How to Read the Crystal, or, Crystal and Seer Sepharial,2020-09-28 Any attempt at a scientific explanation of the phenomenon of crystal seering to use an irregular but comprehensive term would perhaps fall short of completeness and certainly would depend largely upon the exercise of what Professor Huxley was wont to call the scientific imagination The reasons for this are obvious We know comparatively little about atomic structure in relation to nervous organism We are informed to a certain degree upon atomic ratios we know that all bodies are regarded by the physicist as a congeries of atoms and that these atoms are centres of force Primarily the atomic theory would refer all heterogeneous bodies to one homogeneous substance from which substance by means of a process loosely referred to as differentiation all the elements are derived These elements are the result of atomic arrangement and the atoms of each are known to have various vibrations the extent of which is called the mean free path of vibration The indestructibility of matter the fact that all nature is convertible and the absolute association of matter and force lead to the conclusion that since every change in matter implies a change of force matter must be ever living and active and primarily of a spiritual nature The great Swedenborg no less a scientist than a spiritual seer laid down his doctrine of Correspondences upon the primary concept of the spiritual origin of all force and matter Matter he argued was the ultimate expression of Spirit as Form was that of Force Spirit was to Force what Matter was to Form our ideas of Matter and Form being closely related Hence for every Spiritual Force there is a corresponding Material Form and the material or natural world corresponds at all points with the world of spirit without being identical This in brief is the conclusion to which the scientific imagination of the present day extending as it does from the known into the unknown is slowly but surely leading up

Astrology: How to Make and Read Your Own Horoscope Sepharial,2020-09-28 From the earliest ages of the world s history the subject of Astrology has excited the interest of and exercised a great influence over the minds of a certain order

of thinking men The science has never been universal in its acceptance though it is safe to say that with its countless adherents in the East and the ever increasing number of its advocates in the West there is no faith which has a more universal application than the belief in the influence of the heavenly bodies over the destinies of human beings It is not possible within the limits of a small handbook such as this to adequately consider the philosophic paradox which makes of Freewill in man a necessity in play but it is obvious that the concept is not altogether unscientific seeing that it is customary to speak of the free path of vibration in chemical atoms while at the same time it is known that these atoms have their restricted characteristics modes of motion and are all subject to the general laws controlling the bodies of which they form integral parts Let it suffice that if we can trace an actual connectedness between the disposition of the heavenly bodies at the moment of a birth and the known life and character of the individual then born and an exact correspondence between the course of events in that life with the changes occurring in the heavens subsequent to the moment of birth we shall do well to accept the fact for what it is worth and arrange our philosophic notions accordingly As far back as the year B C 2154 we find mention of the great importance attaching to the celestial phenomena in the minds of Chinese rulers It is recorded in the Historical Classic of China that at that time the astrologers Hi and Ho neglected their duties so that when on the 10th of October there was a great eclipse of the Sun at Peking between seven and nine o'clock in the morning the people were wholly unprepared for it and ran about here and there in the utmost consternation For this offence Hi and Ho were deprived of their offices their estates were confiscated and they were driven from the kingdom Among the Hindus we have the classical writers Garga Parashara and Mihira together with their legions of commentators The Assyrian records are full of astrological allusions regarding the influence of planetary conjunctions and stellar positions The Greek mythology is nothing but a vast system of cosmographical astrology and there is no other history in it than what you may read in the constellations of the heavens and the corresponding evolution of the human race Aristotle made it a part of his philosophy Hipparchus Hippocrates Thales Galenius and others subscribed an intelligent belief in its principles To Claudius Ptolemy however we are indebted for the first concise and scientific statement of its principles and practice so far as Europe is concerned He wrote the Tetrabiblos or Four Books and laid the foundations of a true astrological science Julius Firmicus confirmed Ptolemy and enlarged upon his observations The subsequent discovery of the planets Uranus and Neptune by Herschel and Adams widened the field of research and gave to later astrologers the clue to much that hitherto had been imperfectly understood Not that these discoveries overturned the whole system of astrology as some have imagined and foolishly stated or that they negatived the conclusions drawn from the observed effects of the seven anciently known bodies of the solar system but it became possible after a lapse of time to fill in the blank spaces and to account for certain events which had not been traced to the action of any of the already known planets
