Supporting Civil Society Laura Macdonald, 2016-07-27 Many analysts are looking to non governmental organizations NGOs as the promoters of more equitable and democratic forms of development because of their status as actors in civil society Based on a critical evaluation of six rural development projects in Costa Rica and Nicaragua *Supporting Civil Society* shows that NGOs often perpetuate paternalism and dependency It is argued that both international and national NGOs need to support social movements which are best able to express the demands of people at the grassroots

Military Entrepreneurs and the Spanish Contractor State in the Eighteenth Century Rafael Torres Sánchez, 2016-07-01 *Military Entrepreneurs and the Spanish Contractor State in the Eighteenth Century* offers a new approach to the relationship between warfare and state construction Historians looking at how war funding impinged on state development and how state growth made wars more significant have tended to downplay the role of military provisioning entrepreneurs Written off as corrupt and selfish these entrepreneurs jarred with the received view of a rationally growing and modernising state This volume shows that the state entrepreneur relationship was much more fluid and constant than previously thought The state was not able to enforce a top down military supply policy at the same time it benefited from the entrepreneurs collaboration and their shared mercantilist ambitions The entrepreneurs mobilisation of military supplies was crucial for extending state authority and helped to knit together national and colonial markets But this fluid state entrepreneur relationship gradually became shrouded in privileges and monopolies not so much ideology driven or imposed by the entrepreneurs but rather as an arrangement exploited by the state to boost its control over them whittling down middlemen and ensuring the solvency and creditworthiness of the chosen few This arrangement spiralled into a risky inter dependence and cramped entrepreneurial competition Rafael Torres S

nchez furnishes new insights into the role of military entrepreneurs in debates about warfare and state construction

How the Spanish Empire Was Built Felipe

Fernández-Armesto, Manuel Lucena Giraldo, 2024-05-06 A richly researched account of the clever, industrious and deeply practical men who followed in the footsteps, often literally, of Columbus, Cortés, Pizarro, Núñez de Balboa and others. Wall Street Journal: The untold story of the engineering behind the empire, showing how imperial Spain built upon existing infrastructure and hierarchies of the Inca, Aztec and more to further its growth. Sixteenth-century Spain was small, poor, disunited and sparsely populated. Yet the Spaniards and their allies built the largest empire the world had ever seen. How did they achieve this? Felipe Fernández-Armesto and Manuel Lucena Giraldo argue that Spain's engineers were critical to this venture. The Spanish invested in infrastructure to the advantage of local power brokers, enhancing the abilities of incumbent elites to grow wealthy on trade and widening the arc of Spanish influence. Bringing to life stories of engineers, prospectors, soldiers and priests, the authors paint a vivid portrait of Spanish America in the age of conquest. This is a dazzling new history of the Spanish Empire and a new understanding of empire itself as a venture marked as much by collaboration as oppression.
