäpper, 2015-06-17 Violence and the escalation of violence are often linked with emotion and passion Emotions function to prepare stir and perform violence which again stimulates emotions and might lead to a loss of control and in the case of collective violence to an intensified coherence of the violent community Literary or historiographic texts that depict collective violence functionalise the factor emotions in different ways depending on the respective context They might serve at justifying violence or making it plausible at condemning it or making it more comprehensible or even enjoyable This is true both for modern and older accounts The essays that are collected in the present volume are presented by members of the Giessen research group Communities of Violence and their guests They ask whether there are perspectives of the emotional side of violence which are specific for certain epochs and analyse medieval and early modern depictions of emotional acts of violence with a special focus on their contexts their messages and their aesthetic of reception

Starkey, 2016-04-30 This multi disciplinary collection of essays draws on various theoretical approaches to explore the highly visual nature of the Middle Ages and expose new facets of old texts and artefacts The term visual culture has been used in recent years to refer to modern media theory film modern art and other contemporary representational forms and functions But this emphasis on visuality is not only a modern phenomenon Discourses on visual processes pervade the works of medieval secular poets theologians and scholastics alike The Middle Ages was a highly visual society in which images objects and performance played a dominant communicative and representational role in both secular and religious areas of society The essays in this volume which present various perspectives on medieval visual culture provide a critical historical basis for the study of visuality and visual processes Courtly Love, the Love of Courtliness, and the History of Sexuality James A. Schultz, 2006-08-15 One of the great achievements of the Middle Ages Europe s courtly culture gave the world the tournament the festival the knighting ceremony and also courtly love But courtly love has strangely been ignored by historians of sexuality With *Courtly Love the Love of Courtliness and the History of Sexuality* James Schultz corrects this oversight with careful analysis of key courtly texts of the medieval German literary tradition Courtly love Schultz finds was provoked not by the biological and intrinsic factors that play such a large role in our contemporary thinking about sexuality sex difference or desire but by extrinsic signs of class bodies that were visibly noble and behaviors that represented exemplary courtliness Individuals became subjects of courtly love only to the extent that their love took the shape of certain courtly roles such as singer lady or knight They hoped not only for physical union but also for the social distinction that comes from realizing these roles to perfection To an extraordinary extent courtly love represented the love of courtliness the eroticization of noble status and the courtly culture that celebrated noble power and refinement *Ogling Ladies* Sandra Lindemann Summers, 2019-03-18 In the European Middle Ages the harm a person s gaze could cause was greatly feared A stare was considered an act of aggression intense gazing was believed to exert immense power over the individual observed The love of looking or scopophilia is a common motif among female figures in medieval art and literature where it is usually expressed as a motherly or sexually interested gaze one sanctioned the other forbidden Sandra Summers investigates these two major variants of female voyeurism in exemplary didactic and courtly literature by medieval German authors Setting the motif against the period s dominant patriarchal ethos and its almost exclusive pattern of male authorship Summers argues that the maternal gaze was endorsed as a stabilizing influence while the erotic gaze was condemned as a threat to medieval order Summers examines whether medieval artists and writers invented the idea of ogling or whether they were simply recording a behavioral practice common at the time She investigates how the act of ogling altered the narrative trajectory of

female characters and she also considers how it may have affected the regulation and restriction of women during Europe's Middle Ages Drawing upon contemporary gender studies women's studies film studies and psychology Summers argues that the female gaze ultimately governs social formation The exploration of the female gaze in period literature transcends medieval scholarship and impacts our understanding of the broader problem of gender perceptions and social structuring in Western civilization

The Graph of Sex and the German Text, 2022-06-08 **The European Book in the Twelfth Century** Erik Kwakkel, Rodney Thomson, 2018-03-31 The long twelfth century 1075-1225 was an era of seminal importance in the development of the book in medieval Europe and marked a high point in its construction and decoration This comprehensive study takes the cultural changes that occurred during the twelfth-century Renaissance as its point of departure to provide an overview of manuscript culture encompassing the whole of Western Europe Written by senior scholars chapters are divided into three sections: the technical aspects of making books, the processes and practices of reading and keeping books, and the transmission of texts in the disciplines that saw significant change in the period, including medicine, law, philosophy, liturgy, and theology Richly illustrated, the volume provides the first in-depth account of book production as a European phenomenon
